

**amasty**

For more details see the [XML Google Sitemap for Magento 1](#) extension page, part of the bestselling [SEO Toolkit](#) module.

# XML Google Sitemap

With the extension, easily produce XML Sitemap for your site in efficient way. Help Google to correctly index your web store and increase positions in search results.

## General Settings

Go to **Admin panel** → **CMS** → **SEO Toolkit** → **Google Sitemaps**

To create a new sitemap, click the *Add New Sitemap* button.

On the grid, you can see all google sitemaps, generated with the extension.

The screenshot shows the 'Manage Sitemaps' interface. At the top right is an 'Add New Sitemap' button. Below it are controls for page navigation (1 of 1 pages), view count (20 per page), and export options (Export to: CSV, Export, Reset Filter, Search). A status bar indicates '0 items selected'. The main table has columns for ID, Store, Title, Path, Url, and Generated At. It lists three sitemaps generated on Nov 29, -1 4:00:00 PM.

ID	Store	Title	Path	Url	Generated At
1	Main Website Madison Island English	Imported From Google Sitemap Settings	media/google_sitemap_1.xml	<a href="http://seo-toolkit-new.demo.amasty.com/seo-toolkit-new/media/google_sitemap_1.xml">http://seo-toolkit-new.demo.amasty.com/seo-toolkit-new/media/google_sitemap_1.xml</a>	Nov 29, -1 4:00:00 PM
2	Main Website Madison Island French	Imported From Google Sitemap Settings	media/google_sitemap_2.xml	<a href="http://seo-toolkit-new.demo.amasty.com/seo-toolkit-new/media/google_sitemap_2.xml">http://seo-toolkit-new.demo.amasty.com/seo-toolkit-new/media/google_sitemap_2.xml</a>	Nov 29, -1 4:00:00 PM
3	Main Website Madison Island German	Imported From Google Sitemap Settings	media/google_sitemap_3.xml	<a href="http://seo-toolkit-new.demo.amasty.com/seo-toolkit-new/media/google_sitemap_3.xml">http://seo-toolkit-new.demo.amasty.com/seo-toolkit-new/media/google_sitemap_3.xml</a>	Nov 29, -1 4:00:00 PM

Equip the Magento store with the [GDPR compliance solution](#).

## Sitemap

## General

**Path to sitemap file** - Specify path for XML sitemap

**Max Items Per File** - Specify max items per file and max file size.

**Google requirements for XML sitemap:**

- **No more than 50,000 URLs in a sitemap;**
- **Size no larger than 50MB;**

**General**

Name *	<input type="text" value="Imported From Google Sitemap Settings"/>
Stores	<input type="text" value="English"/>
Path to sitemap file *	<input type="text" value="media/google_sitemap_1.xml"/> <small>▲ Like "sitemap/sitemap1.xml". Make sure path is writable and accessible through internet</small>
Max Items Per File	<input type="text" value="0"/> <small>▲ If exceed, index file will be created. Read more at <a href="https://support.google.com/webmasters/answer/71453?hl=en">https://support.google.com/webmasters/answer/71453?hl=en</a></small>
Max File Size (kB)	<input type="text" value="0"/> <small>▲ If exceed, index file will be created. Read more at <a href="https://support.google.com/webmasters/answer/71453?hl=en">https://support.google.com/webmasters/answer/71453?hl=en</a></small>
Exclude URLs	<input type="text"/>

## Products

**Include products** - Specify whether to include products into XML sitemap.

**Include Out of Stock Products** - Set to *No* to exclude out-of-stock products from XML sitemap.

**Add Images** - Set *Yes* to include product images into XML sitemap.

**Priority** - Specify priority to tell Google which pages are the most important on your site.

**Frequency** - Specify how often content on product pages are being updated.

**Include Last Modified** - Set *Yes* to include the date when the page was last modified.

Products	
Include products	Yes ▼
Include Out of Stock Products	Yes ▼
Add Hreflang	No ▼
Add Images	No ▼
Use All Product Images	No ▼
Priority	1 ▲ 0.0-1.0
Frequency	daily ▼
Include Last Modified	No ▼
Batch Size	100 ▲ Indicate how many items will be handled during one iteration.

## Categories

Specify similar settings for category pages by analogy with [Products Pages](#) settings.

Categories	
Include categories	No ▼
Add Hreflang	No ▼
Add Images	No ▼
Priority	0.5 ▲ 0.0-1.0
Frequency	daily ▼
Include Last Modified	No ▼
Batch Size	30 ▲ Indicate how many items will be handled during one iteration.

