

**amasty**

For more details see how the [Mega Menu for Magento 2](#) extension works.

# Guide for Mega Menu for Magento 2

Apply dynamic and flexible navigation menu to your webstore with Magento 2 Mega Menu extension. Add various types of content right to the menu bar to attract customers' attention and enhance their shopping experience.

- Adjust your menu display using different layouts
- Add dynamic blocks, videos, images and links
- Apply various catchy labels
- Configure the menu without any technical skills
- Make your menu mobile friendly

The extension is fully compatible with the native **Magento Page Builder** functionality.

## Mega Menu Lite

This version has a set of features for desktop menu customization. Using the Lite version, you can:

- change a color scheme;
- enable hamburger menu for desktops;
- create custom menu items with links;
- adjust the sort order using the menu builder;
- highlight particular items with labels.

Keep in mind, that you won't be able to create engaging content for your categories and subcategories.

## General Settings

To choose a menu type and customize a color scheme, navigate to **Stores → Configuration → Amasty Extensions → Mega Menu Lite**.

### General

**Enabled**  
[store view]  ▼

**Enable Hamburger Menu For Categories**  
[store view]  ▼

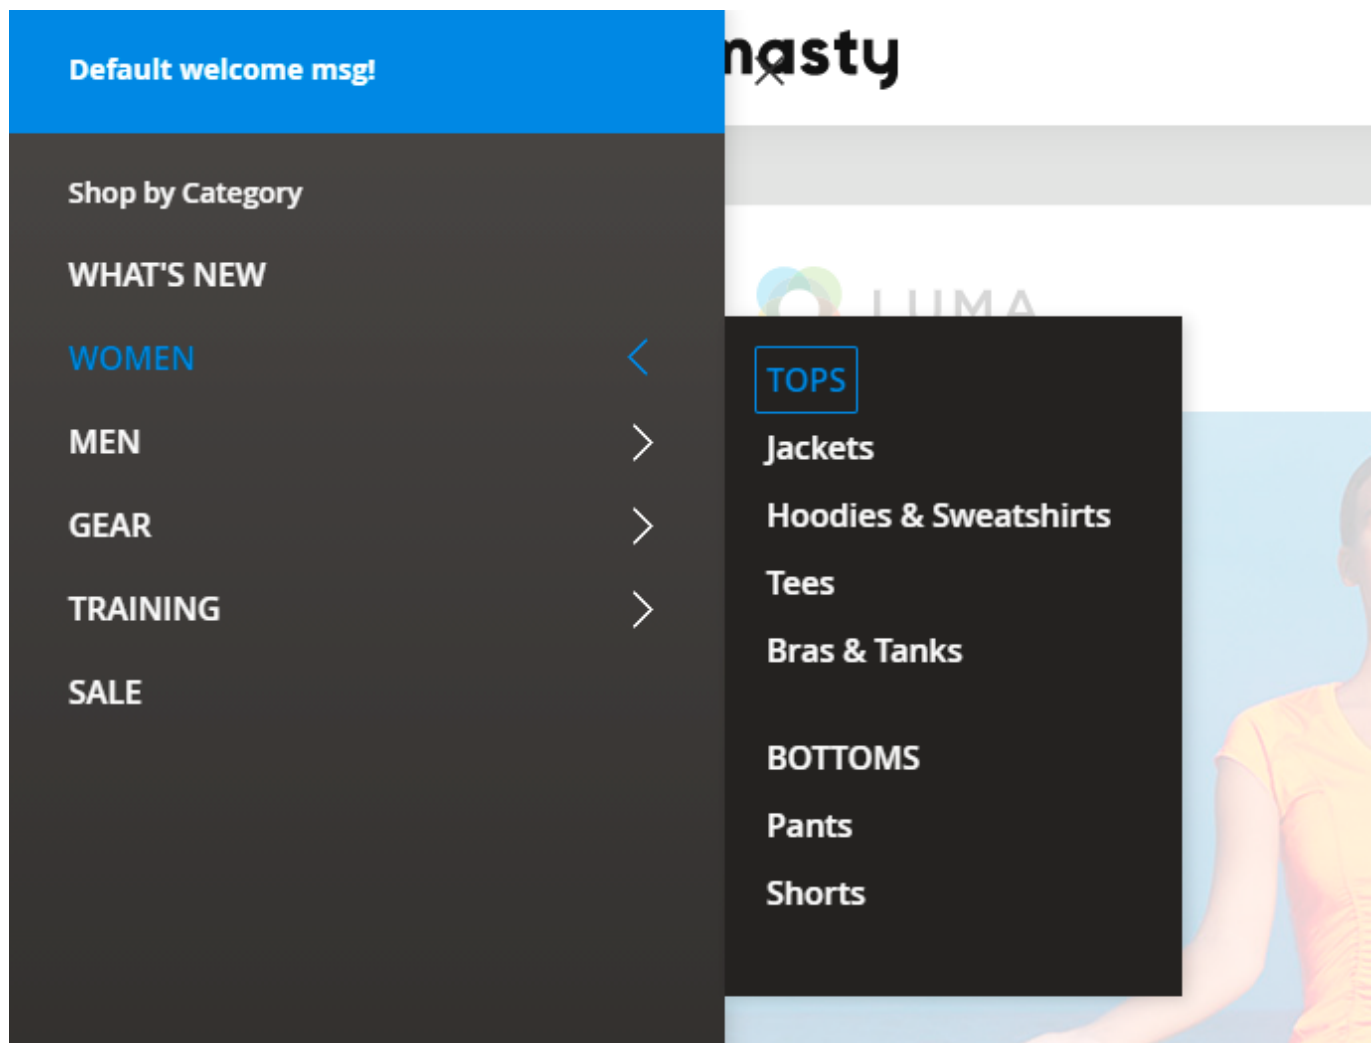

**Enabled** - set to Yes to activate Mega Menu.

**Enable Hamburger Menu For Categories** - enable this option if you want to hide the categories into a separate menu type.

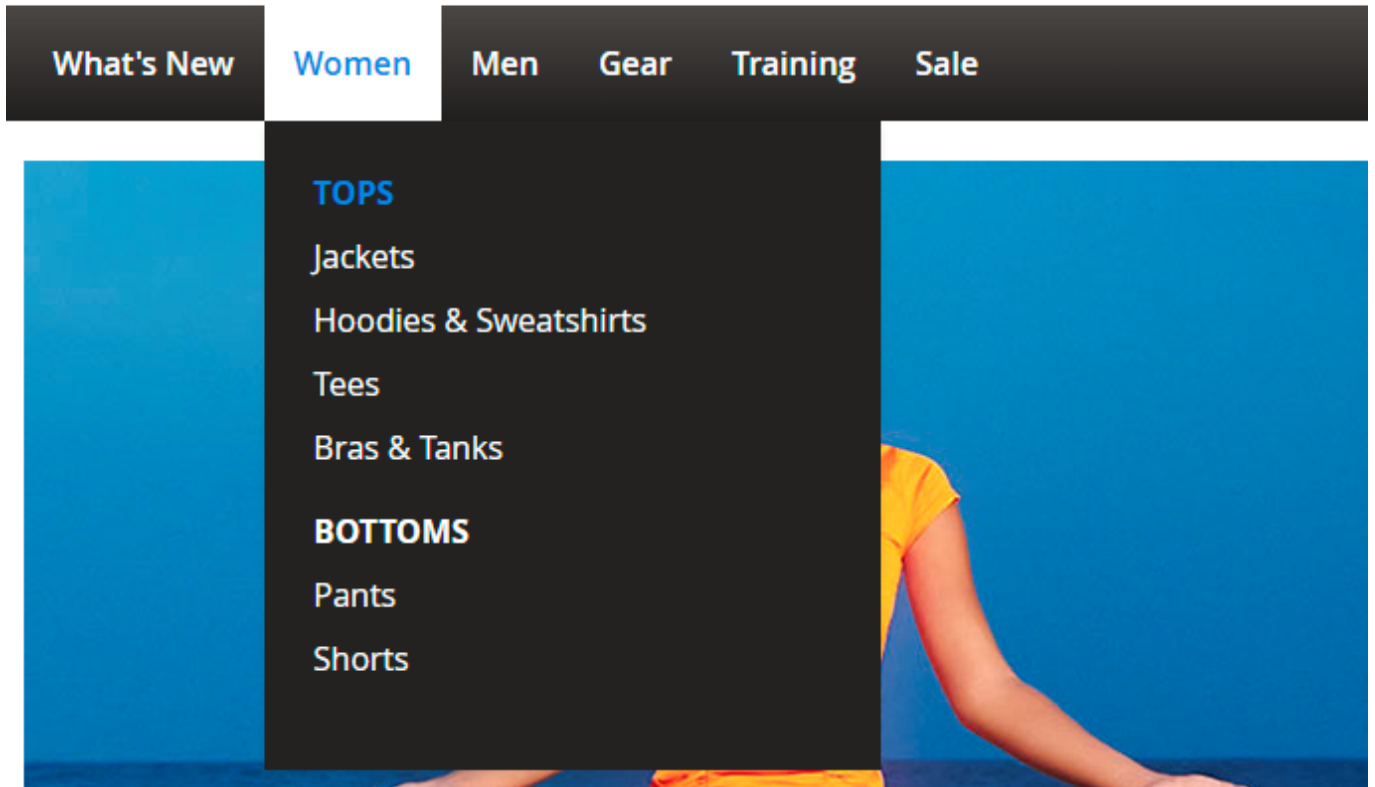

This type of menu is hidden under the three lines in the left corner:

A hamburger menu display:

A usual menu display:

## Color Settings

**Color Scheme Template** - select one of the ready-made templates or choose **Custom** to adjust colors manually.

## Color Settings

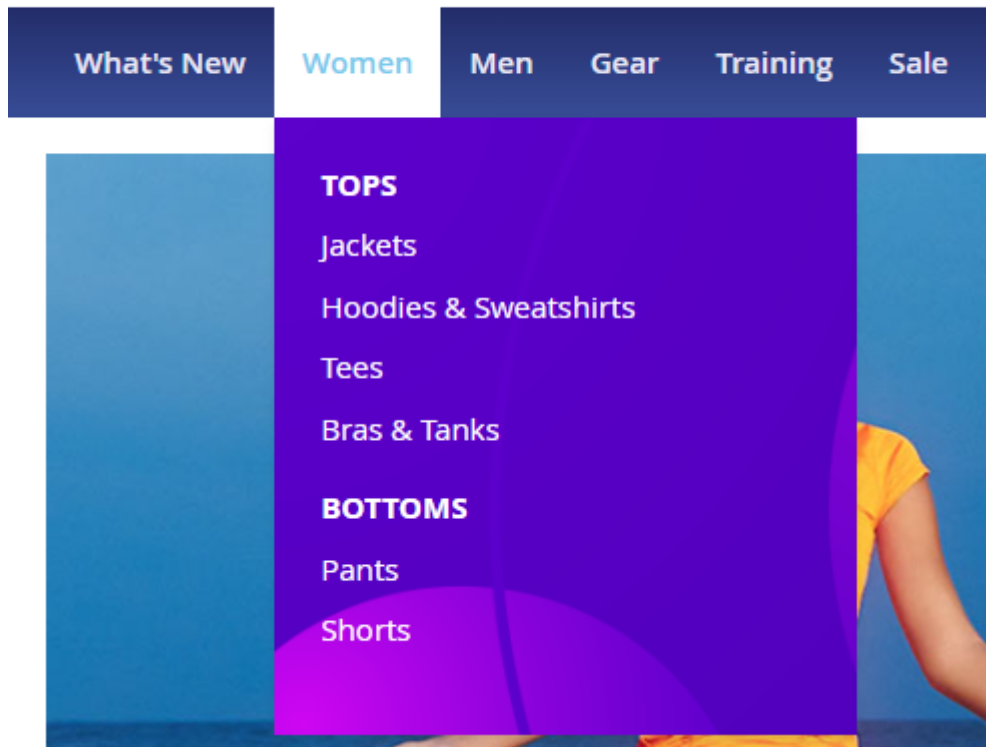

<b>Color Scheme Template</b> <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 5px;"><span style="background-color: #e0e0e0; padding: 2px 10px;">Bright Blue</span> ▼ Custom Lite Dark <b>Bright Blue</b> Blank</div>
<b>Menu Background Color</b> <small>[store view]</small>	<div style="background-color: linear-gradient(180deg, #232D6A 0%, #364A93 92%); height: 20px;"></div>
<b>Active Menu Item Color</b> <small>[store view]</small>	<div style="background-color: #000000; height: 20px;"></div> <p>#000000</p> <p>Leave empty if no highlighting for active menu items is required.</p>
<b>Menu Text Color</b> <small>[store view]</small>	<div style="background-color: #EAE8F5; height: 20px;"></div>
<b>Submenu Background Color</b> <small>[store view]</small>	<div style="background-color: #5C89E4; height: 20px;"></div>
<b>Submenu Background Image</b> <small>[store view]</small>	<div style="display: flex; align-items: center;"><div style="width: 20px; height: 20px; background-color: purple; margin-right: 5px;"></div><div style="border: 1px solid #ccc; padding: 2px 5px; margin-right: 5px;">Choose File</div><div style="margin-right: 5px;">No file chosen</div><div style="margin-left: 10px;"><input type="checkbox"/> Delete Image</div></div>
<b>Submenu Text Color</b> <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 2px 10px;">#FFFFFF</div>
<b>Menu Item Hover Color</b> <small>[store view]</small>	<div style="background-color: #74CBED; height: 20px;"></div>
<b>Hamburger Button Color</b> <small>[store view]</small>	<div style="background-color: #757575; height: 20px;"></div>

With a handy color-picker tool it is possible to configure the colors for:

