

amasty

See the way the [Advanced Search for Magento 2](#) extension works.

Guide for Advanced Search for Magento 2

Let customers conveniently search Magento 2 products by names. Optimize quick search window according to users' needs and customize auto-complete popup display to make searching easy-to-follow.

- Enhance search results popup
- Add handy tabs to navigate the results
- Display popular and recent searches
- Customize search window design
- Show 'View All' link and 'Add to Cart' button
- Analyze customers' activity via Search Analytics dashboard

Configuration

To configure the extension settings, go to **Admin Panel** → **Stores** → **Configuration** → **Amasty Extensions** → **Advanced Search**.

General Settings

Expand the General tab.

General

Popup Width (px)
[store view]

Set the width of the autocomplete popup window. Recommended value for horizontal view is 900. To get vertical view please enter 700 and lower.

Search Field Width
[store view]

Choose 'Default' to keep the original size of search field during searching process.

Min Characters
[store view] Use system value

The number of characters that customers should type in to trigger the search process. The recommended value is 3 or higher.

Popup Width (px) - indicates the width of the autocomplete popup window to make it fit in with other page elements. The recommended value for the horizontal view is 900. To get a vertical view, please enter 700 and lower.

Search Field Width - Choose 'Default' to keep the original size of the search field during the searching process, or enable dynamic search field width (it will be based on a popup width).

Min Characters - specify the minimum number of characters that customers should type in to trigger the search process. By default, the number is three.

Enable Redirect from 404 to Search Results <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 2px;"><div style="background-color: #f0f0f0; padding: 2px;">Yes (302 Found) ▼</div><div style="padding: 2px;">No</div><div style="background-color: #0070c0; color: white; padding: 2px;">Yes (302 Found)</div><div style="padding: 2px;">Yes (301 Moved Permanently)</div></div> <p>If option is enabled, customer will be redirected to the store search results of the broken URL text instead of the '404 Not Found' page</p>
Custom URL Key for Default Search Results Page <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 2px;"><div style="background-color: #f0f0f0; padding: 2px;">Yes ▼</div></div> <p>URL will look 'search/yellow' instead of 'catalogsearch/results/q=yellow'.</p>
Search Result Page URL Key <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 2px;"><input type="text" value="search"/></div> <div style="margin-top: 5px;"><input type="checkbox"/> Use system value</div> <p>Please do not use 'catalogsearch' as URL Key value. If you use Varnish Cache then please add this custom URL Key to the exclusions. Please see the details here.</p>

Enable Redirect from 404 to Search Results - if the option is enabled, when navigating to a broken URL or a non-existing page, a customer will be redirected to the store search results page instead of the '404 Not Found' page.

Custom URL Key for Default Search Results Page - enable to set SEO-friendly short URLs. URL will look 'search/yellow' instead of 'catalogsearch/results/q=yellow'.

Search Results Page URL Key - specify the URL alias for the search results page. Please do not use 'catalogsearch' as a URL Key value.

Enable Tabs on the Search Result Page

[store view]

Set 'Yes' to display separate tabs on the Search result page for Category, CMS and Landing pages

Enable Indexation for Autocomplete Popup

[store view]

Set 'Yes' to speed up autocomplete popup performance. Please note, the reindex will take longer. This feature comes with [Amasty Elastic Search](#) extension only.

Show Related Search Queries in Search Results

[store view]

