For more details see how the [Extended Product Grid with Editor for Magento 2](#) extension works.

Guide for Extended Product Grid with Editor for Magento 2

Get the advanced product grid in your Magento 2 store: add columns, edit data right in the cells, and even manage the product inventory in one handy extension. Moreover, you can create templates to save the desired grid layouts and switch between them according to your needs. Also, the module provides flexible settings to utilize its potential in the most convenient way.

- Edit product data right on the grid
- Activate additional product attributes
- Add product grid templates
- Manage product inventory by adding or deducting items
- Customize filters to easily find information
- Compatibility with Magento Enterprise splitted databases

Please, mind that all the changes made from the grid are applied to the selected store view only.

General Settings

To configure general extension settings please go to **Stores → Configuration → Product Grid**

In the General Settings section you will find three options to configure. They are:

- Editing Mode;
- Additional Grid Columns;
- Quantity Based Availability.

Now, let's find out their functionality and choose mass action to add to Magento 2 product grid.

Editing Mode

Editing Settings

Editing Mode [global]

Multi Cell	▼
Single Cell	
Multi Cell	

Editing Mode — allows you to choose how you will edit the product grid:

- **Single Cell** — saves your modifications for each cell independently;
- **Multi Cell** — lets you configure multiple cells and then save them in a bulk.

Additional Grid Columns Settings

Additional Grid Columns Settings

⊖ Related products, Up-sells, Cross-sells Columns

Products Qty
[global]

Specify the number of related, cross-sell, and up-sell products to display on the grid's cell

⊖ 'Qty Sold' Column

'Qty Sold' Date From
[global]

Specify the time period to display the number of orders in the 'Qty Sold' field.

'Qty Sold' Date To
[global]

Specify the time period to display the number of orders in the 'Qty Sold' field.

'Qty Sold' Order Statuses
[global]

-- Please Select --

- Pending
- Processing
- Suspected Fraud
- Complete**
- Closed
- Canceled
- On Hold

Define order statuses that should be included in the 'Qty Sold' field.

Related products, Up-sells, Cross-sells Columns

Products Qty — specify the number of related products, up-sells, cross-sells to be displayed on the grid.

'Qty Sold' Column

'Qty Sold' Date From — specify the date to count the 'Qty Sold' from.

'Qty Sold' Date To — specify the date to count the 'Qty Sold' to.

'Qty Sold' Order Statuses — select order statuses to include orders in the 'Qty Sold' column.

Quantity Based Availability

Quantity Based Availability

Quantity Based Availability [global]	<input type="text" value="Yes"/>
<p>When set to yes, availability will automatically change to 'In stock' when quantity is positive and to 'Out of stock' when quantity is zero or negative. When set to 'No', availability status will not be updated automatically.</p>	
Show Quantity as Integer [global]	<input type="text" value="Yes"/>

Quantity Based Availability — when set to 'Yes', availability will automatically change to 'In stock' when quantity is positive and to 'Out of stock' when quantity is zero or negative. When set to 'No', availability status will not be updated automatically.

Show Quantity as Integer - select the necessary quantity display.