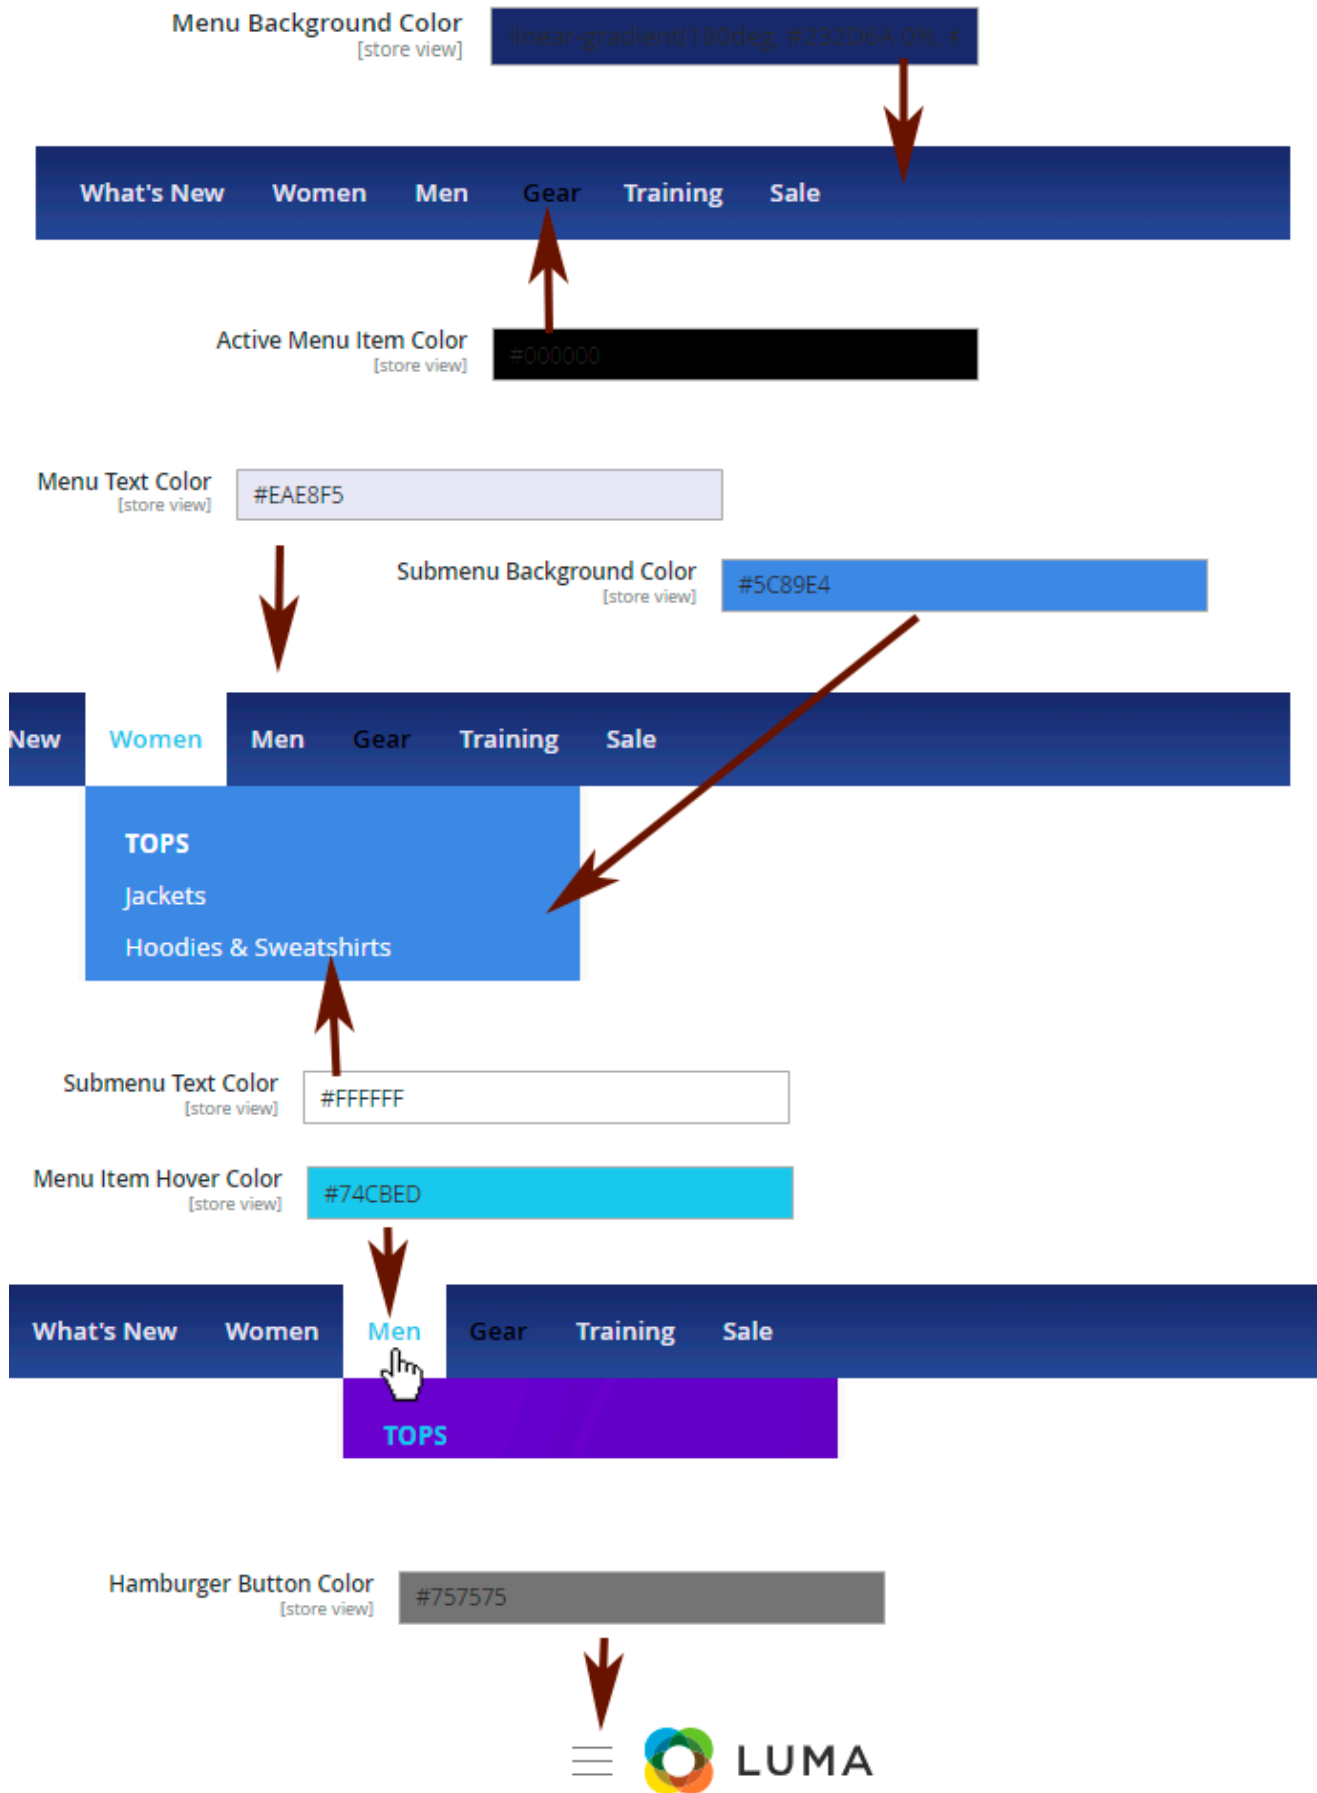

- Menu Background/Text;
- Submenu Background/Text;
- Active Menu Item Color;
- Menu Item Hover;
- Hamburger Button.

You can also set a custom submenu background image if needed.

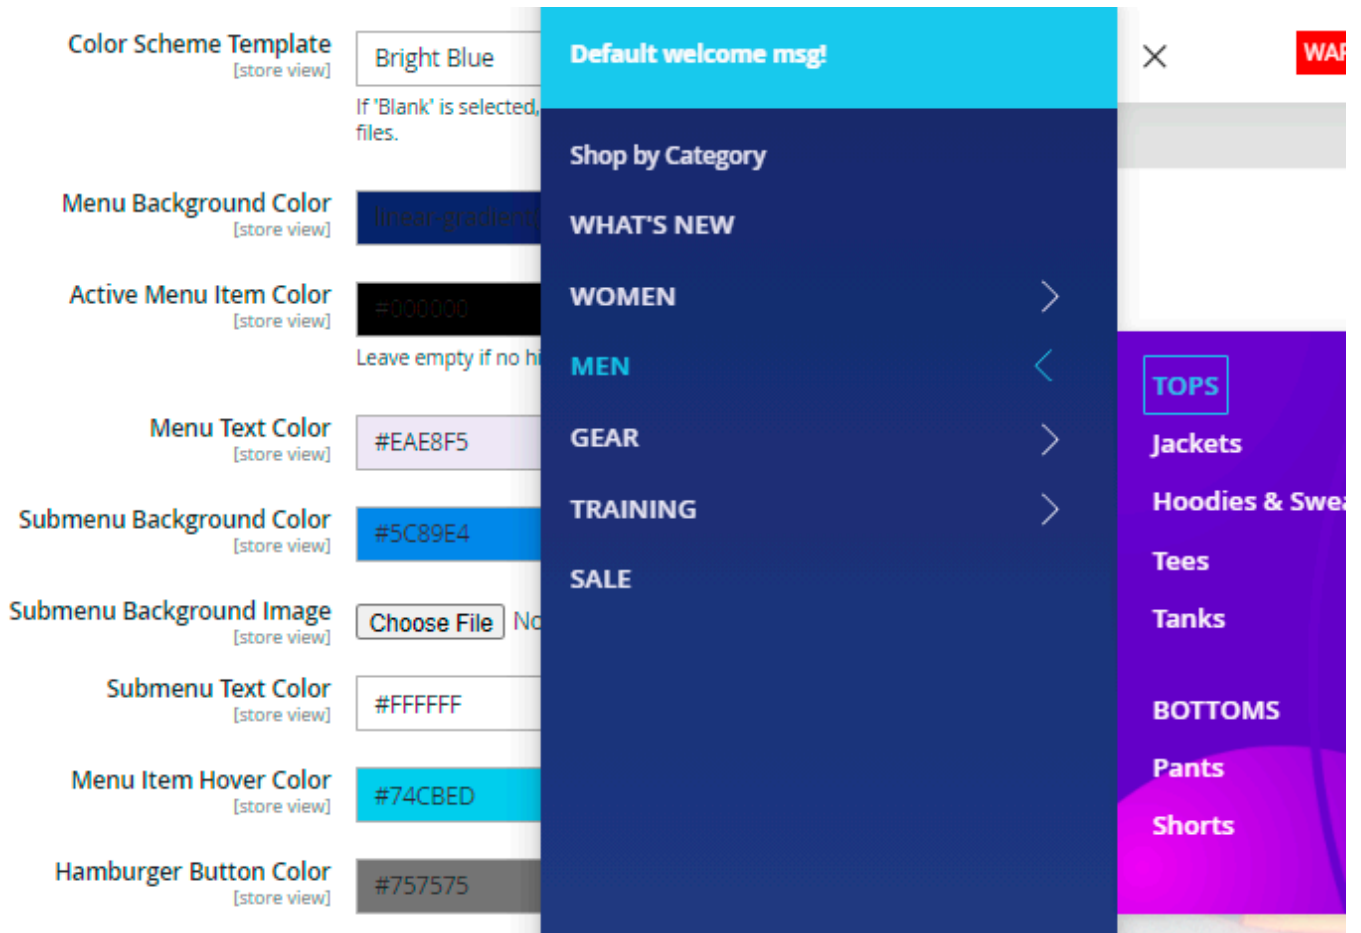

Submenu background image sample:

The whole color scheme is configured as below:

A color scheme customization for a hamburger menu has some peculiarities, e.g. *Menu Item Hover Color* is also used for a top tab with the default welcome message:

Background images are also displayed.

## Custom Menu Items

With the extension, you can add custom items to the menu bar. To see all additional items on a separate grid, go to **Amasty → Mega Menu Lite → Custom Menu Items**.

# Custom Menu Items

[Add New Custom Item](#)

Filters Default View ▾ Columns ▾

Here you can check the items' **Title**, **URL Key** (internal or external) and active **Status**.

