For more details see the [Tier Price](#) extension page.

Tier Price

Enhance default Magento tier price functionality by setting up quantity based discounts as a percentage of product's base price instead of manual editing of fixed prices again and again. It greatly saves your time and increases the number of loyal customers.

- Fixed tier price
- Discount percent of base price
- Discount amount of base price
- Bulk tier prices update
- Choose regular or final price as a base

With the extension you'll be able to specify tier prices for each customer group. You can also configure different tier prices on each website. This is convenient if you have different pricing for each location you work with.

General Settings

To get the access to the 'Tier Price' settings please go to: **System → Configuration → Tier Prices**

Tier Prices Save Config

Price Behaviour

Apply to items with options	Yes	[STORE VIEW]
▲ Tier Prices will be applied independently of selected item options		
Base Price for Calculation	Regular Price	[STORE VIEW]

Apply to items with options. Note that Tier Prices will be applied independently of selected item options. Choose which price should be the base for tier price calculation. There are 2 options - regular or final prices.

Manage Products

To apply a tier price, go to the **Catalog → Manage Products** page and choose the necessary product. In the product settings choose tab **Prices**.