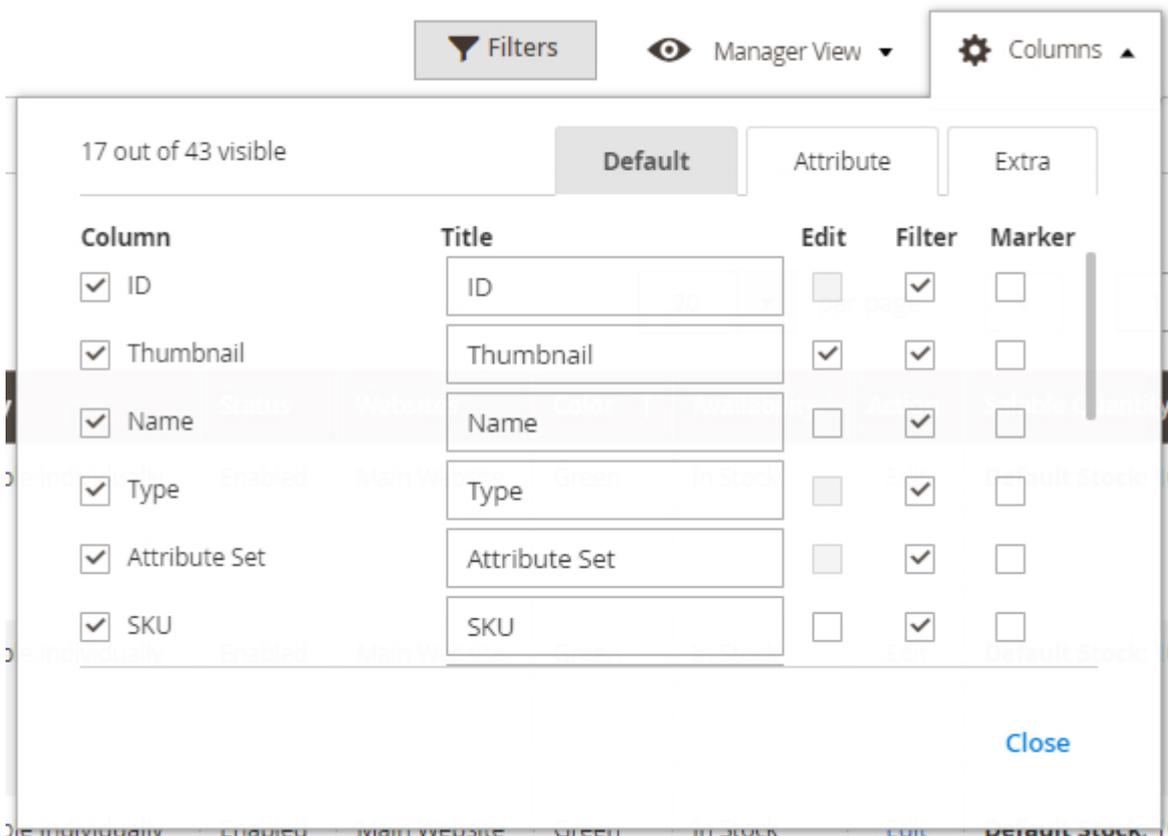

After configuring the extension's general settings we can proceed to the product grid.

Custom Columns Selection

Navigate to your product grid that is located in **Products → Catalog**. From here you can add columns to Magento 2 product grid for further usage.

- Click the **Columns** button to open the dropdown menu and configure columns;

- Select the **Default** tab;
- Tick the default columns that should be displayed;
- **Mark** them with a color to make it noticeable.

In the **Default** group you can show/hide the following columns: **ID, Thumbnail, Name, Type, Attribute Set, SKU, Price, Quantity, Special Price, Visibility, Status, Websites, Cost, Salable Quantity, Action.**

Now you can add/update product images and product videos right from the grid. Enable editing of the **Thumbnail** column and then just click the icon in the grid and then, in a modal window, choose the thumbnail from the existing product images or upload a new one.

Upload Images and Videos for "Jade Yoga Jacket-M-Green" ✕

[Save](#)

[Add Video](#)

1274x1580 px, 119 KB
[Base](#) [Small](#)
[Thumbnail](#)