**Edit** or **Delete** items in the *Action* column or perform mass actions via **Actions** dropdown menu.

To create a new menu item, click **Add New Custom Item**.

## General

**Title \***

**URL Key**  ▼

**External URL**   
Please insert full URL address.

**Status**  ▼

**Menu Label Text**

**Label Background Color (hex)**        **Label Text Color (hex)**

**Title** - fill in the title that will be displayed in the navigation menu.

**URL Key** - set the URL to redirect customers after clicking the menu item: Internal URL or External URL.

**Internal/External URL** - provide the required URL address.

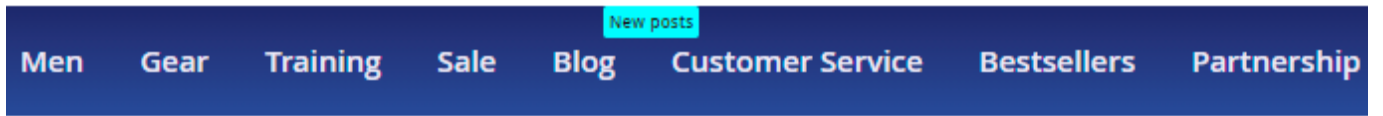

**Status** - enable an item for mobile devices, desktops or for both. Disable an item if needed.

**Menu Label Text** - specify a text to highlight a custom item with a label if necessary.

**Label Background/Text Color (hex)** - adjust label colors to match menu design.

Hit the **Save** button.

Custom items and labels are displayed as below:

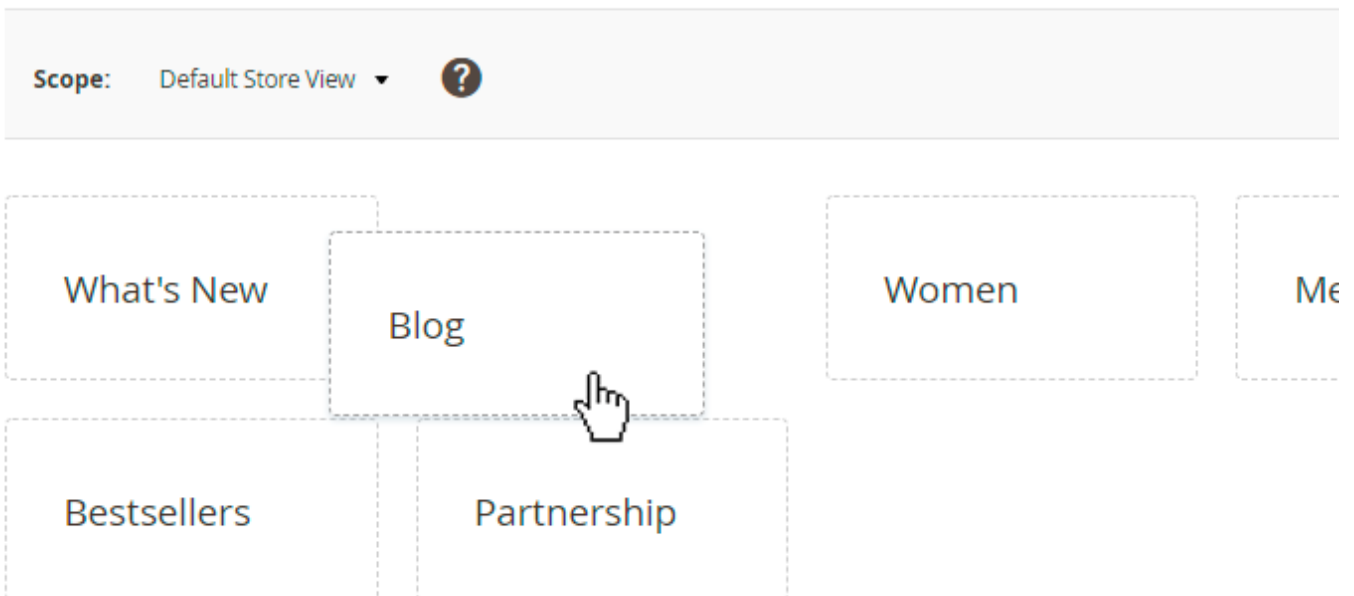

## Menu Builder

You can also customize the menu items order.

Navigate to **Amasty** → **Mega Menu Lite** → **Menu Builder**.

## Menu Builder

Adjust the position of each menu item (both top categories and custom menu items) using handy drag-and-drop functionality.

## Mega Menu Pro

Using the Pro version, you can add various content types to make your menu more appealing and catchy. Pro version has the following features:

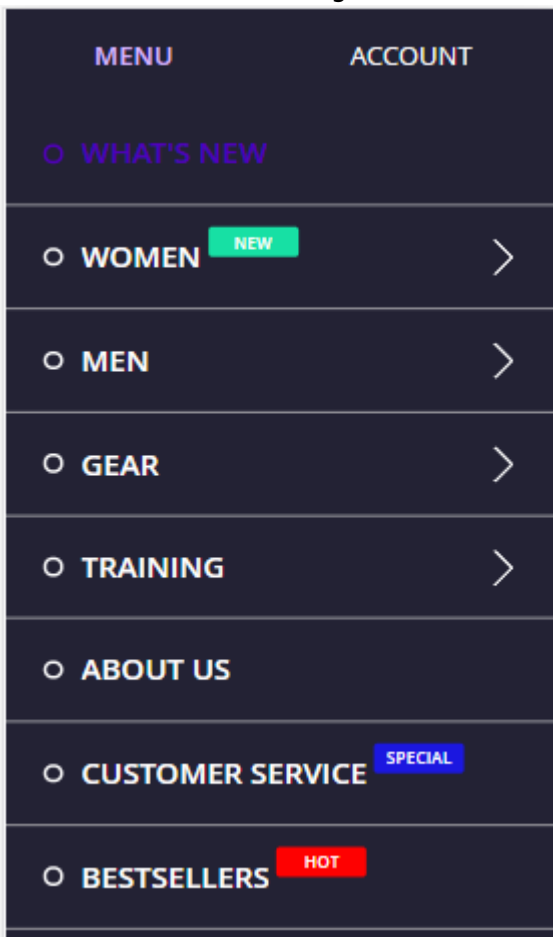

- use 2 extra menu types for mobile display (According and Drill Down);
- add the content to subcategory dropdowns on any levels (images, videos, widgets, etc.);
- make categories intuitive with icons + use ready-made icon packs;

- enable sticky menu.

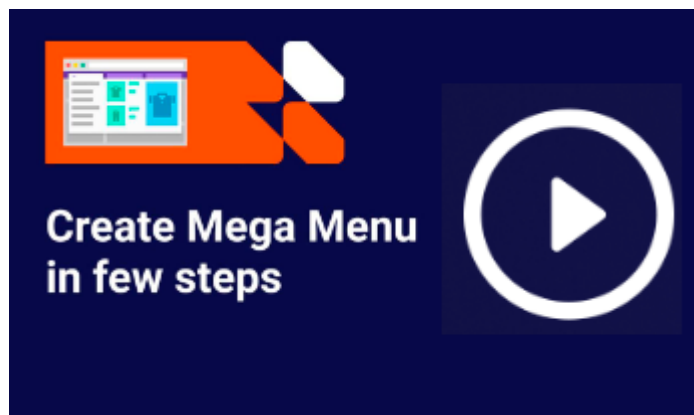

## Configuration

To set the general settings of the extension, go to **Stores → Configuration → Amasty Extensions → Mega Menu Configuration**.

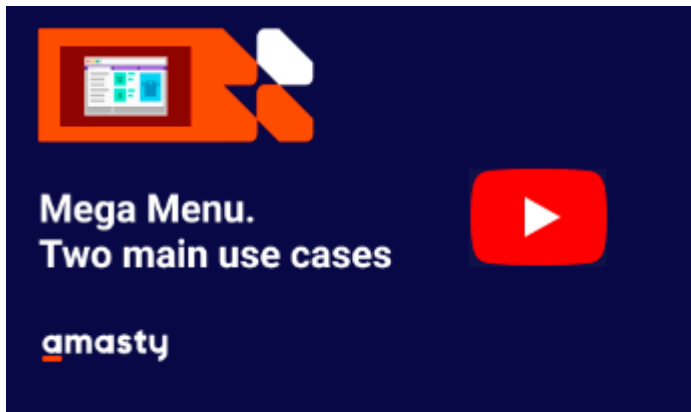

Visual content is available for desktops only, but in the mobile version, the general submenu

dropdowns and color schemes are also displayed. Use the video guide to set up a basic mega menu in a few minutes:

Check the most common use cases configuration:

Expand the **General** tab.

