

**amasty**

For more details see how the [Pre Order](#) extension works.

# Guide for Pre Order

Customize stock statuses and notes, enable *Pre Order* button to analyze whether to restock items. The extension allows you to better understand your customers' demands.

## General Settings

To configure the extension, go to **Admin Panel → System → Configuration → Pre Order**.

## Functional Options

Functional Options		
Enable Pre Orders	<input type="text" value="Yes"/> <span>?</span>	[STORE VIEW]
	▲ Affects new orders with products set to be pre-ordered.	
Allow Pre Orders For Products With Zero Quantity	<input type="text" value="Yes"/>	[STORE VIEW]
	▲ If set to "No", it is possible to pre order products that have quantity set to 1 or higher only. This way you can limit number of products available for pre order.	
Disable Pre Order For Items With Positive Qty	<input type="text" value="No"/>	[STORE VIEW]
	▲ If set to "Yes", pre orders will take effect only for products with quantity 0 or lower.	

**Enable Pre Orders** - Enable the extension's functionality.

**Allow Pre Orders for configurable products** - Specify whether to allow pre orders for products with *Zero* quantity.

**Disable Pre Order for Items with Positive Qty** - Set this option to *Yes* to enable pre orders only for products with *Zero* or lower quantity.

## Display Options

Display Options	
Add To Cart Button Text	<input type="text" value="Pre Order"/> ▲ Text to display on the button instead of 'Add To Cart'
Default Pre-Order Note	<input type="text" value="{sku} will be available in 14 days."/> ▲ You can use product attributes like {sku} or {delivery_time}
Insert pre-order notes into product lists	<input type="text" value="Yes"/> ▲ This affects category view pages, search results, and other product listings on frontend.
Pre-Order Warning	<input type="text" value="Please be aware this is a preorder. The products will be shipped to you once they become available."/> ▲ Message to be displayed with order information

**Add to Cart Button Text** - Specify the text that will be displayed instead of the *Add to Cart* button on the category and product pages for all pre order products.

**Default Pre-Order Note** - Specify this note if you want to display one and the same text with all pre order products. In the note, you can use product attributes as variables: **{attribute}**.

**Pre-Order Warning** - Here you can create a message to display with order information.

### Additional Options

Additional Options	
Detect Complex Products Which Consist only of Pre-Order Components	<input type="text" value="No"/> [STORE VIEW] ▲ If set to 'Yes', the extension analyzes your configurable, bundle and grouped products on category pages to indicate preorder status before customers choose any option in cases, when all components have 'Preorder' status. Please be aware this may cause huge performance degradation for larger catalogs.
Automatically Add Warning to Transactional Emails	<input type="text" value="Yes"/> [STORE VIEW] ▲ Please select 'No' in case you prefer to use {{var order.preorder_warning}} variable in your placing order transactional email template.

**Detect complex products which consist only of Pre-Order Components** - Set the option to *Yes* to display the pre order warning message right on the product and category pages before customer chooses any product configuration. The option works for bundle, grouped and configurable products, if all their components have *Pre order* status.

**Automatically Add Warning to Transactional Emails** - If the option is set to Yes, the pre order warning message will be automatically added to the transactional email template. If the option is set to No, you can place the variable manually anywhere in the email template.

```
{{var order.preorder_warning}}
```

## Theme Integration Parameters

Customize buttons and notes to integrate in your theme.

Theme Integration Parameters		
Cart Button	<pre>@(&lt;button[^&gt;]*btn-cart.*?&lt;span[^&gt;]*&gt;)[^&lt;]+(&lt;/span&gt;.*?&lt;/button&gt;)&amp;#64;s</pre>	[STORE VIEW]
	▲ (left static) replacing text (right static)	
Product List Cart Button	<pre>@&lt;button[^&gt;]*btn-cart[^&gt;]*product/(\d+).*?&lt;/button&gt;&amp;#64;s</pre>	[STORE VIEW]
	▲ left part (product id) right part	
Cart Product Name	<pre>@&lt;h2[^&gt;]*class="product-name".*?&lt;/h2&gt;&amp;#64;s</pre>	[STORE VIEW]
	▲ Note will be added right after match	
Product availability	<pre>@&lt;p[^&gt;]*class="availability.*?&gt;(.*?)&lt;/p&gt;&amp;#64;s</pre>	[STORE VIEW]
	▲ left static (replacing text) right static
