

amasty

For more details see how the [Gift Card for Magento 2](#) extension works.

Guide for Gift Card for Magento 2

Enable customers to buy gift cards and send them to friends via email or by post. Create an unlimited number of gift cards with different pricing models and easily keep track of all purchased certificates.

- Create gift cards with fixed or open amount price types
- Easily generate and upload gift codes
- Send gift certificates via email or post office
- Keep track of all purchased gift cards
- Offer stunning gift card templates
- API support
- GraphQL compatibility

The module easily solves the gifting dilemma by offering specially designed gift certificates which can be sent to recipients via email or by post. Once the certificate is purchased, a unique code with a custom greeting message will be sent to the addressee. The module lets admin users create gift card products with different pricing types, use predefined card images or upload their own ones and helps them to keep track of all purchased gift certificates.

How do gift cards work?

- Gift card is an alphanumeric code, consisting of letters and numbers, like BIRTHDAY_DF627. It can be applied at the cart/checkout to cover the order total
- These codes are grouped in code pools: Birthday cards, Christmas cards, etc. You can name them as you want. Before selling gift cards, you need to create a code pool for your campaign
- In the catalog, gift card is represented as a custom product type. A customer can buy this product and get the code. You can allow customers to use gift cards they bought for themselves
- Gift card is always linked to the code pool. Code pool should be generated first, then a product is linked to the pool
- A gift card code becomes activated after the order invoiced only. If the order is not paid, a customer will not be able to apply a gift card
- To track the balance of a particular voucher, Gift Code Accounts are issued. The store manager can adjust the balance manually

How do I ship my gift cards?

- Gift Card as a product in your catalog may be virtual, printed or combined
- A virtual gift card is just an email-sent code like virtual and downloadable products, it has no weight, there is no physical inventory and it cannot be shipped
- When gift card is printed or combined, it means the code is being printed on a sheet of paper and delivered. The delivery flow is standard like for simple products
- Amasty Gift Card does not cover printing issues, we offer only tracking tools

General Settings

To configure general extension settings please go to **Stores** → **Configuration** → **Gift Card**.

General

Enabled <small>[store view]</small>	Yes
Product Types, Which Can Be Bought with Gift Card <small>[store view]</small>	<ul style="list-style-type: none">Simple ProductVirtual ProductBundle ProductDownloadable ProductConfigurable ProductGrouped ProductGift Card by Amasty
Use a Gift Card to Pay for Shipping <small>[store view]</small>	Yes
Use a Gift Card to Pay for Tax <small>[store view]</small>	Yes
Use a Gift Card to Pay for Amasty Extra Fee <small>[store view]</small>	Yes
Allow Refund for Orders Paid with Gift Card <small>[store view]</small>	Yes 

Enabled - set the option to Yes to run the extension.

Product Types, Which Can Be Bought with Gift Card - specify product types which customers will be able to purchase using a gift card.

Use a Gift Card to Pay for Shipping - select Yes, to pay for a shipment with your giftcard. I.e. a gift card can cover both a purchase and a shipping.

Use a Gift Card to Pay for Tax - enable the setting to allow customers to pay for tax with a gift

card. This means, that a customer will be able to pay both for products and taxes with a gift card.

Use a Gift Card to Pay for Amasty Extra Fee - set to Yes to let customers cover extra fees added by **Amasty Extra Fee** extension with gift cards.

Allow Refund for Orders Paid with Gift Card - if you enable this option, the sum paid with gift cards will be refunded to gift card amounts.

How it works:

Customers can pay for orders with gift cards. If they want to refund orders later, they may also want to get the wasted gift card balance back. In such cases, the extension does the following:

- the amount will be refunded to the gift card balance
- if the gift card is already in a “used” or “inactive” status, it will become “active” again
- if the gift card account was deleted, a new account will be created instead after the credit memo creation
- if the order was paid with several gift cards, the amount will be refunded to each of the account according to the spent sum
- if the gift card has the “expired” status, admin won't be able to refund to this card: in this case, you can turn off the '*Allow Refund for Orders Paid with Gift Card*' option and refund as usual
- admin can specify the required refund details in the credit memo email to notify customers

Allow Users to Upload Own Images for Gift Card [store view]

Tooltip Message for Users [store view]

Gift Card Fields - Specify the fields a customer should fill in when purchasing a gift card.

When disabling certain fields by adjusting corresponding settings in the Gift Card Extension Configuration, do not forget to update your templates for gift card related emails. Otherwise, those unnecessary variables will be included in the body of the sent message and it may cause inconvenience.

Show Gift Card Options in Mini Cart And Checkout - Enable the option to show the gift card options on the cart page.

Timezones for User Choosing - Define the timezones a user can choose on the frontend. The option is connected with the delivery date setting. A user can define the date a gift card should be sent and, also, choose the timezone of a recipient.

Allow Users to Upload Own Images for Gift Card - Set to **Yes** to enable users to upload their own images for gift cards (in png, jpg, gif formats).

Tooltip Message for Users - Specify the message to inform customers upon certain restrictions when uploading their own images for gift cards.

Here's how customers will see the tooltip:

Gift Card Options

Gift Card Options

Lifetime (days) <small>[store view]</small>	<input type="text" value="0"/>	When set to 0 (zero), certificate will have unlimited lifetime.
Assign Gift Card to Customer Account <small>[store view]</small>	<input type="text" value="Yes"/>	
Allow Customers to Use Gift Cards They Bought for Themselves <small>[store view]</small>	<input type="text" value="Yes"/>	
Notify Customers Before Certificate Expires <small>[store view]</small>	<input type="text" value="Yes"/>	Notifications are available only for purchased gift cards.
Number of Days Before Expiry <small>[store view]</small>	<input type="text" value="5"/>	When set to 0 (zero), the notification is sent once the certificate expires.
Notify Customers of Balance Update <small>[store view]</small>	<input type="text" value="No"/>	

Lifetime (days) - Specify the number of days during which the gift card will be valid. When set to 0 (zero), certificate will have unlimited lifetime.