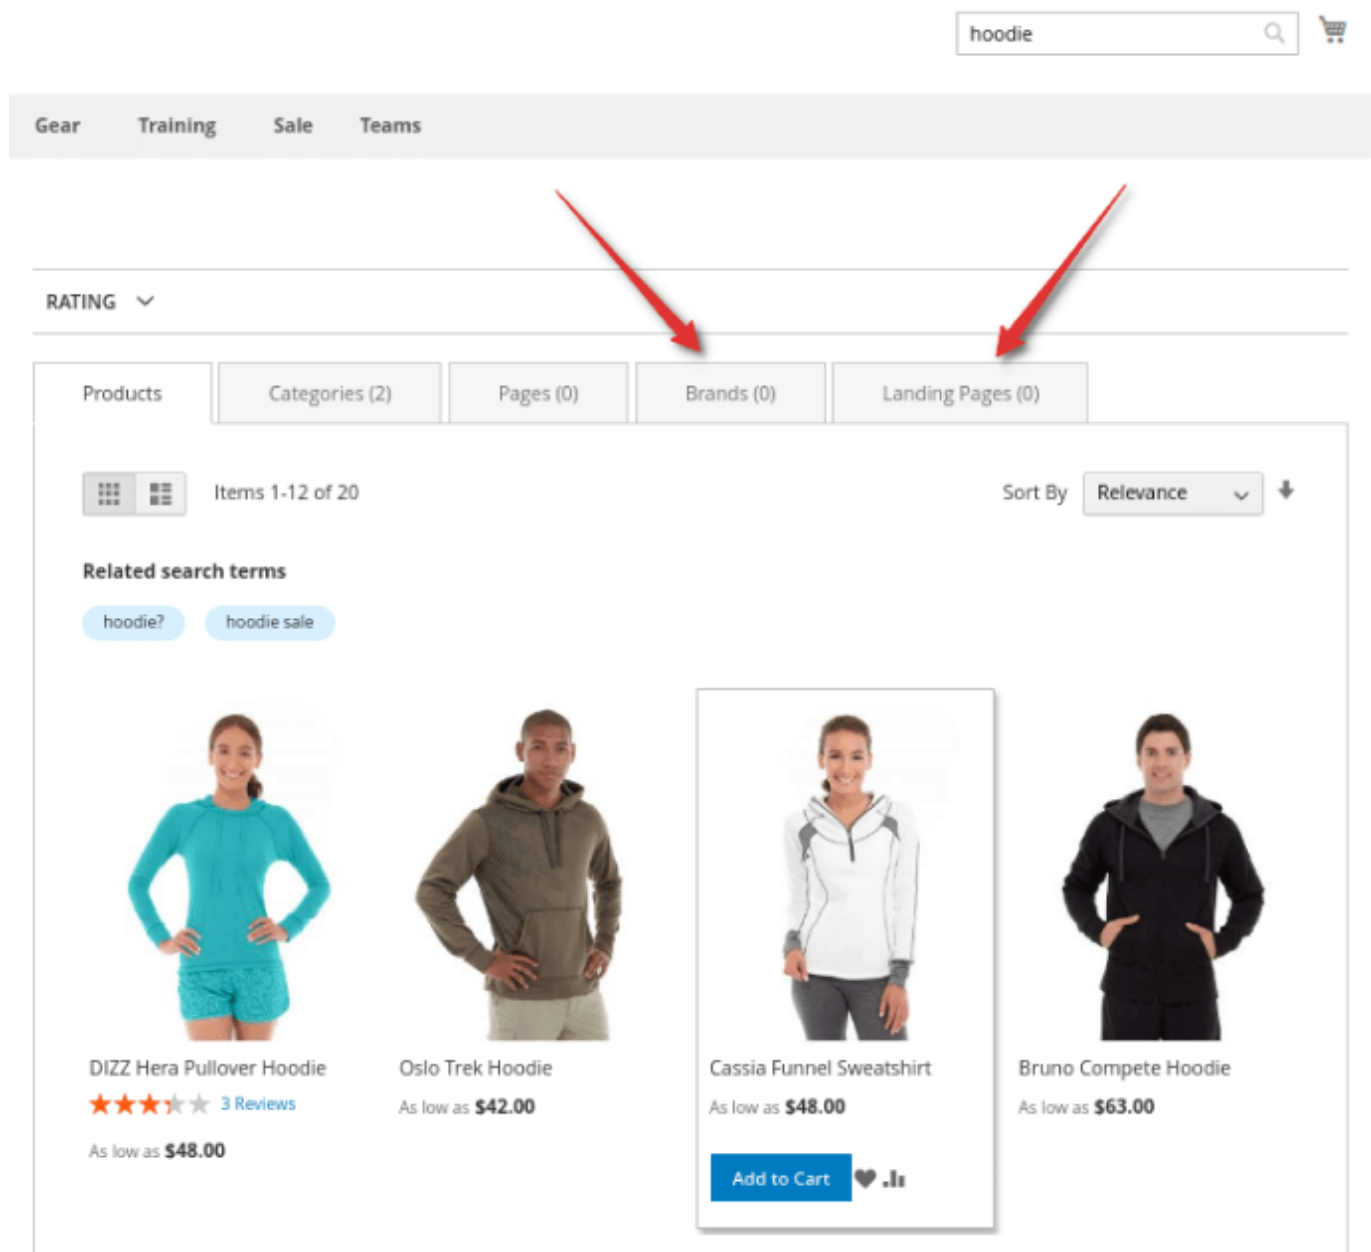

Yes, Show Always	▲
No, Disabled	
Yes, Show Always	
Yes, Show Only when search returns 0 results	

Show Related Search Queries Result Numbers

[store view]

Enable Tabs on the Search Result Page - set to 'Yes' to enable the tabs that sort search results by Category, CMS, and Landing on the search results page.

