For more details see how the [Custom Button](#) extension works.

Guide for Magento 2 Custom Button

Wrap links in customizable buttons to smoothly embed them into your website. Proactively interact with your site visitors by simple yet efficient UX enhancement.

- Create custom buttons of any color and size
- Locate buttons on any page of your store
- Specify custom text for your buttons according to your business needs
- Set up catchy animation on hover to motivate more clicks
- Redirect shoppers to any page by linking buttons with specific URLs

Configure Default Color Scheme

With the Magento 2 Custom Button extension, you can configure default color schemes for two types of buttons: Primary and Secondary. Please navigate to **Stores → Configuration → Amasty Extensions → Custom Button**:

Default Color Scheme

Primary Button

Text Color <small>[store view]</small>	#fff
Hover Text Color <small>[store view]</small>	#1d43be
Background Color <small>[store view]</small>	#2f5bea
Hover Color <small>[store view]</small>	#8ea9ff
Border Color <small>[store view]</small>	#2f5bea

Secondary Button

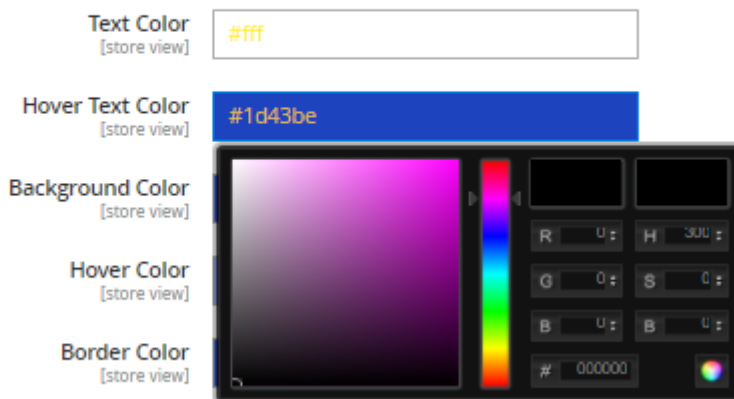

Text Color <small>[store view]</small>	#2f5bea
Hover Text Color <small>[store view]</small>	#1d43be
Background Color <small>[store view]</small>	#fff
Hover Color <small>[store view]</small>	#e0e7ff
Border Color <small>[store view]</small>	#1d43be

For both types of buttons, you can set:

- Text Color
- Hover Text Color
- Background Color
- Hover Color
- Border Color

You can fill in the needed color manually or use a color picker for more convenience.

Primary Button

The default color schemes can be edited for particular Store Views.

Create Custom Button via Widget

You can add a custom button to your webstore pages and adjust its settings for particular purposes via Widget. Please, proceed to **Content → Widgets**:

you can find and copy HEX codes of required

Text - add the text that will be visible on your custom button.

Hover Text - here you can add the text, that will appear on your button on hover. Leave it empty if you don't need to change the text on hover.

Hover Animation - choose one of the four available types of animation for your custom button: Circle Overlap, Position Aware, Collision, Border Race. Choose 'None' if you don't need animation on the button.

Text Font Size, px - fill in the font size for the button text.

Target URL - add the link to redirect customers to the particular page from the button.

Target URL Type - specify whether to open the target page in the same window or in the new one.

Style - here you can choose one of the two default button color schemes, configured previously (Primary or Secondary) or you can set a custom color scheme for your button. In such a case you should fill in the needed color values in the following fields. You may find and copy HEX codes of required colors from [here](#).

Text Color	<input type="text" value="#fafcfb"/>
Hover Text Color	<input type="text" value="#fcf386"/>
Background Color	<input type="text" value="#148508"/>
Hover Color	<input type="text" value="#17b007"/>
Border Color	<input type="text" value="#17a004"/>
Button Alignment	<input type="button" value="Center"/> ▼ <input type="button" value="Center"/> <input type="button" value="Left"/> <input type="button" value="Right"/>
Border	<input type="button" value="Yes"/> ▼

Button Alignment - specify the way of alignment of the button (left, right, center).

Border - set to 'Yes' to display the button with the border.

Border Width, px

Border Radius, px
The setting is not applied in combination with 'Border Race' hover animation effect.

- Retailer

Hide on

- Desktop
- Tablet
- Mobile

Border Width, px - here you can adjust the border width.

Border Radius, px - in this field you can adjust the button corners rounding. Note, that this setting is not applied in combination with 'Border Race' hover animation effect.

Padding - here you can set the height and the width of your custom button.

Margin - this setting allows for adjusting the indents around your button.

Disable for Customer Groups - with the extension you can also configure for which customer groups your custom button will be visible.

Hide on - also you can specify the types of devices (desktop, tablet, mobile) for which the button will be hidden.

You can also add a custom button via the '**Insert Widget**' functionality when editing the content of any page or block.