Assign Gift Card to Customer Account — enable the option to assign gift cards to customer accounts to improve fraud protection. If enabled, customers need to bind Gift Card Codes with their accounts to use them on checkout or in the cart. Otherwise, they will get the notification 'Please add this Gift Card Code to your customer account to proceed' and won't be able to apply the gift code.

Allow Customers to Use Gift Cards They Bought for Themselves - Enable the option to let customers buy gift card without sending them to other recipient.

Notify Customers Before Certificate Expires - Set the option to 'yes' to enable notifications dispatch when the certificate lifetime expires. Notifications are available only for purchased gift cards.

Number of Days Before Expiry - specify when email reminders should be sent. When set to 0 (zero), the notification is sent once the certificate expires.

Email Options

Email Options

Email Sender <small>[store view]</small>	General Contact	▼
Email Template <small>[store view]</small>	[Gift Card] Send gift card (Defi	▼

Amasty Gift Card Code Status Check Widget

You can also add a widget so that customers could check their balance on any page. See the frontend sample on a product page:

The image shows a product page for a 'Luma Analog Watch'. On the left is a vertical image of a silver-toned metal link watch with a white dial and black numerals. To the right of the image, the product title 'Luma Analog Watch' is displayed in a large font. Below the title are five stars (four orange, one grey) and the text '2 Reviews' and 'Add Your Review'. The price '\$43.00' is shown in a large, bold font. To the right of the price, it says 'IN STOCK' and 'SKU#: 24-WG09'. Below the price is a 'Qty' section with a small input box containing the number '1'. A large blue 'Add to Cart' button is positioned below the quantity. Underneath the button are two options: 'ADD TO WISH LIST' with a heart icon and 'ADD TO COMPARE' with a bar chart icon. At the bottom of the product section, there is a 'Check Gift Card Code Status' section. It features a text input field with the placeholder 'Enter your Code' and a blue 'Check Status' link below it.

To create a widget, go to **Content** → **Elements** → **Widgets** and hit the **Add Widget** button.

Select the **Amasty Gift Card Code Status Check** widget type.

Gift Codes

Code:	Status:	Current Balance:	Valid till:	Remove
BIRTHDAY_ST792	Active	\$46.00	2025-05-27	
Code:	Status:	Current Balance:	Valid till:	Remove
BIRTHDAY_DN273	Active	\$50.00	2026-05-28	

Apply Gift Card Code

Customers can check a gift card status as well as apply the gift card on a shopping cart page. All active codes are displayed in the dropdown, so customers can simply choose the necessary one.

Shopping Cart

Item	Price	Qty	Subtotal
 Summit Watch	\$54.00	<input type="text" value="1"/>	\$54.00

[Move to Wishlist](#)  

[Update Shopping Cart](#)

[Apply Discount Code](#) ▾

BIRTHDAY_ST792 [Remove](#)
Apply Gift Card Code

▾ [Add Code](#)

[Check Status](#)

Once a gift card code is applied, the order total will be automatically recalculated.

Shopping Cart

Item	Price	Qty	Subtotal
	\$54.00	1	\$54.00

API Integration

The extension includes API support. Store admins may use the following APIs:

GiftCard

Amasty\GiftCard\Api\ImageRepositoryInterface - API for images processing

Available methods:

```
save(account)
getById(id)
getList()
deleteById(id)
```

Amasty\GiftCard\Api\CodePoolRepositoryInterface - API for codes pool processing

Available methods:

```
save(codePool)
getById(id)
getList()
deleteById(id)
```

Amasty\GiftCard\Api\CodeGeneratorManagementInterface - API for codes generation

generateCodesForCodePool(codePoolId, qty) - generation of codes qty for *codePoolId*

generateCodesByTemplate(codePoolId, template, qty) - generation of codes according to *template* for *codePoolId*

GiftCardAccount

Amasty\GiftCardAccount\Api\GiftCardAccountRepositoryInterface - API for gift account processing

Available methods:

```
save(account)
getById(id)
getByCode(code)
deleteById(id)
getList()
```

Amasty\GiftCardAccount\Api\GiftCardAccountManagementInterface - API for cards application to customers

Available methods:

```
saveByQuoteId(cartId, giftCardCode) - application //cartId// of gift account with //giftCardCode//
```

```
deleteByQuoteId(cartId, giftCardCode) - deletion //cartId// of gift account with //giftCardCode//
```

Amasty\GiftCardAccount\Api\GuestGiftCardAccountManagementInterface - API for card application to guests

Available methods:

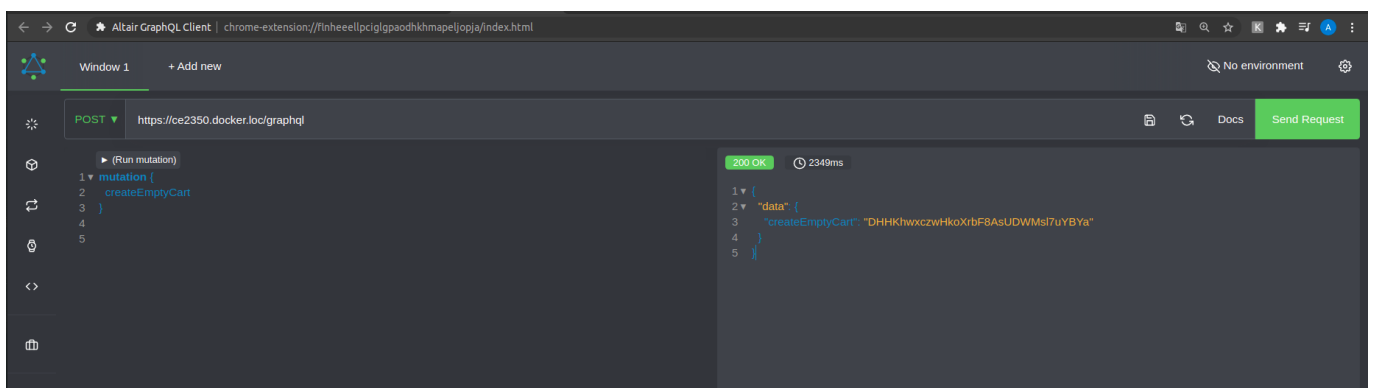

```
saveByQuoteId(cartId, giftCardCode)
deleteByQuoteId(cartId, giftCardCode)
```