## Pages

**Priority** - Specify priority to tell Google which pages are the most important on your site.

**Frequency** - Specify how often content on product pages are being updated.

**Include Last Modified** - Set Yes to include the date when the page was last modified.

**Exclude CMS Pages** - Specify pages that should be excluded from your XML Google sitemap.

Pages	
Include pages	<input type="text" value="No"/>
Add Hreflang	<input type="text" value="No"/>
Priority	<input type="text" value="0.2"/> <small>▲ 0.0-1.0</small>
Frequency	<input type="text" value="daily"/>
Include Last Modified	<input type="text" value="No"/>
Exclude CMS pages	<input type="text"/> <small>▲ URL Keys of CMS Pages to exclude, one per line</small>
Batch Size	<input type="text" value="30"/> <small>▲ Indicate how many items will be handled during one iteration.</small>

## Tags

**Include Tags** - Specify whether to include tags into XML sitemap.

Tags	
Include tags	<input type="text" value="No"/>
Priority	<input type="text"/> <small>▲ 0.0-1.0</small>
Frequency	<input type="text" value="always"/>
Batch Size	<input type="text" value="30"/> <small>▲ Indicate how many items will be handled during one iteration.</small>

## Extra Links

**Include Extra Links** - Set to Yes if you want to include some extra links into sitemap.

**Priority** - Specify pages priority as well as how often the pages are being updated.

**Extra Links to include** - Specify the particular extra links that should be included into your XML sitemap.

Extra Links	
Include Extra Links	<input type="text" value="No"/>
Priority	<input type="text"/> <small>▲ 0.0-1.0</small>
Frequency	<input type="text" value="always"/>
Extra Links to include	<input type="text"/> <small>▲ Links to add, one per line</small>

## Cron Settings

Specify **Frequency** and **Start Time** for the cron job.

**Change Memory Limit for Sitemep Cron Job** - To change the memory limit for cron job, set to **Yes** and move over to *Limit* setting.

**Limit** - Specify the standard amount of memory (i.e. *512,1024,2048*) in mb to limit the cron job. In case of big-sized catalogs, we would recommend to run the cron job without limit (input *-1* in the field).

Cron Settings	
Frequency	<input type="text" value="Daily"/>
Start Time	<input type="text" value="03"/> : <input type="text" value="30"/> : <input type="text" value="00"/>
Enable Logging in File	<input type="text" value="No"/> <small>▲ File is {{base_dir}}/var/log/amseogooglesitemap.log. Please note - magento logging should be enabled</small>
Change Memory Limit for Sitemep Cron Job	<input type="text" value="Yes"/>
Limit	<input type="text" value="2048"/> <small>▲ Please use values in (mb). For example: 512,1024,2048. Put '-1' to run the job without memory limit (recommended for big-sized catalogs)</small>

## Hreflang

To configure **Hreflang** feature, go to **Admin Panel > System > Configuration > Amasty Extensions > SEO Toolkit > Hreflang URLs**

**Hreflang URLs Scope** - Specify whether alternative links should be found within only one website (*Website*) or between several ones (*Global*).

**Language Code** - Specify the language of the audience you want your content introduce to. The option *From Current Store Locale* is available.

**Country Code** - Specify the region you want your content introduce to (optional). The options *From Current Store Default Country* and *Don't add* are available.

*Language* is required and should be specified first, *region* is optional: for instance, *fr-gb* means French content for British visitors.

**X-default** - Specify which store in the XML sitemap will be tagged as a default.

**Multi-Stores CMS Pages Relation** - The option allows to look for alternative links within various websites with different language and region codes.

- By ID - Relates the pages (from different stores) that have the same ID's;
- Hreflang UUID - Relates the pages (from different stores) that have the same UUID's;
- Hreflang URL Key - Relates the pages (from different stores) that have the same URL Keys;

Hreflang URLs	
Hreflang URLs Scope	Global ▼ ▲ Choose <b>Website</b> to work within one website only or <b>Global</b> to work between the websites
Language Code	From Current Store Locale ▼
Country Code	From Current Store Default Country ▼
X-default	--Please Select-- ▼ ▲ If <b>Hreflang Scope</b> is <b>Global</b> , values from website scope for this setting will be ignored
Multi-Stores CMS Pages Relation	By ID ▼ ▲ Choose the way how to identify the same CMS page for different views. By Hreflang UUID option is to be specified for each CMS page manually

There is also a convenient preview box for the *hreflang* settings.

▼ **Preview** [STORE VIEW]

Store	Hreflang Value		
	Product	Category	CMS Page
Main Website			
English	en-US	en-US	en-US
French	fr-US	fr-US	fr-US
German	de-US	de-US	de-US

\*Hreflang Tags are added individually to each rule of the SEO XML Google Sitemap extension

Legend:

- Enabled in [SEO Meta Tags](#) extension
- Disabled in [SEO Meta Tags](#) extension

To specify UUID for particular page, go to **Admin Panel** → **CMS** → **Pages** Select a page → go to **Meta Data** tab → **Hreflang UUID**