See on the image below how the tabs will look like if some other extensions by Amasty are also enabled. These two extra tabs on the image become available if the [Amasty Landing Pages for Magento 2](#) and Amasty [Improved Layered Navigation for Magento 2](#) are installed. Some other extensions will add other tabs.

Enable Indexation for Autocomplete popup - Set 'Yes' to speed up autocomplete popup performance. The autocomplete popup indexation also covers the products indexation. Please note, the reindex will take longer. This feature comes with Amasty Elastic Search extension only.

If you are using Varnish cache when utilizing the custom URL, than to reduce the system load you should include this URL into the Varnish cache exceptions. Please, go to **vendor/magento/module-page-cache/etc** and select the file with the **.vcl** extension (depending on your Varnish cache version) and find the following code:

```
if (req.url ~ "/checkout" || req.url ~ "/catalogsearch") {  
    return (pass);  
}
```

Here you need to add the custom URL to exceptions in the IF clause. For example, for the *search* URL the code will be the following:

```
if (req.url ~ "/checkout" || req.url ~ "/catalogsearch" || req.url ~ "/search") {  
    return (pass);  
}
```

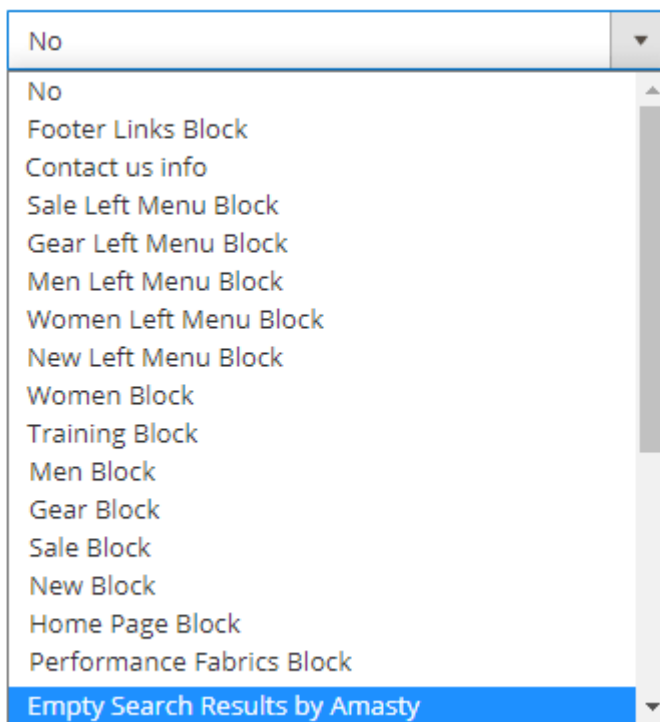

Show Related Queries in Search Results - adjust if the search should show to a customer the related search results. To learn how to assign related terms, please go to the [Related Search Terms](#) part of the guide.

- *No* - no related search items won't be displayed.
- *Yes, Show Always* - the related search items will be shown for any search request.
- *Yes, Show Only When Search Returns 0 Results* - if you don't have a perfect match for a specific request, the Advanced Search module will display related results to help the customer.

Show Related Search Queries Result Numbers - decide on the number of search results displayed for related requests.

Replace Empty Search Result Message with CMS Block - Choose 'No' from the dropdown if you want the zero search results page to remain empty. Or just pick up any CMS block from the list of your blocks to be displayed in case there are no search results matching the search term.

Replace Empty Search Result
Message with CMS Block
[store view]

See an example of how this option can be configured below:

What's New Women Men Gear Training Sale Teams

Home > Search results for: 'search term for no results'

Search results for: 'search term for no results'

Compare Products
You have no items to compare.