GraphQL compatibility

The extension is compatible with GraphQL (read + write).

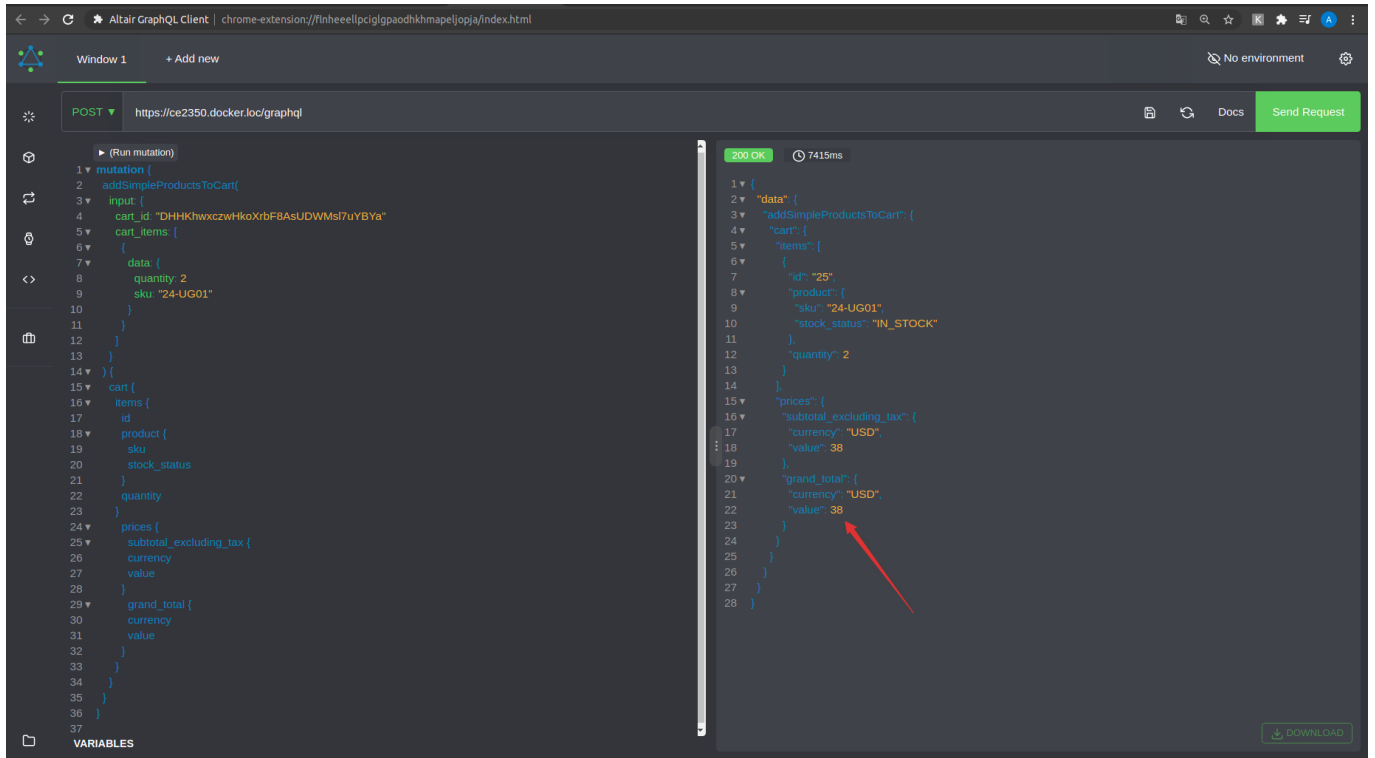

Here is an example of the implementation via GraphQL. Follow the steps below:

1. Create the cart

```
mutation
{createEmptyCart}
```

2. Add the product

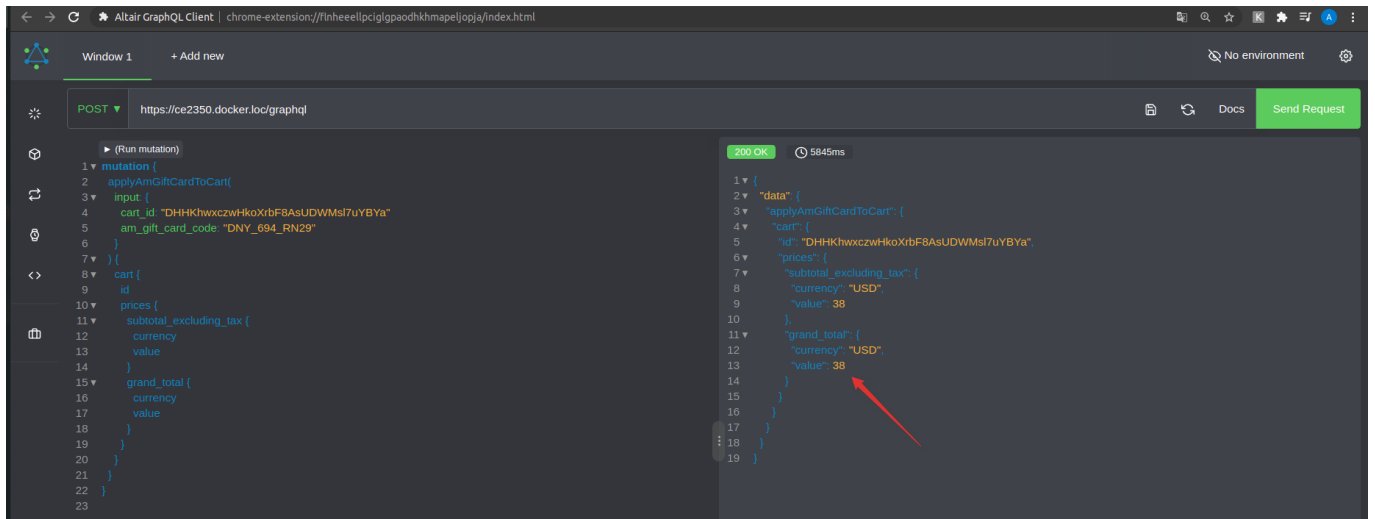

```
mutation
{addSimpleProductsToCart(
input: {
cart_id: "YOUR CART ID"
cart_items: [
{
data: {
quantity: 2
sku: "YOUR PRODUCT SKU"
}
}
]
}
) {
cart {
items {
idproduct {
sku
stock_status
}
quantity
}
prices {
subtotal_excluding_tax {
currency
value
}
grand_total {
```

```
currencyvalue
```

```
}  
}  
}  
}  
}
```

3. Apply the gift card

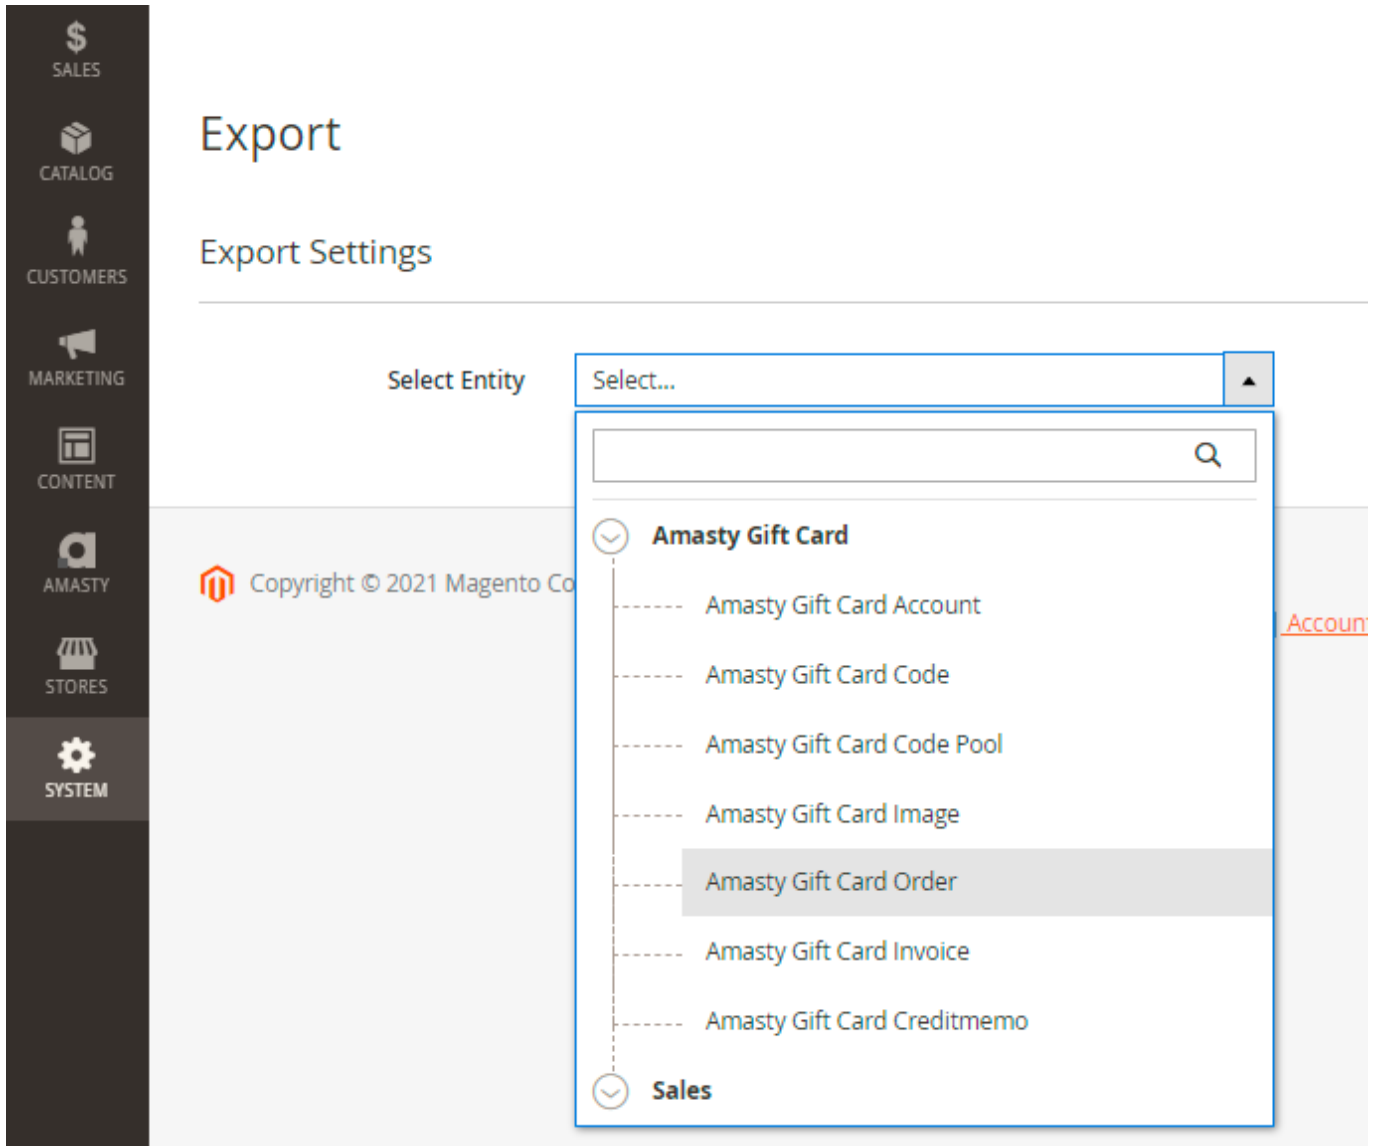

```
mutation {  
  applyAmGiftCardToCart(  
    input: {  
      cart_id: "YOUR CART ID"  
      am_gift_card_code: "YOUR GIFT CODE"  
    }  
  ) {  
    cart {  
      id  
      prices {  
        subtotal_excluding_tax {  
          currency  
          value  
        }  
      }  
      grand_total {  
        currency  
        value  
      }  
    }  
  }  
}
```