## General

<b>Enabled</b> <small>[store view]</small>	Yes	▼
<b>Enable Sticky Menu</b> <small>[store view]</small>	Yes	▼
<b>Enable Hamburger Menu For Categories</b> <small>[store view]</small>	No	▼
<b>Template for Mobile View</b> <small>[store view]</small>	Accordion	▼
<b>Show Mega Menu Icons on</b> <small>[store view]</small>	Desktop Only	▼

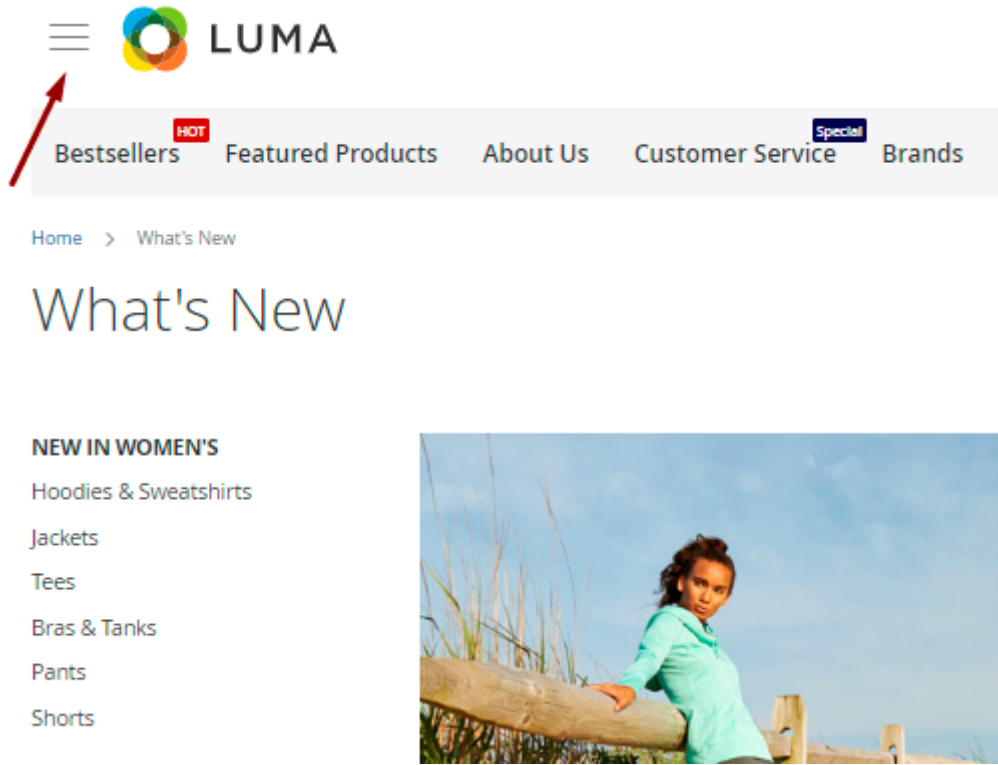

**Enabled** - set to Yes to activate Mega Menu.

**Enabled Sticky Menu** - enable to display sticky menu navigation during vertical page scrolling.

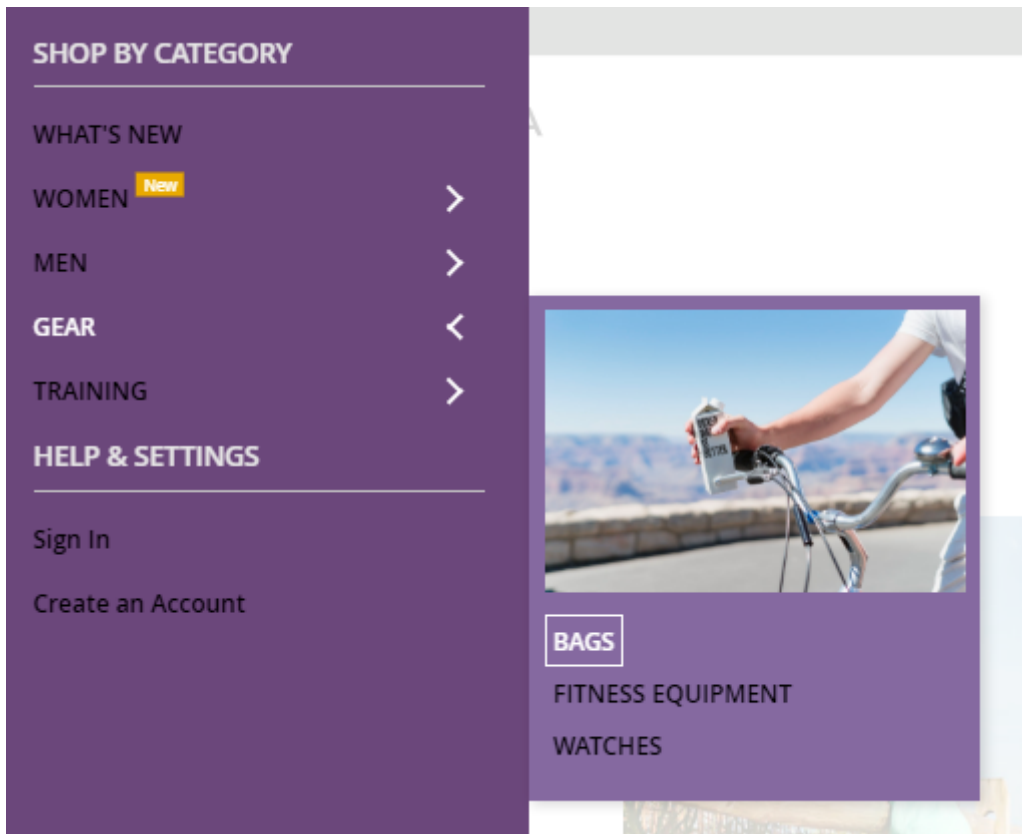

**Enable Hamburger Menu For Categories** - enable this option if you want to hide the categories into a separate menu type.

### How does it work?

Three lines at the top left corner will appear.

When you click it, all the categories will drop down.

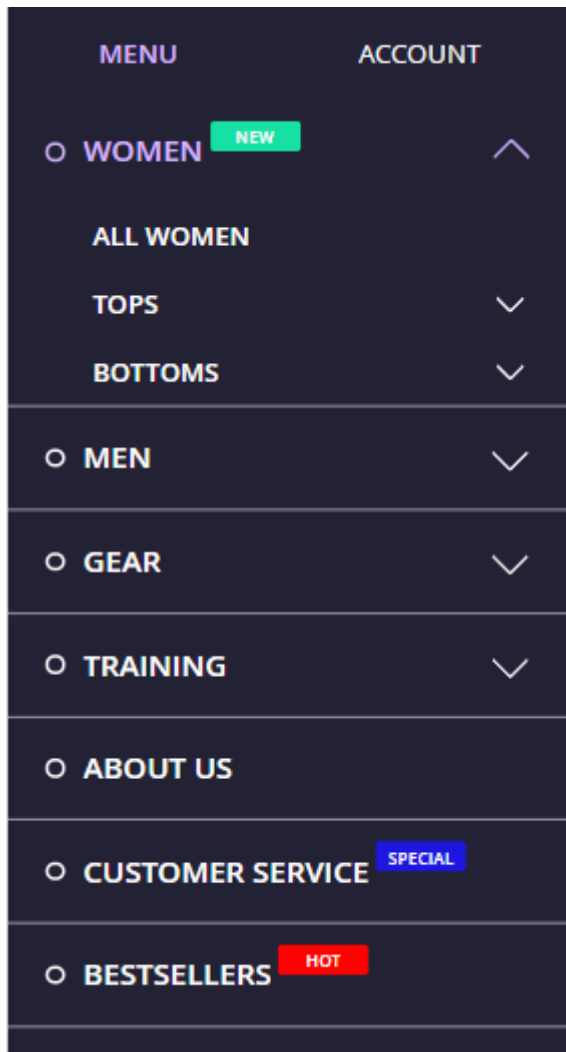

So all the categories are nested under the 3 lines. It is useful if you would like to have additional space for custom tabs in the top menu bar.