My Wish List
You have no items in your wish list.

owner@example.com

Search Attributes

You can include any available product attributes in the search algorithm. For each attribute, you can set a priority (*weight*).

Search Attributes

[global]

Attribute	Weight	Action
brand	7	
Color	10	
Description	5	
SKU	7	
<input type="button" value="Add"/>		

Click **Add** to create a new attribute. Use the bin icon in the **Action** column to delete attributes in one

click.

If there is a *color* attribute with *weight 10* and *description* attribute with *weight 5*, and the query is *red*, search results will be more visually relevant, because the algorithm will choose *color* attribute prior to the words in description.

You'll also see in results such configurable products that have simple ones with the relevant attribute (e.g. like the tee with the product option 'red color').

Q red

See our **Elastic Search** for Magento 2 extension that offers a flexible work with a search query and extensive configuration of product attributes.

Products

Expand this tab to configure products display in a popup window.

Products

Enabled <small>[store view]</small>	Yes	▼
Title <small>[store view]</small>	Products	
Position <small>[store view]</small>	1	
	This setting is ignored for the horizontal popup window.	
Max Results <small>[store view]</small>	4	
Name Length <small>[store view]</small>	50	
Short Description Length <small>[store view]</small>	100	
Show reviews <small>[store view]</small>	Yes	▼
Enable "Add to Cart" button <small>[store view]</small>	Yes	▼
Redirect to Product Page <small>[store view]</small>	Yes	▼
	When there is only one product in result	
Show "Out of Stock" Products Last <small>[store view]</small>	Yes	▼
	Push "Out of Stock" products to the end of the search query list. Show products which are available for purchase first.	

Enabled - set to 'Yes' to enable search in products and display search results in the autocomplete popup.

Title - customize the title for the products block.

Position - specify products block position in the popup. This setting is ignored for the horizontal popup window.

Max Results - set the max number of displayed results.

Name Length - indicate the max number of characters of a product name that will be displayed in a popup window.

Short Description Length - set the number of characters for a product short description to be shown in a search window.

Please note that if you are using the default extension settings, the short description display for a product will be enabled. If you want to disable it, please specify the '*Short Description Length*' as 0 (zero).

Show Reviews - enable reviews display in the autocomplete popup to help customers make the purchase decision much faster.

Enable 'Add to Cart' button - set to 'Yes' to show **Add to cart** button in the popup to let customers purchase necessary products right away.

Redirect to Product Page - enable this option to redirect in case there is only one search result available.

Show 'Out of Stock' Products Last - enable a feature to place the out-of-stock items last in the search results.

To make this feature works properly with out-of-stock items being displayed correctly, please make sure that out-of-stock items' visibility is enabled.

- Go to **Admin Panel** → **Stores** → **Configuration** → **Catalog** → **Inventory** → **Stock Options**.
- Navigate to a **Display Out of Stock Products** field → Uncheck **Use system value** and set to 'Yes'.

[Out-of-stock items displayed last in the search results, a sample.](#)

The screenshot shows a search popup with the query 'candy jumper'. On the left, there are 'RECENT SEARCHES' for 'Candy Jumper', 'Candy', 'Pack', and 'Backpack'. The main area is titled 'PRODUCTS' and displays three items:

- Dallas Mavericks Candy Cane Ugly Jumper**: Price \$99.00, 3 reviews (4.5 stars), 'Add to Cart' button.
- Portland Trail Blazers Candy Ugly Jumper**: Price \$74.00, 3 reviews (4.5 stars), 'Add to Cart' button.
- SACRAMENTO KINGS 2017 CANDY CANE UGLY JUMPER**: Price \$80.00, 2 reviews (4.5 stars), 'Out Of Stock' button.

Apply Relevance Rules to Autocomplete Popup Results [website]

If enabled, applicable relevance rules (created in Elastic Search module) will impact not only the search results page, but the search popup as well.

To use and configure Relevance Rules please install the Magento 2 [Elastic Search](#) extension first.

Apply Relevance Rules to Autocomplete Popup Results - Set 'Yes' to apply Relevance Rules to search autocomplete popup results.

Please note that if this setting is enabled, applicable relevance rules (created in Elastic Search module) will impact not only the search results page, but the search popup as well.