Gift Card Pro: Export

The extension includes a part of **Export Orders** solution. It means that you can export any gift card information using the simplified export UI.

Navigate to **System → Amasty Export → Export**.

Choose the required entity and configure export settings.

Main features you can use:

- Choose 1 of 6 available file types (CSV, XML, ODS, XLSX, JSON, Template)
- Specify output option (Store Exported File On Server, Upload Exported File By FTP / SFTP, Send Exported File to E-mail, Send to Rest Api Endpoint)
- Configure export fields and their namings
- Filter data by any parameter

Check the details of each tab configuration [in this guide](#).

Gift Card Pro: Import

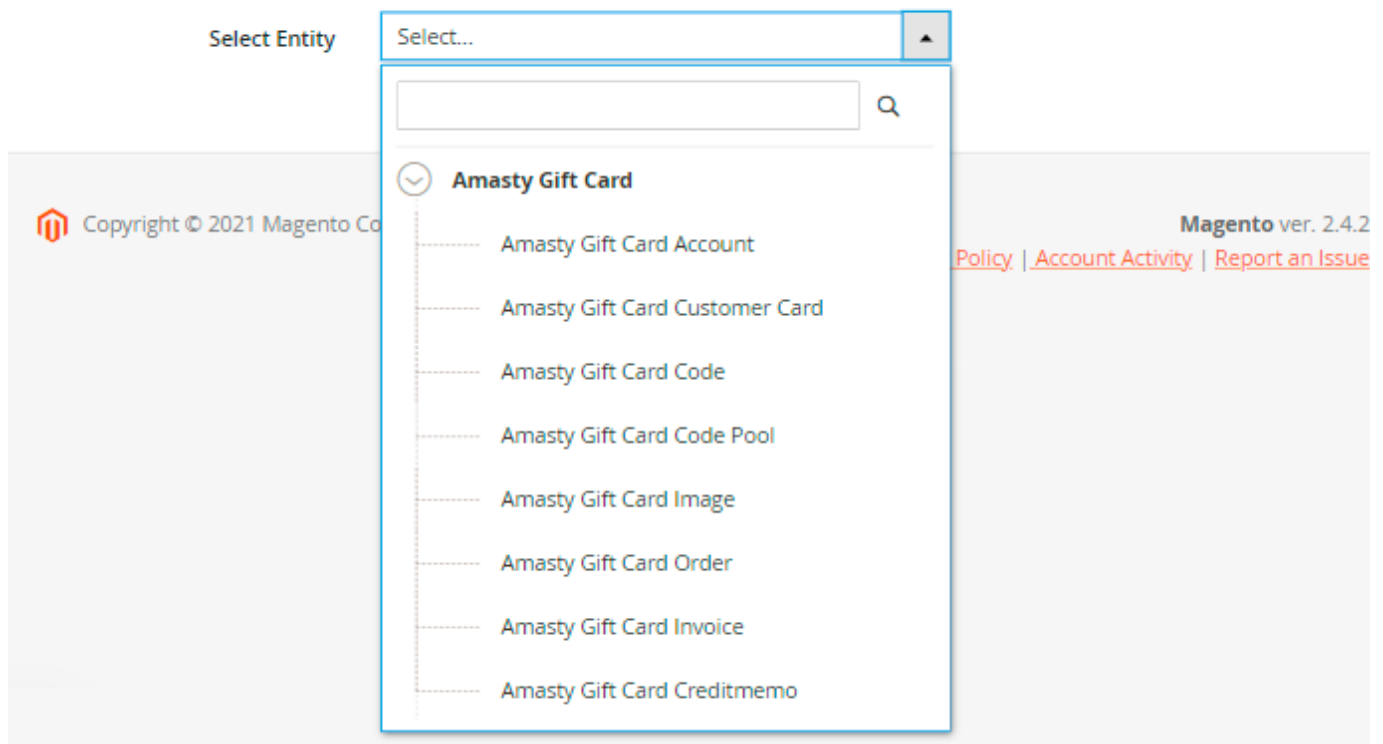

The same UI as described above is now available for the import tasks.

Navigate to **System** → **Amasty Import** → **Import**.

Import

Check Data

Import Settings

Choose the required entity and configure import settings.

Main features you can use:

- Select file format (CSV, XML, ODS, XLSX)
- Specify output option (Local Directory, File Upload, FTP, SFTP, URL, Google Sheets, REST API Endpoint)
- Add import fields and map the namings
- Validate import file to avoid errors

See the details [in this guide](#).