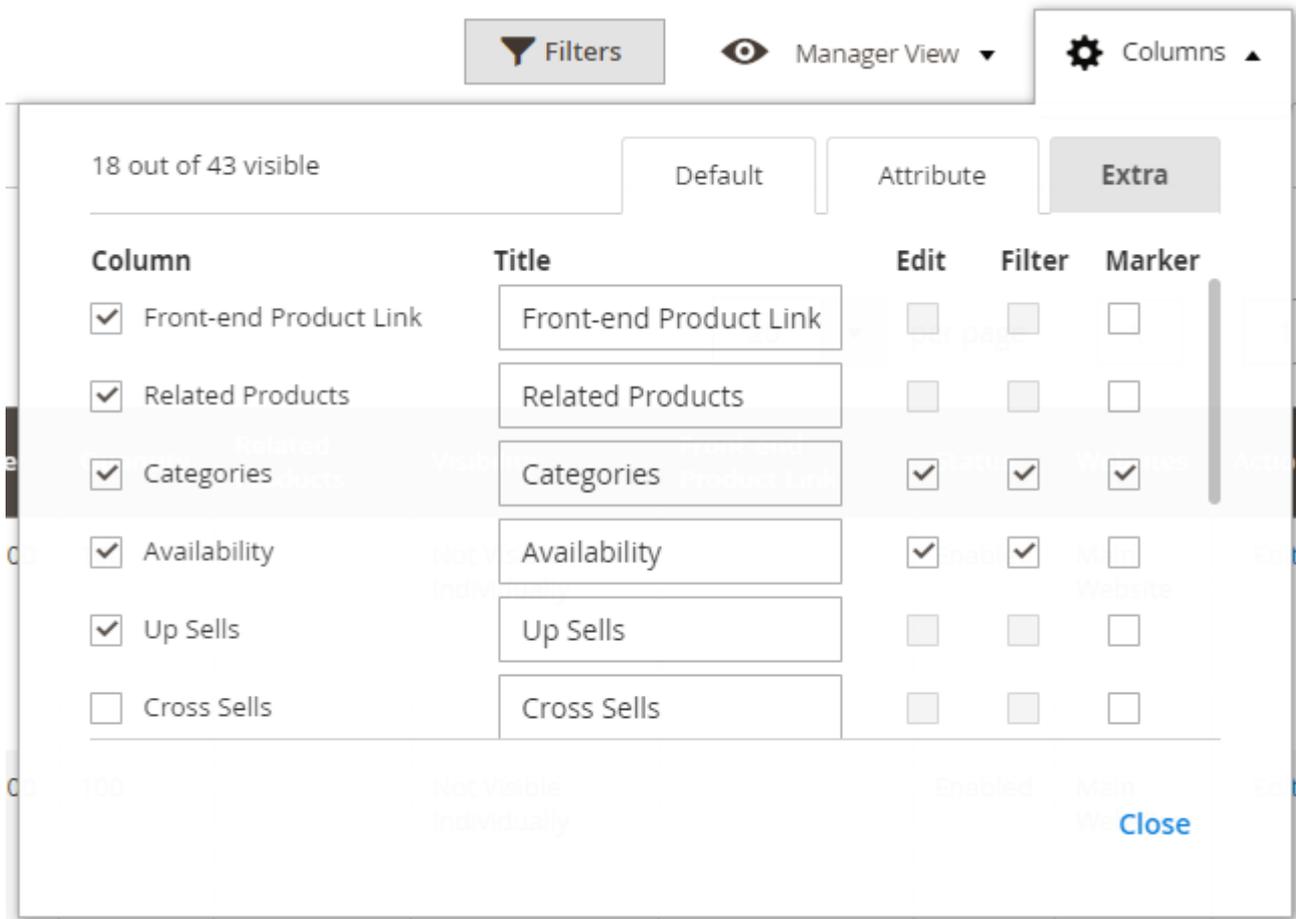

1080x1340 px, 141 KB

1274x1580 px, 90 KB

Browse to find or drag image here

Moreover, you can add custom columns to the product grid.