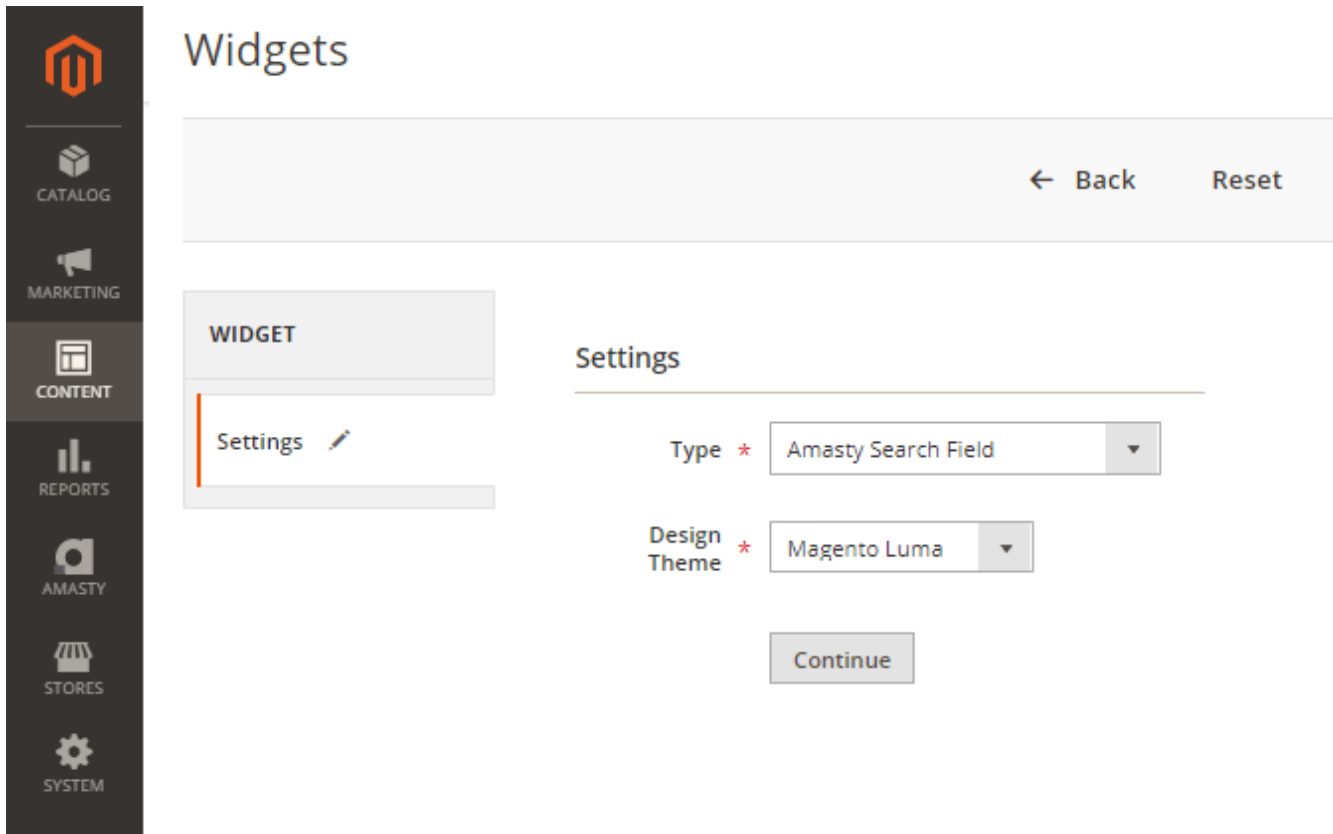

How to locate the search bar in other places than the default?

By default, the advanced search bar is located at the top right corner of the screen, near the shopping cart. But using widgets you can overcome Magento limitations and place the search bar anywhere you need all through the store, like on a *sidebar*, *in the footer*, *on the CMS pages*, and even in *Customer Account*.

There are **two ways** of how to configure some non-trivial location for the search bar:

1. configure the **widget** and specify '**Layout Updates**';
2. configure the **widget**, configure a **custom block** with it, and then use this block (for example, on a CMS page).

For using the first way, please navigate to *Content* → *Widgets* and click on the 'Add Widget' button. Choose the relevant theme to be applied for this widget and the widget type '**Amasty Search Field**'.

Specify widget title, needed store views, and the widget sort order.