Find out how to install the **Gift Card** extension for Magento 2 via [Composer](#).

Gift Card Pro/Premium: SMS Notification

Now the extension is compatible with [SMS Notification Pro](#). You can set up an additional channel to notify customers about the receipt of a gift card, its balance updates, and remind them of the expiration date. To learn more about the product's capabilities and price, please, visit the product page.

SMS Gateway

SMS Gateway [store view]

NOTE [store view] Run 'composer require twilio/sdk' from CLI to use Twilio.

Twilio Account SID [store view]
Your Account SID from Twilio

Twilio Auth Token [store view]
Your Auth Token from Twilio

Twilio Mobile Number [store view]
Phone number you purchased at Twilio

SMS Notification - enable the option to set up the SMS notification channel.

SMS Gateway - to set up the Gateway, please, choose your SMS service provider and fill in all the necessary credentials: sender ID, authentication key, route, Auth Token, Account SID, API URL, and purchased mobile phone number. The information to enter will depend on the chosen service provider.

To learn more about the settings, please, refer to the SMS Notification Pro [User Guide](#).

Please, note that to display the Recipient phone number field on the frontend, you need to select the Recipient Phone in the Amasty Extension/Gift Card/Display Options/Gift Card Fields menu.

The screenshot shows the Amasty Gift Card configuration interface. At the top, there are four Christmas card design thumbnails. Below them is an 'Upload your own design' section with a 'Browse' button. The form includes fields for 'Your Name', 'Recipient Name', 'Recipient Email', and 'Recipient Phone'. The 'Recipient Phone' field is highlighted with a red box and includes a country code dropdown set to '1'. Below the form is a 'Message' field. At the bottom, the 'Display Options' panel is open, showing a list of 'Gift Card Fields' for the store view. The 'Recipient Phone' field is selected and highlighted with a red box in this list.

Please, mind that to employ the functionality you need to buy the [SMS Notification Pro](#) extension.

Gift Card Premium: Store Credit

Now the product enjoys features of the [Amasty Store Credit & Refund](#) extension to allow your customers to redeem Gift Cards balances for store credit.

Configuration

General ⌵

Enable Module
[store view] ▼

Refund Store Credit Automatically
[global] ▼ ?

Allow applying Store Credit on Tax
[store view] ▼

Allow applying Store Credit on Shipping
[store view] ▼

Usage Configuration ⌵

Apply Store Credit to Specific Products
[store view] ▼

Select 'Yes' to make the store credit applicable to specific products.

Action
[store view] ▼

SKU
[store view] ?

Specify a comma-separated list of SKUs the store credit can be applied to.

Category ID
[store view] ?

Specify a comma-separated list of category IDs the store credit can be applied to.

Enable Module - set to Yes to enable refunding to Magento 2 store credit balance.

Refund Store Credit Automatically - select Yes if you want the **Refund to Store Credit** option to be set on the credit memo page by default.

Allow applying Store Credit on Tax - enable this option if you want to allow customers to apply store credit currency on taxes.

Allow applying Store Credit on Shipping - set to Yes to enable your customers to apply store credit balance on shipping.

You can also apply Store Credit to certain products by including/excluding lists of SKUs and categories. In the example above, we enabled the functionality for category 41, which is the category id for Gift Cards in the demo. You can also enable email notifications about the store credit balance updates. To learn about all the settings, please, refer to the Store Credit and Refund [User Guide](#).

