Storefront Properties

Type: Countdown by Amasty

Design Package/Theme: Magento Luma

Widget Title: 50% off on Proteus Fitness Jackshirt

Assign to Store Views: All Store Views, Main Website, Main Website Store, Default Store View

Sort Order: 0

Sort Order of widget instances in the same container

Type - the *Countdown by Amasty* type of a widget is set by default.

Design Package/Theme - choose the design theme of your webstore.

Widget Title - specify widget's title that will be displayed on the backend so that you can easily find it in the grid.

Assign to Store Views - select the store views to which the timer should be applied.

Sort Order - specify timer's position if there are several widgets in the same block. Here 0 is the first position.

In the **Layout Updates** block you can attach timers to any pages of your webstore.

Layout Updates

Display on <input type="text" value="All Product Types"/>			
Products <input checked="" type="radio"/> All <input type="radio"/> Specific Products	Container <input type="text" value="Product social links con"/>	Template Please Select Container First	

Display on <input type="text" value="Anchor Categories"/>			
Categories <input checked="" type="radio"/> All <input type="radio"/> Specific Categories	Container <input type="text" value="Main Content Top"/>	Template Please Select Container First	

Display on <input type="text" value="All Pages"/>			
Container <input type="text" value="Main Content Top"/>	Template Please Select Container First		

Display on - specify the *Categories, Products* or *Generic Pages* to add the widget to.

Container - select the suitable position for the timer.

If you add a widget to product or category pages, you can attach a timer to all products/categories or choose specific ones.

Widget Options

With the Countdown Timer extension you can schedule timers display according to your business needs.

WIDGET

Storefront Properties

Widget Options 

Widget Options

Start Time 
Countdown timer will be visible on storefront after this date and time. Applicable for scheduling your future promo actions.

End Time * 
Set the exact date and time when your promo ends - it will be used to determine when the count down timer should stop. The timer will vanish after this date and time from storefront automatically.

Before Countdown Text

HTML tags are supported.

After Countdown Text

HTML tags are supported.

Link

Start Time - set the day and time after which the timer will be visible on the frontend. You are able to apply it to your future actions.

End Time - set the exact date and time when your promo ends: it will be used to determine when the count down timer should stop. The timer will vanish after this date and time from the storefront automatically.

If the Start Time is not specified, the timer will appear as soon as you flush Magento cache.

Before Countdown Text - fill in a catchy text to draw customers' attention to your special offer.

After Countdown Text - provide customers with an encouraging message or some additional information about the offer.

Use HTML tags to customize the message if needed.

Link - fill in a link if you want the timer to be clickable.

Timer Design

Pick one of 6 ready-made countdown timer design templates and customize it to look catchy and

match your store design.

Timer Design - choose the design of the timer.

Timer Color - set the necessary color to fit your website design using a handy color picker tool.

You can use the following designs:

Clear

Timer Design ▼

Timer Color

#fff47d

A color picker tool interface. It features a large square color field on the left showing a yellow-to-black gradient. To its right is a vertical color spectrum bar. Further right are several input fields for color values: R (255), G (244), B (125), H (54.9230), S (50.9803), and a hex code field containing #fff47d. There are also small color swatches and a color wheel icon.

See how the design will be displayed on the frontend:

Timer Design ▼

Timer Color

A color picker tool with a large red gradient square on the left, a vertical rainbow color bar in the center, and a control panel on the right. The control panel includes RGB (R: 237, G: 12, B: 12) and HSB (H: 360, S: 95, B: 93) sliders, a hex code input field with '#ed0c0c', and a small color wheel icon.

Limited offer: 50% off!

Progress Bar

Timer Design ▼

Timer Color

A color picker interface showing a large blue gradient square on the left. To its right is a vertical color bar with a rainbow gradient. Further right are two small color swatches, one blue and one white. Below these are input fields for color values: R (50), G (0), B (250), H (252), S (100), and B (98). At the bottom, there is a field for the hex code '# 3200fa' and a small color wheel icon.

Limited offer: 20% off on all the jackets

28 days 8 hours 6 min 5 sec

When the design is customized, **Save** the configuration.

To make the timer visible, you need to *Flush Magento Cache* in the **System → Cache Management** section.

Timer on a CMS page

Countdown Timer extension also allows to place a widget in any block of any CMS page. To add a timer, please go to **Content → Pages** and choose a CMS page you need.

In the **Content** block click *Show/Hide Editor*. Then press the **Insert Widget** button.