Main Website Store

Default Store View

Store View 2

Sort Order
Sort Order of widget instances in the same container

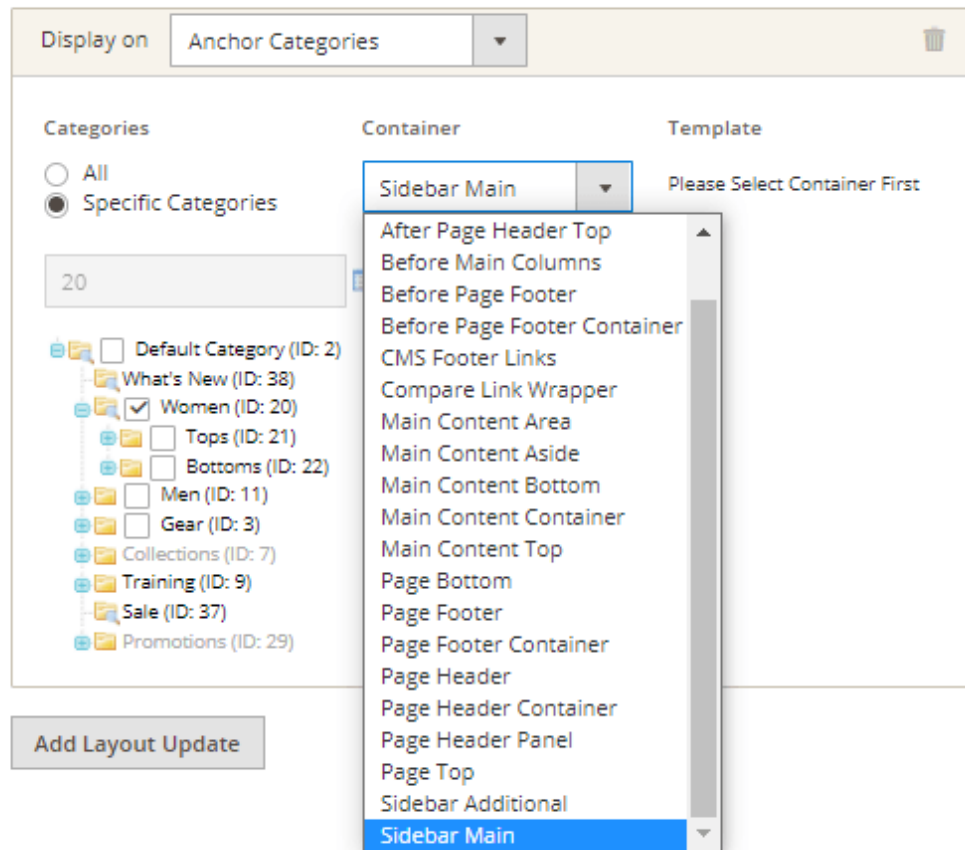

First, please choose if you want to embed your widget on **Categories** (anchor or non-anchor), **Products** (depending on the product type), or **Generic Pages**. Depending on that choice you'll see the available containers for that type of a store page.

As per products and categories you can choose whether to display the widget on **all store product/category pages** in bulk or **on the specific only**.

As per **Generic pages**, there's the choice from three options, depending on which you'll see the unique set of the available containers:

- All Pages;
- Specified Page;
- Page Layouts.

Layout Updates

When you're ready with all configurations, please refresh the page where you're expecting to see the widget and try flushing Magento Cache ('System → Cache Management → Flush Magento Cache') to see the result on the frontend immediately.

For the second way of locating the search bar anywhere else than the default please create the **'Amasty Search Field'** widget first and then please go to 'Content → Blocks' to integrate that widget on some of the existing blocks or for creating new.