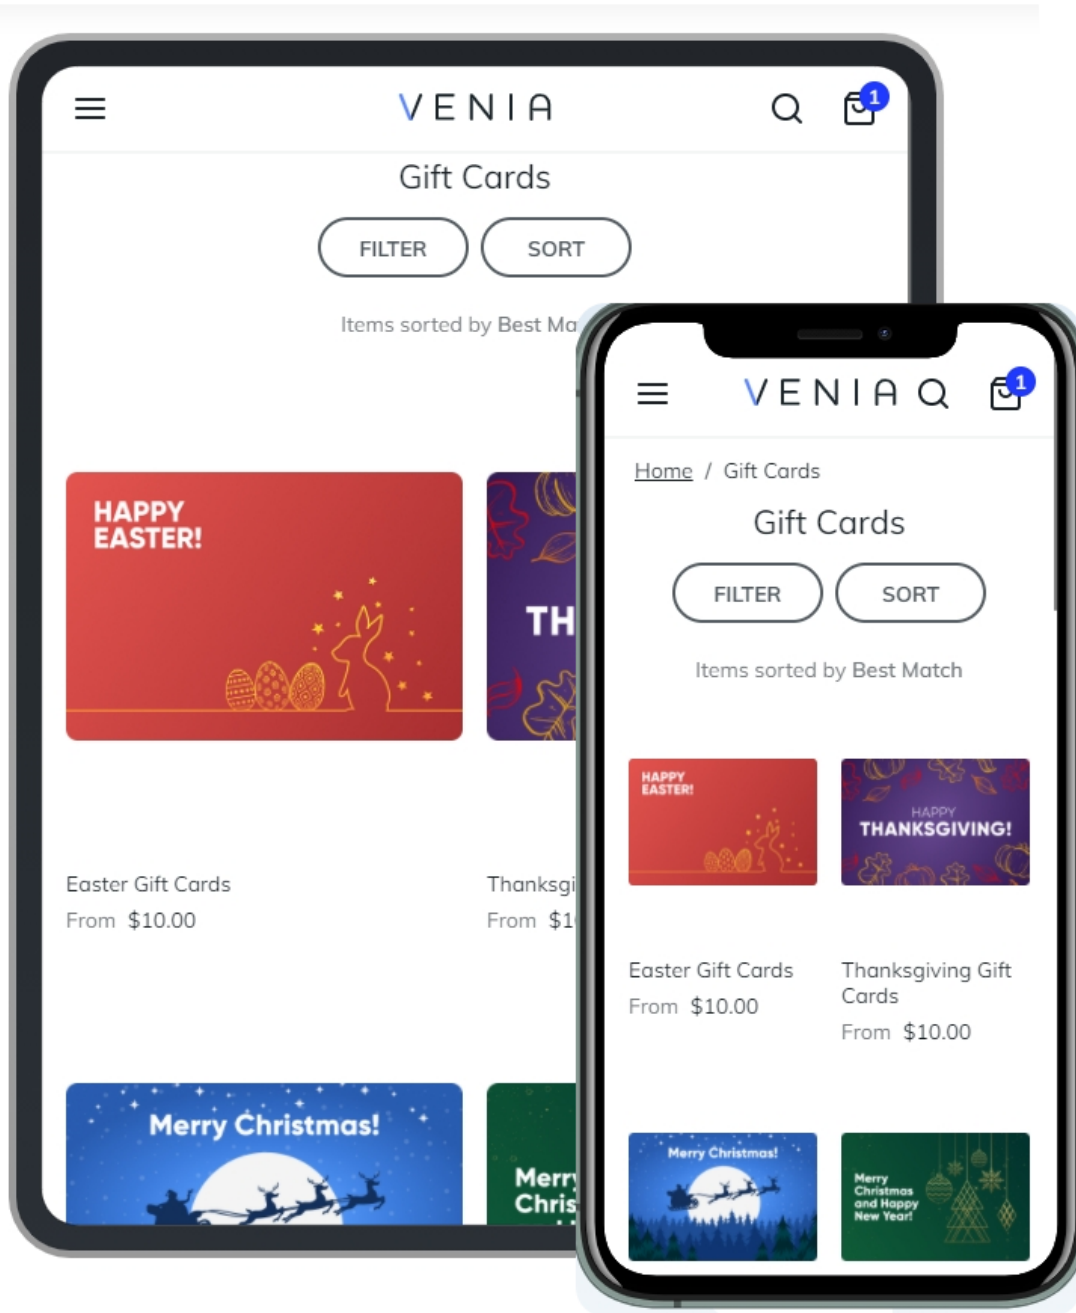

PWA for Gift Card Add-On

To get the most of the Gift Card Pro extension, install the PWA add-on. The software provides a faster, enhanced experience for the clients shopping from phones and tablets.