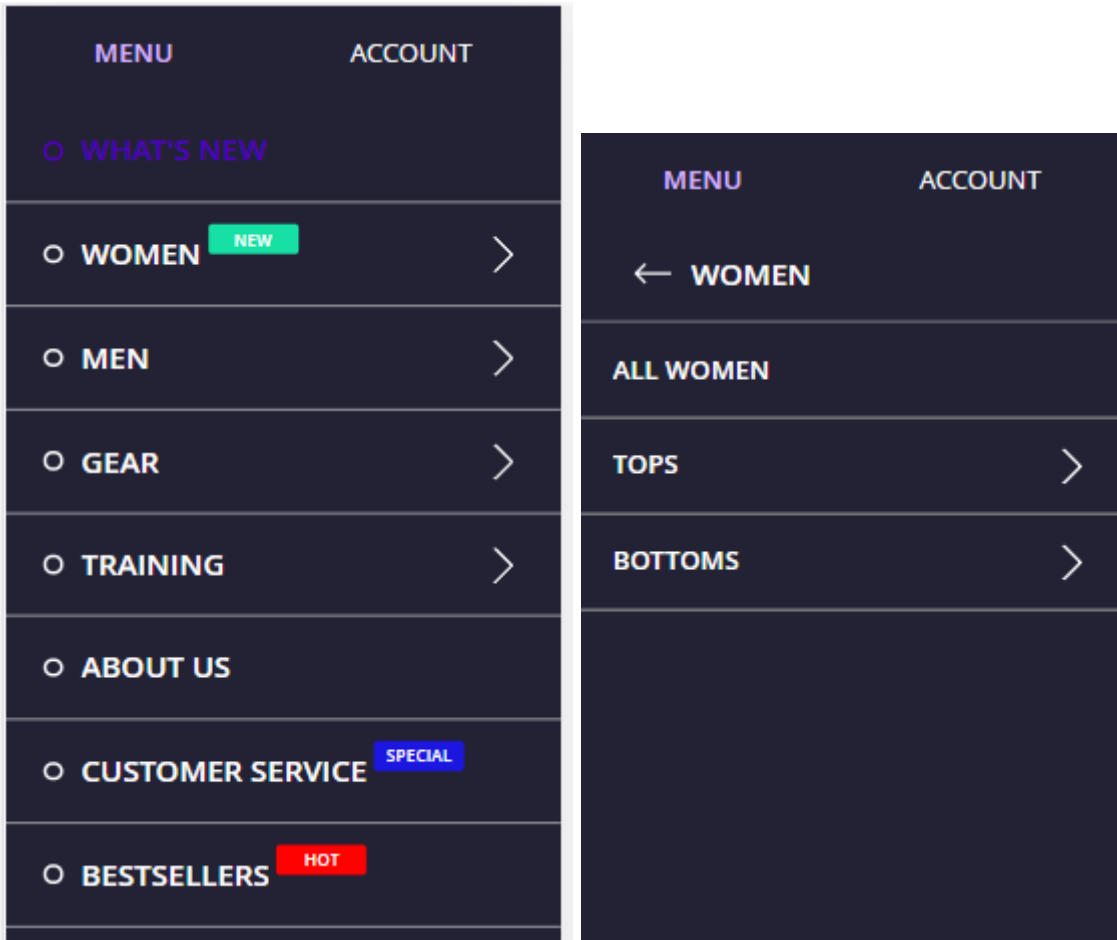

**Template for Mobile View** - choose the way the categories will be displayed on mobile devices. Two

options are available: **Accordion** and **Drill Down**.

Accordion menu opens subcategories without redirects:

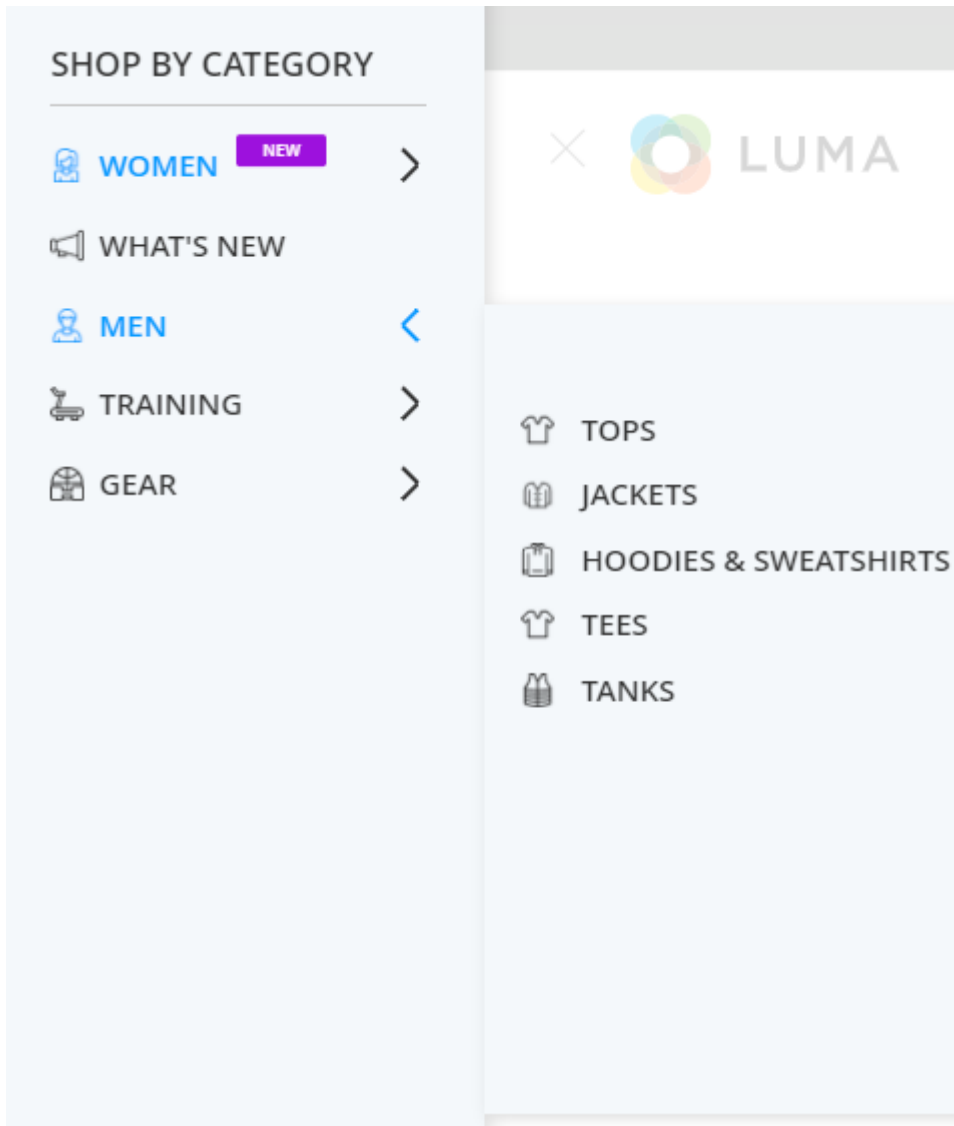

Drill Down menu opens each subcategory on a new tab:

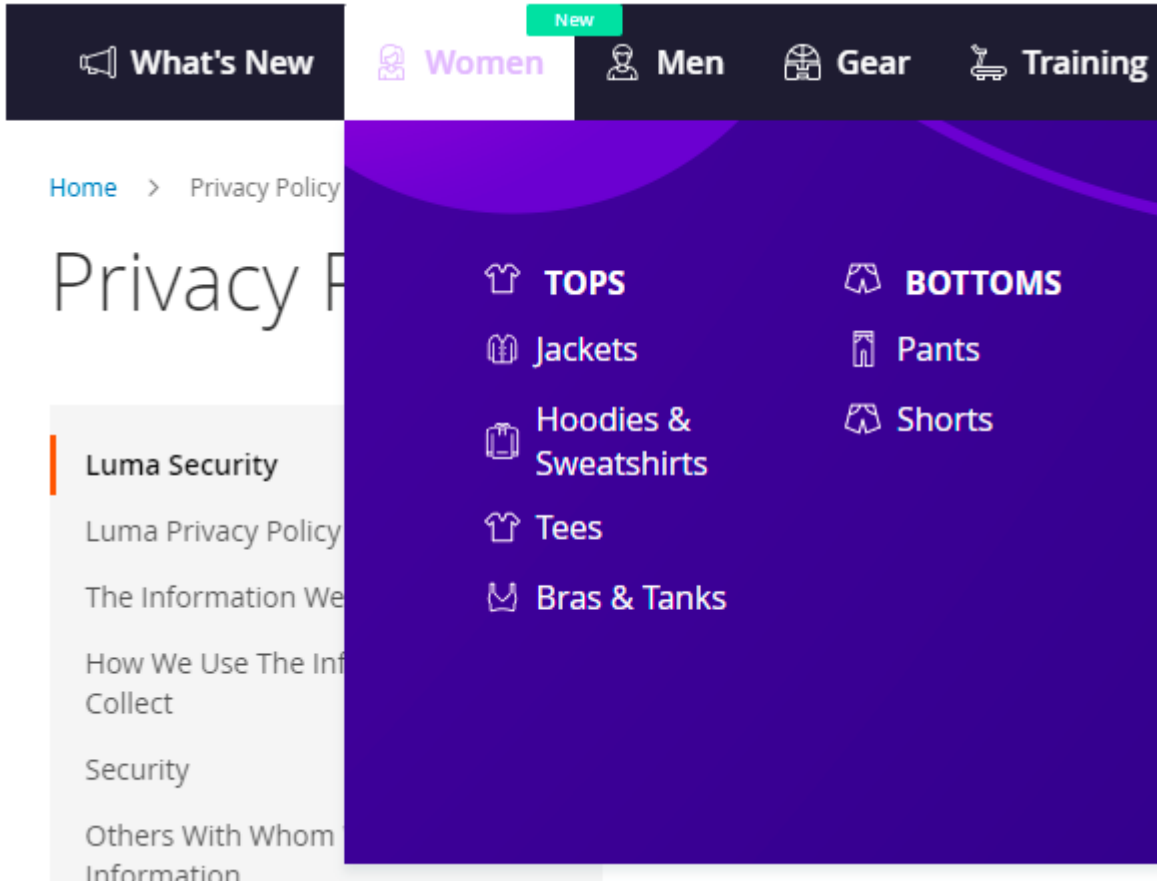

**Show Mega Menu Icons on** - select the views to show category icons. 3 options are available:

- Both Desktop and Mobile
- Desktop Only
- Mobile Only

Icons can be added to the main categories and subcategories. In a hamburger menu it looks like this:

For the horizontal menu the icons will be displayed in the same way:

In the **Color Settings** tab, you can customize the menu style to match your website design.