Popular Searches

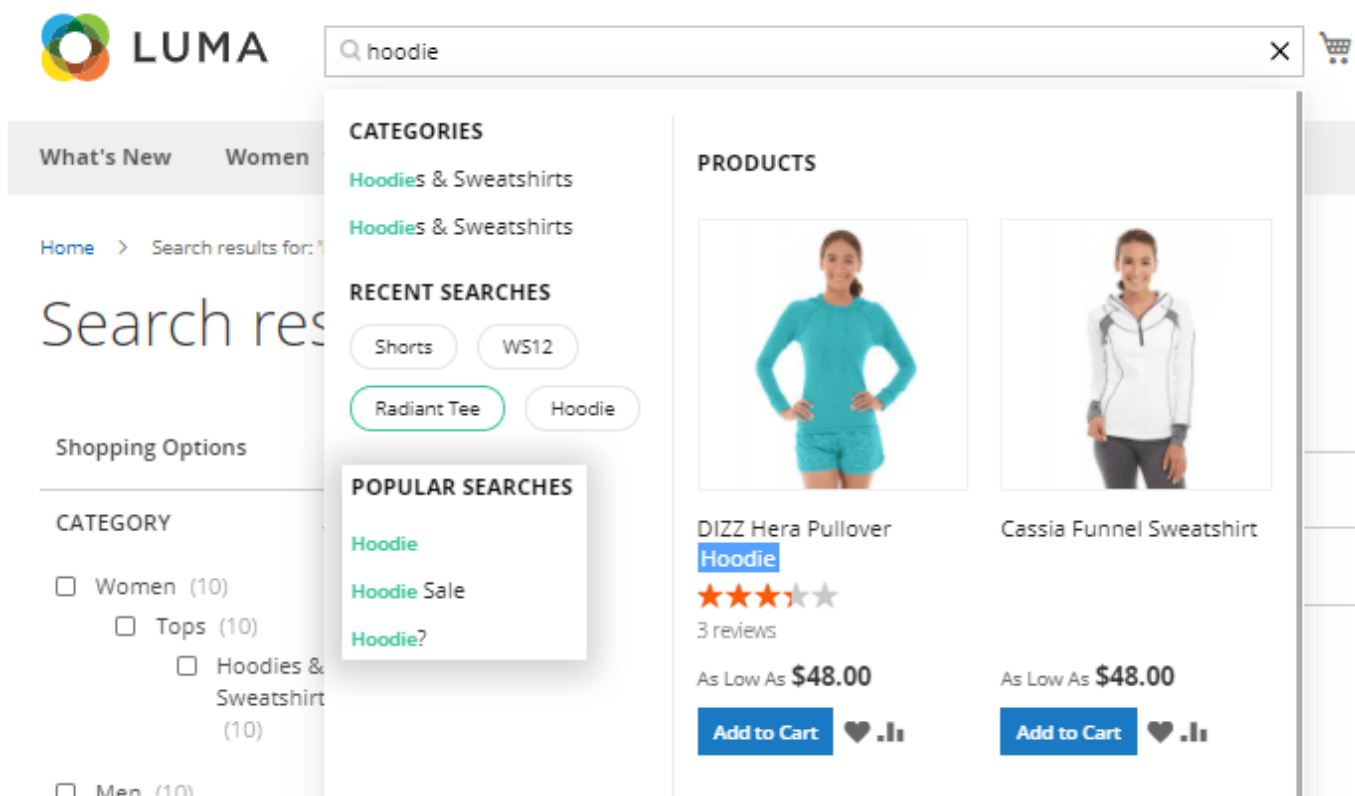

Popular Searches

Enabled [store view]	Yes
Show on First Click [store view]	Yes
Title [store view]	Popular Searches
Position [store view]	2
Max Results [store view]	4

Enabled - enable the display of the Popular Searches block.

Show on First Click - set the option to Yes to let customers see the Popular Searches block in the autocomplete popup once they click on the quick search field.

[A sample](#)

Title - specify the title of the block.

Position - set the position for the Popular searches block.

Max Results - set the maximal number of popular search results that will be displayed in the search autocomplete popup.

Browsing History

Browsing History

Enabled [store view]	Yes	▼
If enabled, logged in customers will see their latest search queries in the autocomplete popup.		
Show on First Click [store view]	Yes	▼
Title [store view]	Browsing History	
Position [store view]	6	
Max Results [store view]	4	

Enabled - Set this setting to 'Yes' to allow the logged-in customers to see their latest search queries in the autocomplete popup.

Please note that this option ('*Browsing History*' display) is available for the registered (logged-in) customers only.

Show on First Click - Set this option to 'Yes' to enable showing the '*Browsing History*' block at the first user's click in a popup.

Title - In this field, you can specify any custom title for the '*Browsing History*' block.

Position - In this field, you can specify the position (display order) of the '*Browsing History*' block within the search autocomplete popup.

Max Results - Here you can set the maximal number of results from the browsing history that will be visible in the popup. Or you can just use the system value which is 4 (four).