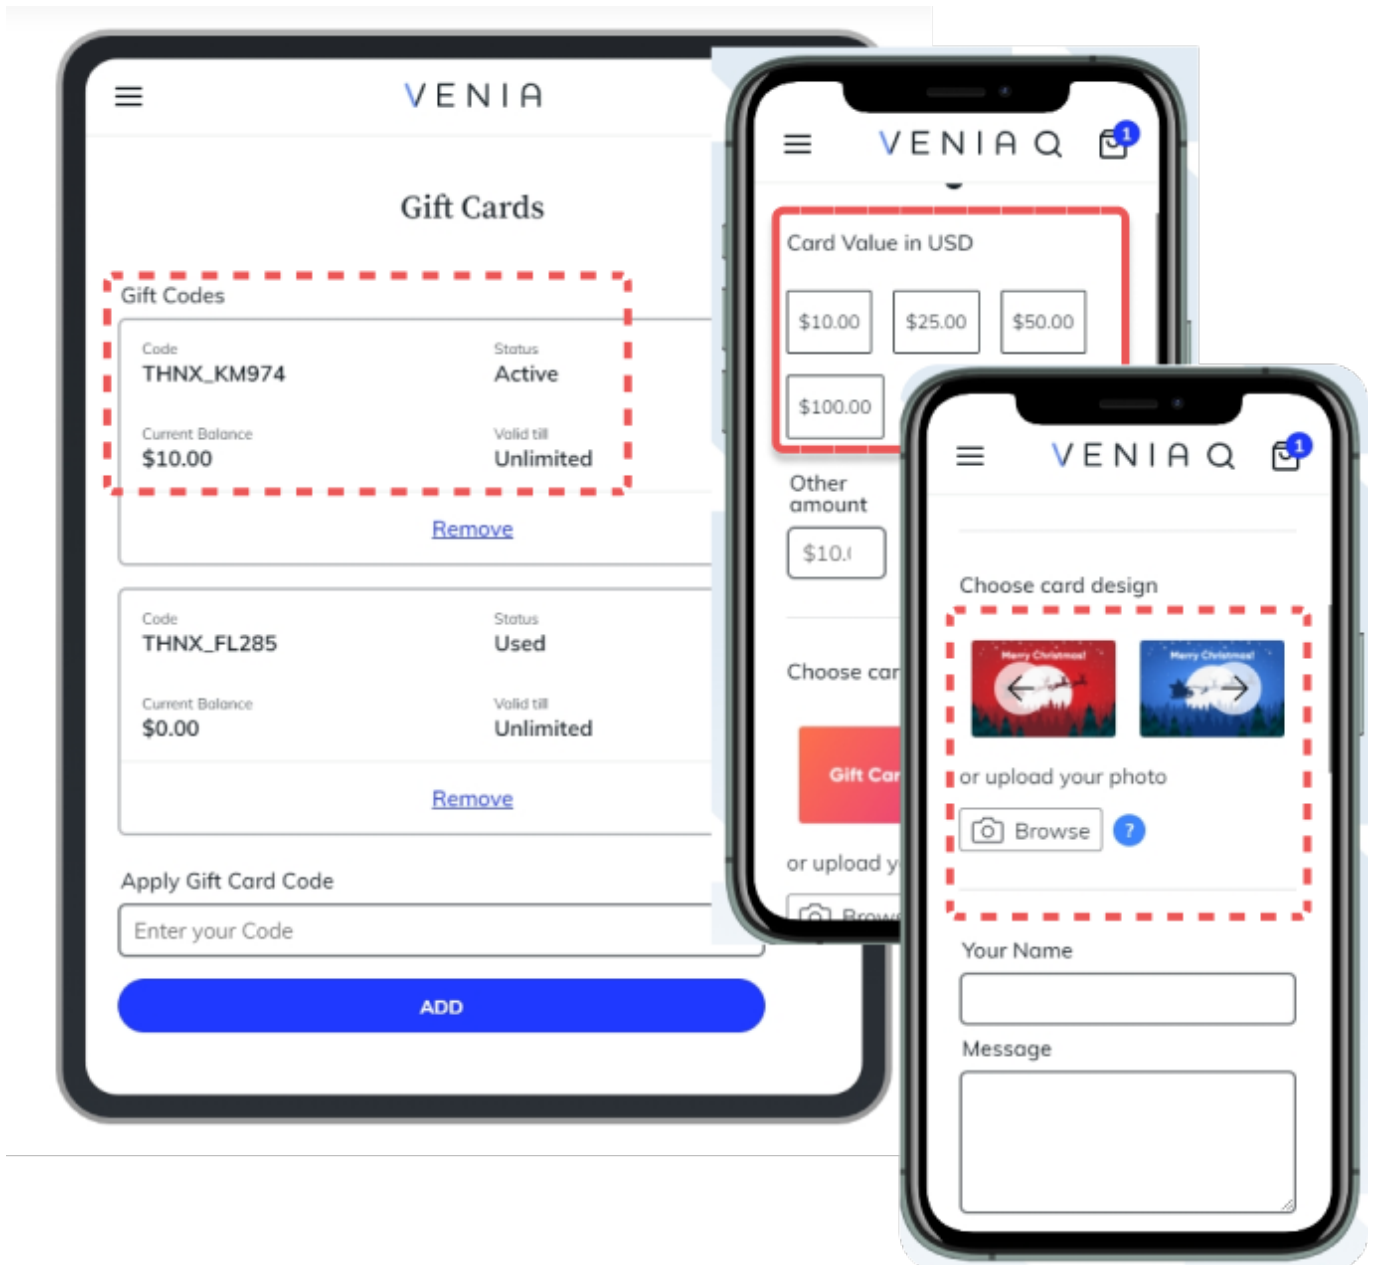

Before purchasing the **PWA for Gift Card Add-On**, please, acknowledge, that it requires

- the Gift Card Pro Extension;
- PWA theme and [PWA Studio](#) installed.

The add-on adapts interaction with the website to various screen resolutions to improve responsiveness and the overall client experience. Once the software is added, the Gift Card page will be displayed as follows:

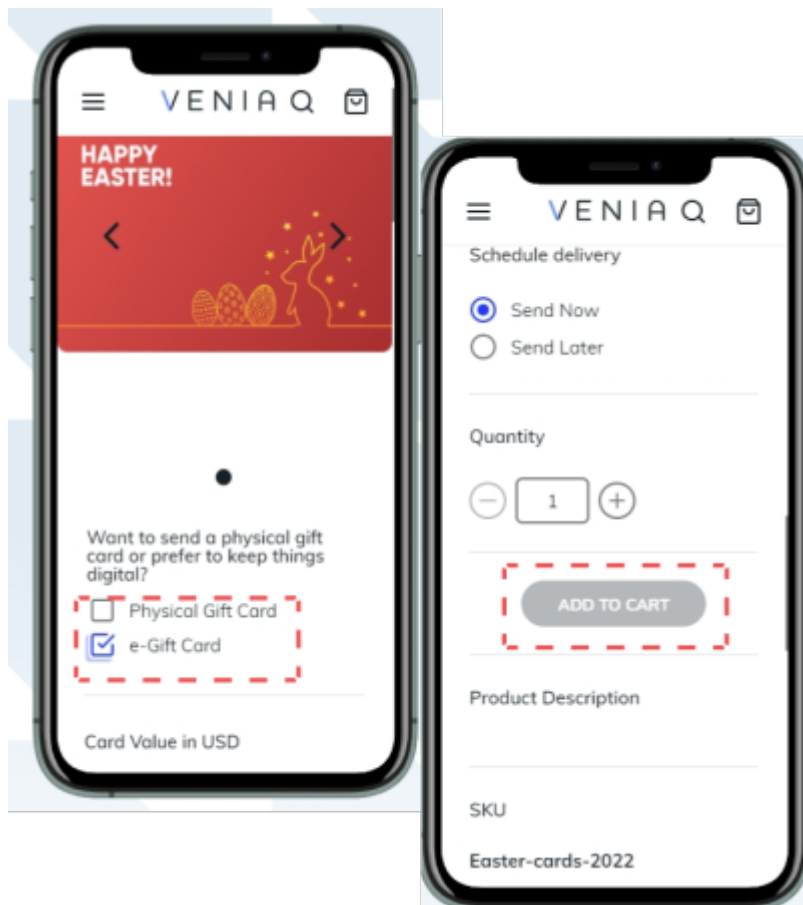

Choosing the card value, its design, checking gift cards balance, and other features will be available with the enhanced mobile usability.

Please, note a few limitations when purchasing **PWA for Gift Card Add-On**:

1. The add-on doesn't include a widget that helps clients see their gift card balance on any page of the store. To check the information one needs to proceed to their account.
2. Customizable options, like wrapping the gift card, adding ribbons, are not compatible with the add-on.
3. The software doesn't support the virtual gift card type. When setting up the Gift Card product page, make sure the related options are disabled. Otherwise, the e-Gift Card type will be displayed on the page, but not available for adding to the cart.