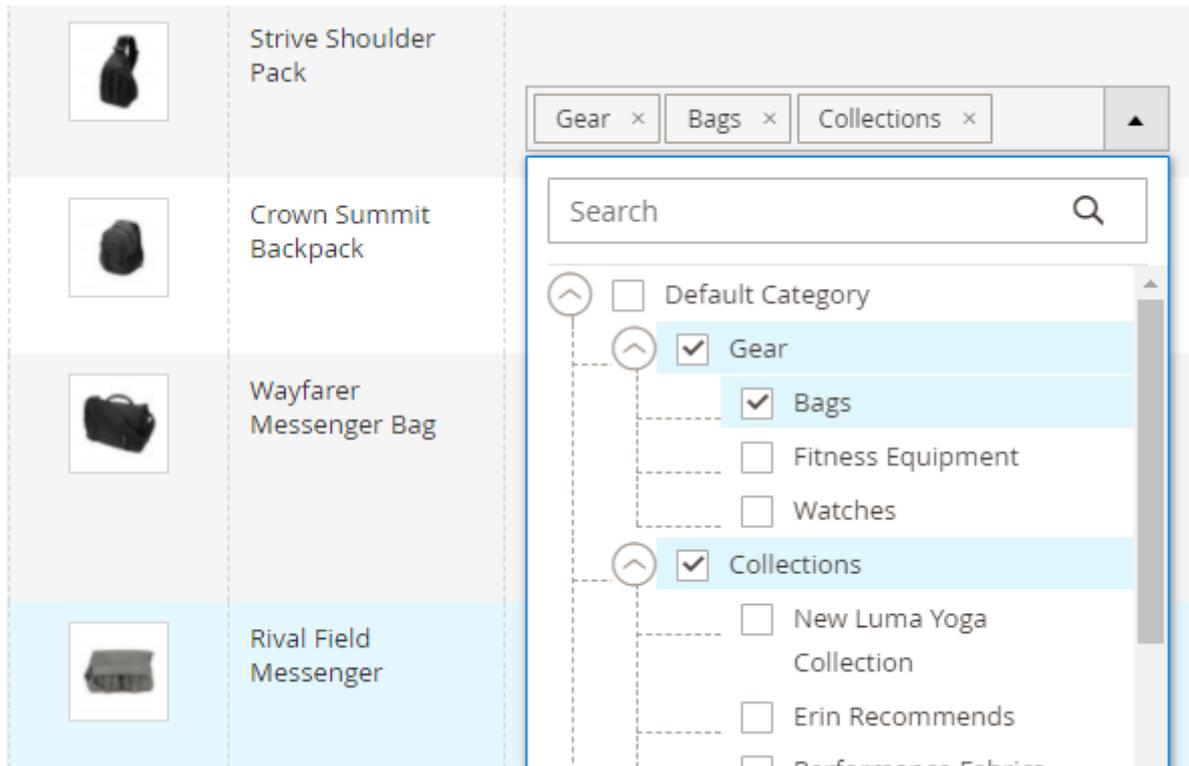

- Select the **Extra** tab;
- Tick the columns that you want to display.

The **Extra** group includes: **Categories, Tier Price, Availability, Creation Date, Last Modified Date, Related Products, Qty Sold, Front-end Product Link, Up Sells, Cross Sells, Low Stock, Backorders.**

Also, in this dropdown menu you can make columns editable right from the grid. Tick columns under the **Edit** text. Hit the **Save** button to proceed.

Now you can easily update and assign the categories of the products right from the grid. Just click on the category of any needed product in the grid and tick required checkboxes in a dropdown

Keep in mind, that a **Categories** column is *non-sortable*.