Please find below the samples of how the '*Browsing History*' block can look like on the frontend:

Analytical Dashboard

The Advanced Search extension allows to maximize profits by analyzing visitors' searching activity and the data gained.

To see the Search Analytics dashboards, go to **Admin Panel** → **Reports** → **Search Analytics**.

Search Analytics

demouser

Search Volume

Most Wanted Search Terms

Search Query	Total Searches	Users	Engagement
shorts	9	3	33%
Bag	5	1	0%
tee	5	2	0%
jacket	4	3	33%
pants	3	2	0%

Recent Activity (Search Volume)

Total Searches	Unique Searches	Users	Engagement	Date & Time
22	12	4	50%	11 February 2019
34	17	7	28%	08 February 2019

Here you can see the next values: total searches, unique searches, the number of users and users' engagement. The Engagement statistics includes the page jumps to Brands, Categories, Blog, CMS & Landing pages.

Easily check customers' demand in the **Most Wanted Search Terms** and **Recent Activity** blocks. The extension automatically records the activity of users on the front end and converts it into reports on the back end.

To see more details on Most Wanted Search Terms, go to **Admin Panel → Reports → Most Wanted**.

Please note that the *Engagement* metric is about the engagement with the autocomplete popup of the extension only, i.e. if shoppers click on the links in a popup, add products to cart etc. If they just type a search term and press 'Enter' without any extra popup engagement, then such action will not be counted in the engagement stats.

Related Search Terms

This extension lets store admins construct a seamless search flow with the related search terms. It is highly useful for customers, as it helps to navigate the store with relevant search suggestions.

Start by overseeing all search terms, that users created in the store by organically entering search requests in the autocomplete search window. To access it, please go to the **Admin Panel → Reports → Search Terms**.

Here, you can see how each search word performs. You can also export it in the CSV or Excel XML formats just in one click. Also, easily add new search terms or edit them.

Press on the required search term to modify it.

General Information

Search Query *

Store *

Number of results *
For the last time placed.

Number of Uses *

Redirect URL
ex. http://domain.com

[Reset Filter](#) 6 records found per page of 1

<input type="checkbox"/>	ID	Search Query	Results	Hits	Position
<input type="text" value="Any"/>	<input type="text"/>	<input type="text" value="d"/>	<input type="text"/>	<input type="text"/>	From <input type="text"/> To <input type="text"/>
<input checked="" type="checkbox"/>	68	deliver	5	1	0 <input type="text" value="0"/>
<input checked="" type="checkbox"/>	76	ddelivery	0	0	0 <input type="text" value="0"/>
<input type="checkbox"/>	13	hoodie	20	6	0 <input type="text" value="0"/>
<input checked="" type="checkbox"/>	66	delive	5	1	0 <input type="text" value="0"/>

Here, the admin can adjust the general information and assign related terms.

Search Query - enter the search request a user needs to type into the search field.

Store - assign the store view for a specific keyword.

Number of Results - it specifies, how many search results will be returned.

Number of Uses - this number signifies how many times visitors have requested this specific search query.

Redirect URL - enter the URL you want to redirect users to when clicking on search results.

Display in Suggested Terms - set to Yes to show this search word in the Related Terms list for other search requests.

In the **Related Terms** table you'll get a list of all search terms that are enabled for display in suggested terms. Mark the necessary ones that match your goal by ticking the checkmark. This way, it will be much easier for a customer to navigate your store even if they've misspelled the search requests. Also, it's a great opportunity for a store owner to promote relevant searches that might be interesting for a customer and therefore motivate them to purchase in your store.

Magento Commerce and the Multiple Wishlist extension compatibility

The Magento Commerce version of this extension provides some extra opportunities for the wishlist management in cooperation with the Magento 2 [Multiple Wishlist](#) extension.

Provide customers with the ability to choose the wishlist where to save the product, right from the autocomplete popup.

NOINDEX

To prevent search engines (Google, Bing, Yahoo, etc.) from needlessly indexing Magento catalog search results page(s) and advanced search results page(s) we added the code to app/design/frontend/YOUR_PACKAGE/YOUR_THEME/layout/local.xml.

- If this file does not yet exist in your custom theme you can create it and Magento will automatically include it.
- If this file already exists in your custom theme then copy everything except the first line XML declaration and elements into your copy of local.xml.

Reindex Categories

To reindex categories for correct search results, go to **System → Tools → Index Management**
