Free Shipping After Discount

The Free Shipping After Discount module provides free shipping based on the cart subtotal after a promo code or a discount rule application.

- Apply free shipping to a cart subtotal after discount
- Take shipping calculations over total control
- Configure the module in one click

Settings

To enable the extension please go to **System** → **Configuration** → **Shipping Methods** → **Free Shipping**.

Order Amount After Discount - set this option to 'Yes' to disable a free shipping method after a discount.

In our example the minimal order amount equals to \$100. It means that if after a coupon application a cart subtotal decreases to \$99 or less, the Free Shipping method will be disabled.

Frontend examples

In this example the module is disabled and the "Free Shipping" method is available even after a coupon application.