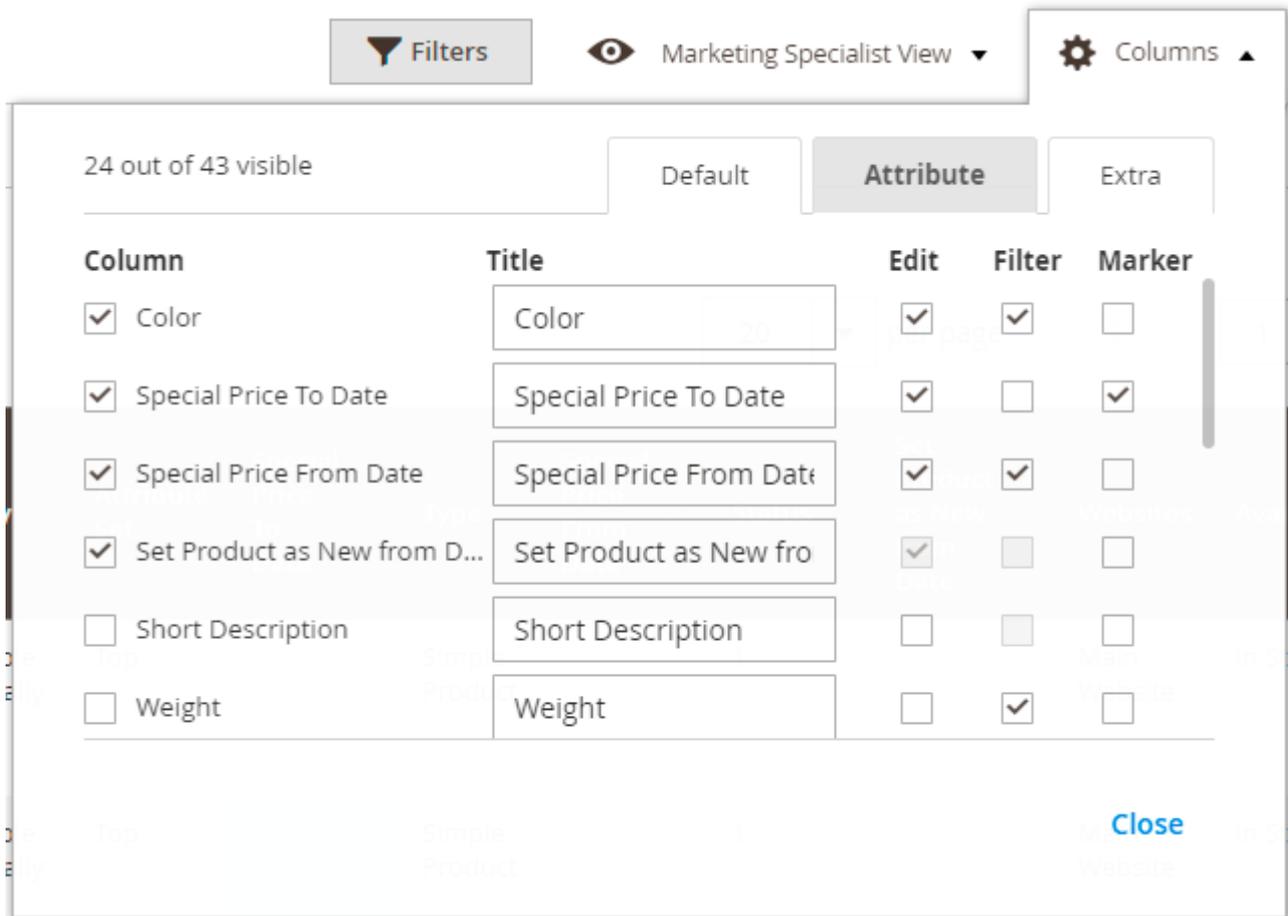

Editable columns will be marked with the special icon with a notepad.

You can drag-and-drop columns by holding their titles with a pointer and moving them left or right.

Additional Product Attributes

With the module, you can add extra product attributes to the grid.

- Click the **Columns** button to open the dropdown menu and configure columns;
- Select the **Attribute** tab;
- Tick attributes that should be displayed.

It is possible to enable the following columns: **Special Price From Date, Special Price To Date, Short Description, Weight, Manufacturer, Meta Title, Meta Keywords, Meta Description, Color, Set Product as New from Date, Set Product as New to Date, Country of Manufacture, New Layout, Allow Gift Message, Tax Class, URL Key.**

In the same dropdown menu you can tick columns and attributes to be available for filters. Flag them under the **Filter** text. Hit the **Save** button to proceed.

Moreover, you can make any product attribute accessible from the **Attribute** tab of the **Columns** menu.

Add to Column Options ▼

Select "Yes" to add this attribute to the list of column options in the product grid.

Use in Filter Options ▼

Select "Yes" to add this attribute to the list of filter options in the product grid.

Please go to **Stores → Product** and choose an attribute you want to add to the grid. Then, in the **Properties** tab expand the **Advanced Attribute Properties** section. Here you need to enable the **Add to Column** option. Also, to make an attribute available for filtering enable the **Use in Filter**

option.

After the grid is configured, it is displayed like this:

Products 🔍 demouser ▾

[Add Product](#) ▾

[Filters](#) | [mygrid](#) ▾ | [Columns](#) ▾ | [Export](#) ▾

Cancel Apply Filters

Using filters, you can find products from particular category or items that are not assigned to any. Also, it is possible to sort products by the image, e.g. you can find the ones without thumbnails.

Creating and Managing Templates

When you finished configuring the grid's columns, product attributes, and filters, you can save the current stat of the grid as a template.

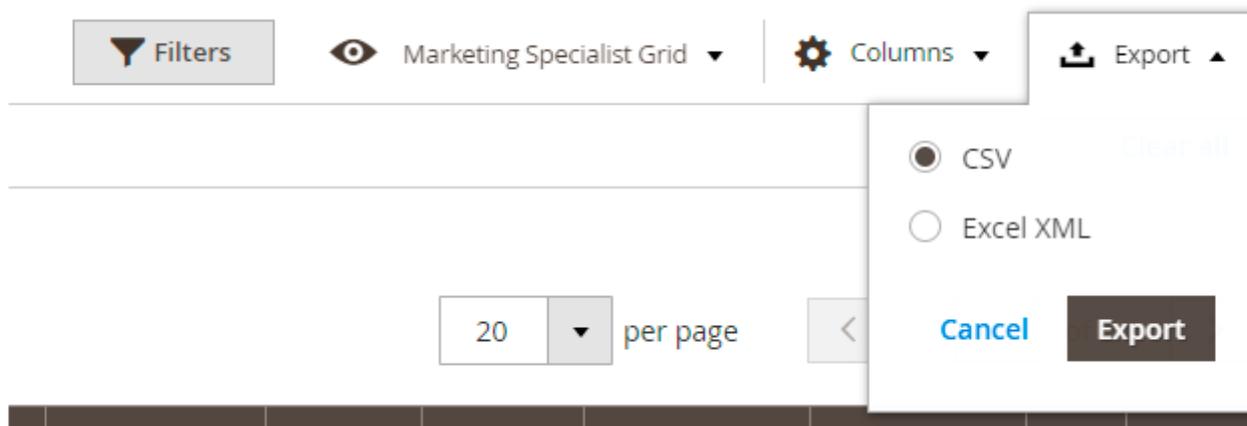

- Hit the **Default** View button;
- Choose the **Save View As** option to create a template;
- Then, you can switch between the created templates from this menu.

You may also export data placed on the particular grid view using a separate tab.

Allowed formats:

- CSV
- Excel XML

Editing Product Information on the Grid

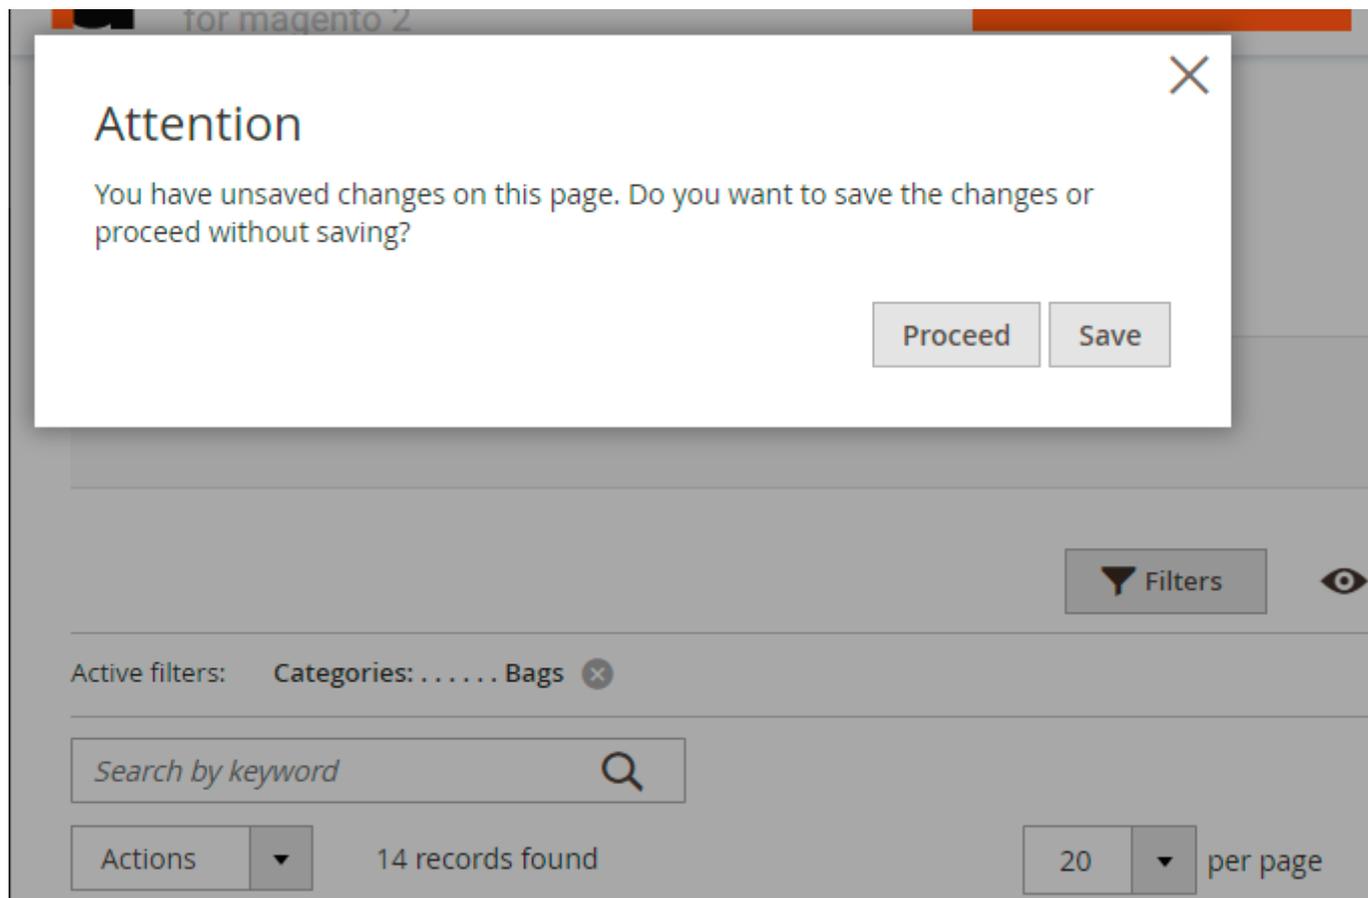

Using the Extended Product Grid with Editor for Magento 2 extension you can modify products data right on the grid. See previous steps to make columns editable.

You can edit data in columns that are marked with a special symbol. Just click the required cell to edit data. Make changes in all cells and hit the **Save Edits** button to apply changes. Note, that the module verifies the data you filled in. Data in the unsuitable formats will not be saved and you will be notified and asked to fill the field in correctly.

<input type="checkbox"/>	ID	Thumbnail	Name <input checked="" type="checkbox"/>	Price <input checked="" type="checkbox"/>	Quantity <input checked="" type="checkbox"/>	Color <input checked="" type="checkbox"/>
<input type="checkbox"/>	1		<input type="text" value="Joust Duffle Bag"/>	\$34.00	<input type="text" value="0"/>	<input type="text" value="Black"/>
<input type="checkbox"/>	3		Crown Summit Backpack	<input type="text" value="\$38.00"/>	100	Black
<input type="checkbox"/>	4		Wayfarer Messenger Bag	\$45.00	97	Black

When you use the 'Single cell' editing mode please click any spot outside the field to save the data.

If you forget to save changes and continue catalog management, the extension will display a reminder popup to prevent data loss.

Quantity Management

You are able to modify product quantity on the grid:

- Make the 'Quantity' column editable;
- Specify the necessary quantity;
- Alternatively, you can add or deduct product quantity (e.g. you can write "+100" or "-100" and the extension will make calculations automatically after you click the 'Save' button);
- Save changes.

<input type="checkbox"/>	ID	Thumbnail	Name	Price	Quantity
<input type="checkbox"/>	1		Joust Duffle Bag	\$34.00	45+25
<input type="checkbox"/>	3		Crown Summit Backpack	\$38.00	100+150
<input type="checkbox"/>	4		Wayfarer Messenger Bag	\$45.00	97-12

Bulk Update Use Case

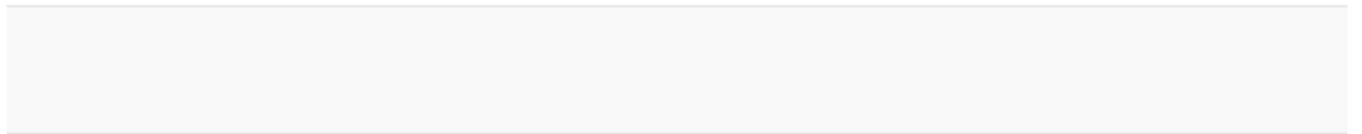

Modify any product info in bulk using [Mass Product Actions](#). The combination of two extension will help you to find the necessary products and update them in a split second.

How it works:

For example, you want to add +10\$ to the prices for all red women blouses in your store (prices are different for blouses, but anyway you want to rice each price by 10\$). Let's see how you can do it:

Step 1. Configure the necessary grid view and activate filters. In our case, we need category, attribute set and color filters.

Products

Manager View ▾
 Columns ▾

Active filters: Categories: Women, Tops, Jackets, Hoodies & Sweatshirts, Tees, Bras & Tanks ✕ Attribute Set: Top ✕
Color: Red ✕

▾
 88 records found

Step 2. Tick all or select the products that you need.

Step 3. Expand the Actions dropdown and apply 'Update Price'. Add +10\$ to the each blouse price.

Step 4. Check the result!

Find out more about about the available actions [in this guide](#).

Frontend Product Links

The extension allows you to add quick product frontend links to check all the changes right in the store and product pages.

To add frontend links do the following:

- Click the **Columns** button;
- Navigate to the **Extra** tab;
- Flag the **Front End Product Link** column.

Filters Marketing Specialist Grid Columns

14 out of 43 visible

Default Attribute **Extra**

Column	Title	Edit	Filter	Marker