## Color Settings

<b>Color Scheme Template</b> <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 5px;"><p>Bright Blue ▼</p><p>Custom</p><p>Lite</p><p>Dark</p><p><b>Bright Blue</b></p><p>Blank</p></div>
<b>Menu Background Color</b> <small>[store view]</small>	<div style="background-color: linear-gradient(180deg, #232D6A 0%, #364A93 92%); height: 20px;"></div>
<b>Active Menu Item Color</b> <small>[store view]</small>	<div style="background-color: #000000; height: 20px;"></div> <p>#000000</p> <p>Leave empty if no highlighting for active menu items is required.</p>
<b>Menu Text Color</b> <small>[store view]</small>	<div style="background-color: #EAE8F5; height: 20px;"></div> <p>#EAE8F5</p>
<b>Submenu Background Color</b> <small>[store view]</small>	<div style="background-color: #5C89E4; height: 20px;"></div> <p>#5C89E4</p>
<b>Submenu Background Image</b> <small>[store view]</small>	<div style="display: flex; align-items: center;"><div style="width: 20px; height: 20px; background-color: purple; margin-right: 5px;"></div><div style="border: 1px solid #ccc; padding: 2px 5px; margin-right: 5px;">Choose File</div><div style="margin-right: 5px;">No file chosen</div><div style="margin-left: 10px;"><input type="checkbox"/> Delete Image</div></div>
<b>Submenu Text Color</b> <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 2px 5px; height: 20px;">#FFFFFF</div>
<b>Menu Item Hover Color</b> <small>[store view]</small>	<div style="background-color: #74CBED; height: 20px;"></div> <p>#74CBED</p>
<b>Hamburger Button Color</b> <small>[store view]</small>	<div style="background-color: #757575; height: 20px;"></div> <p>#757575</p>

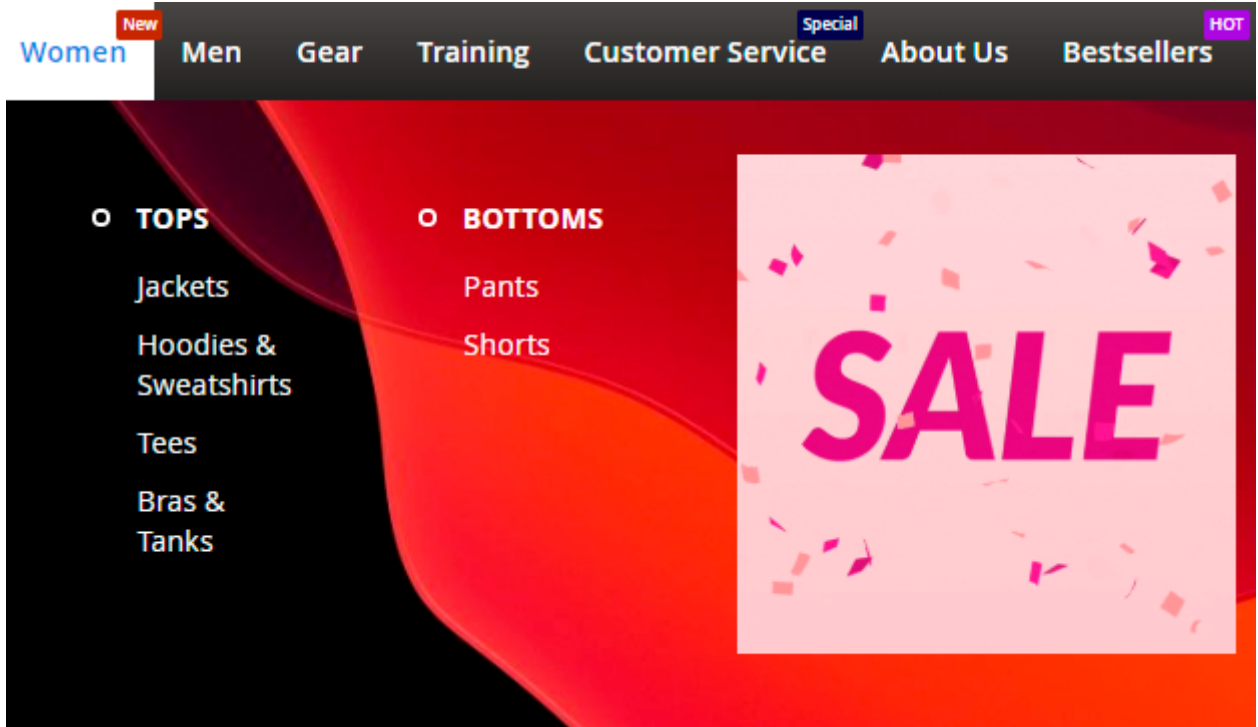

**Color Scheme Template** - select one of the ready-made templates or choose **Custom** to adjust colors manually.

With a handy color-picker tool it is possible to configure the colors for:

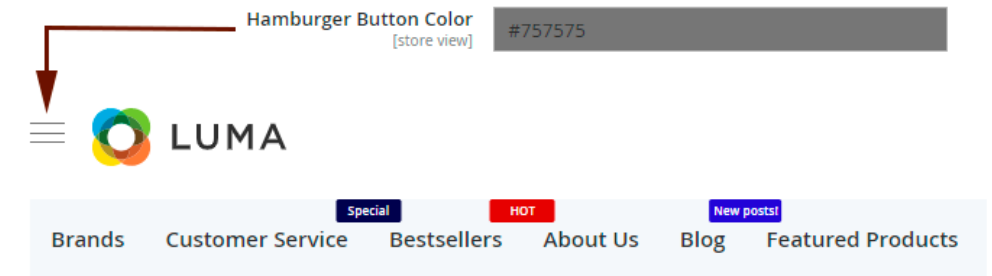

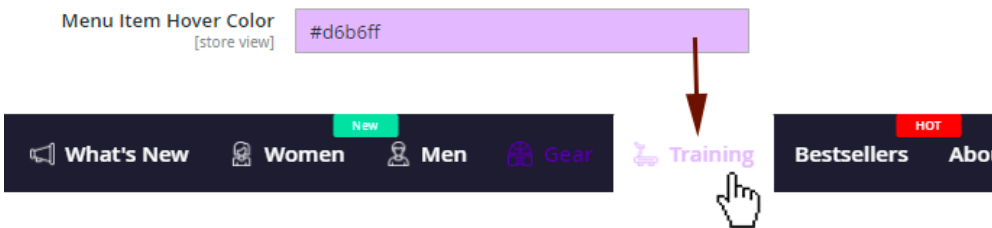

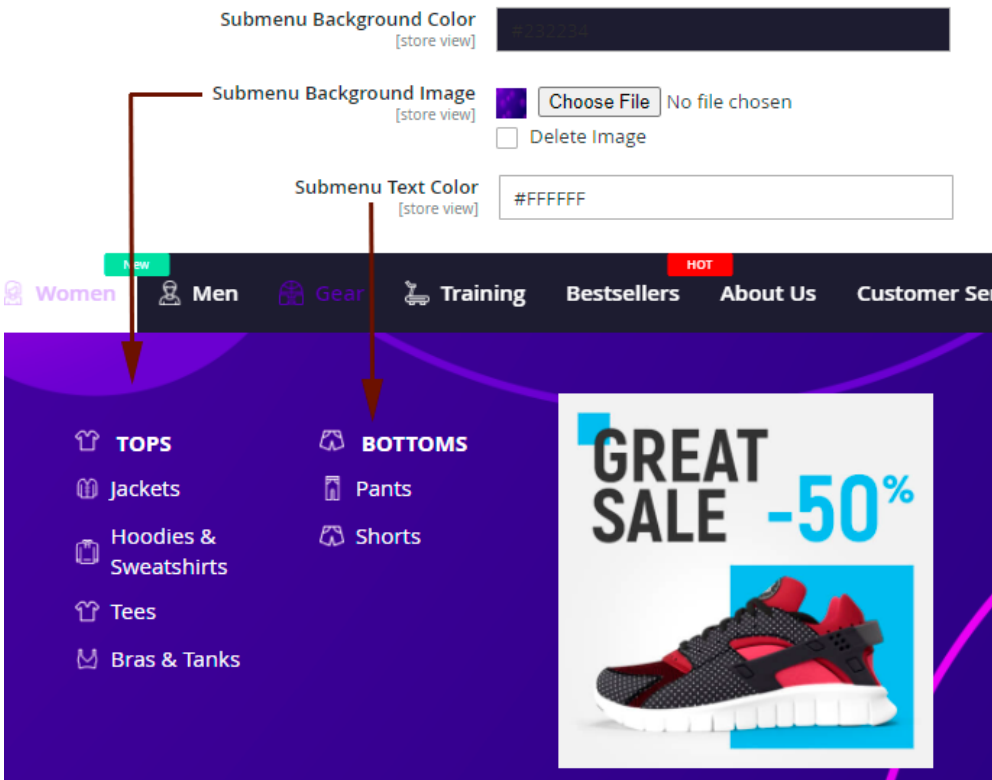

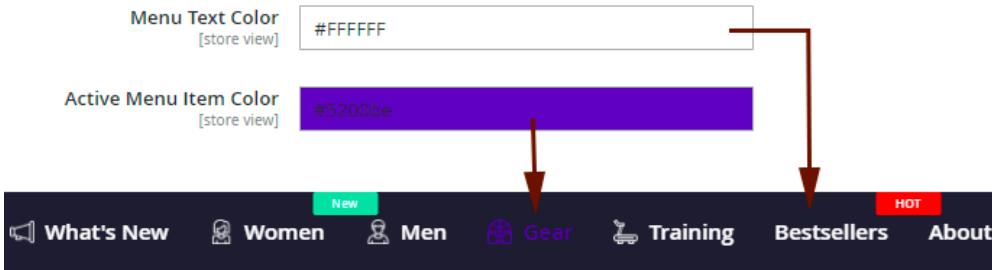

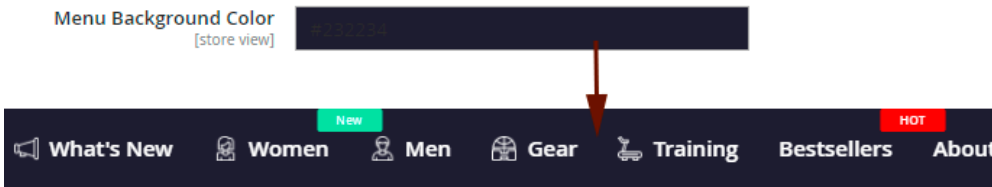

- Menu Background/Text;
- Submenu Background/Text;
- Menu Item Hover;
- Hamburger Button.

You can also set a custom submenu background image if needed.

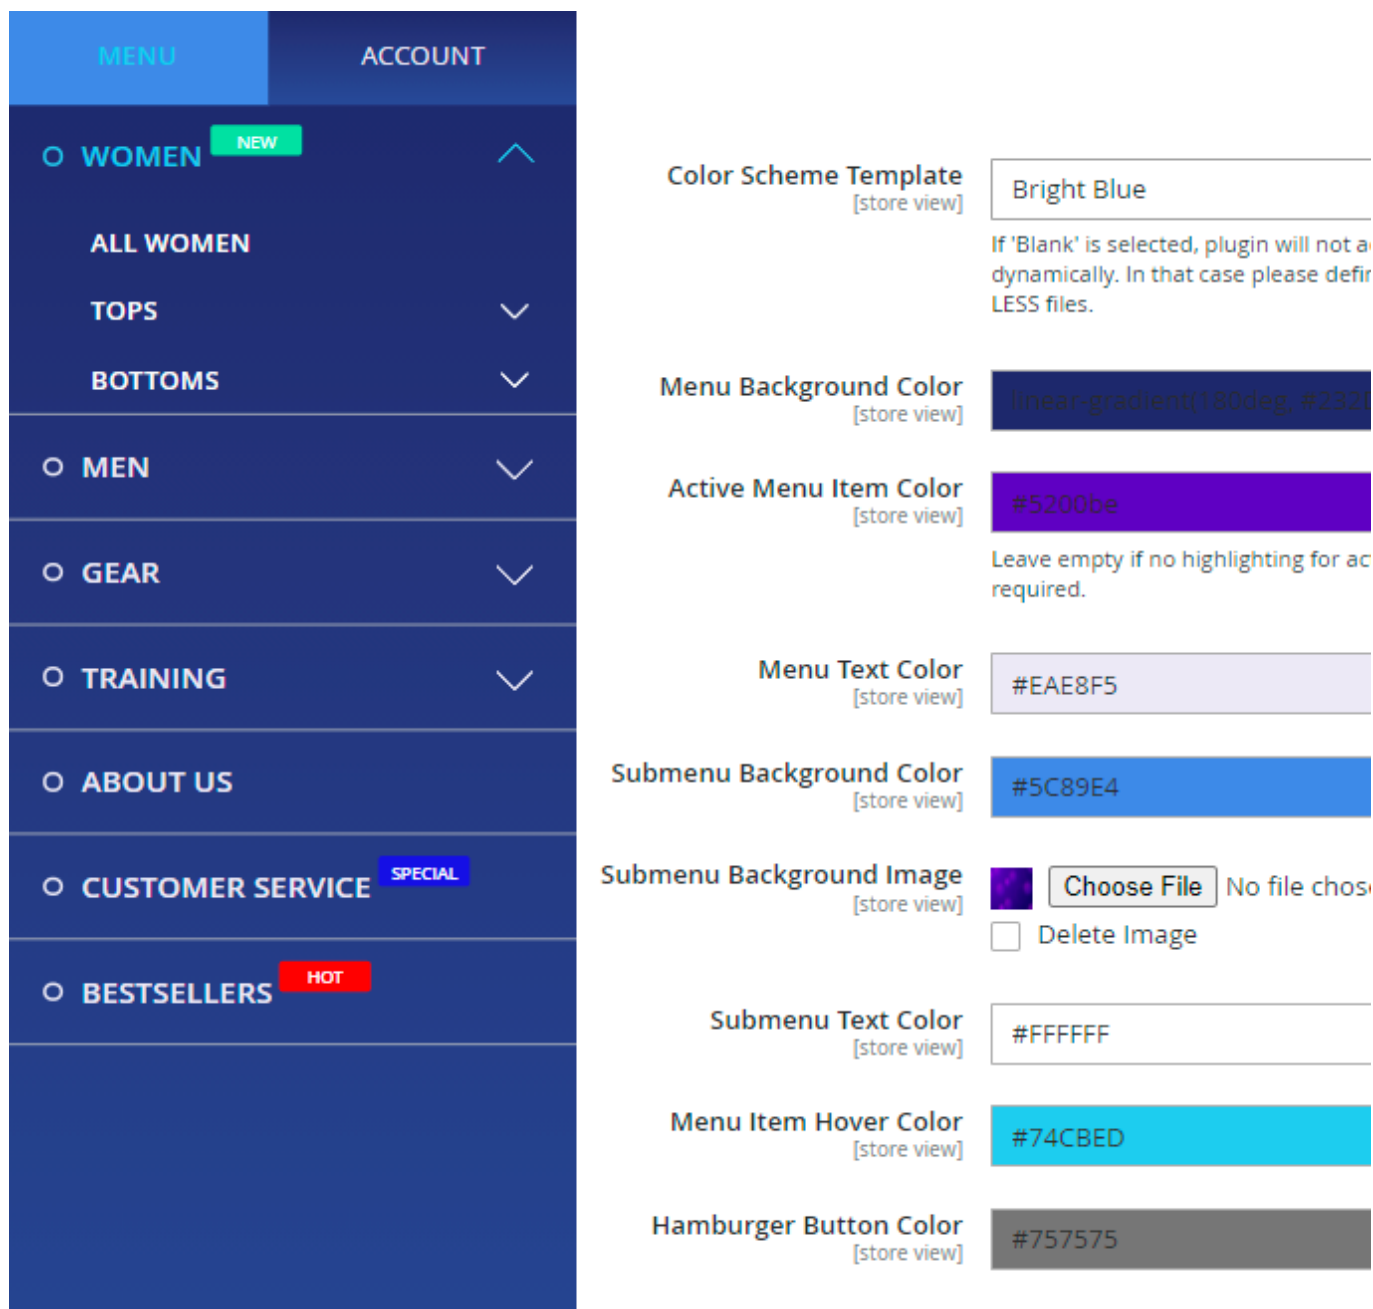

Submenu background image sample:

The whole color scheme is configured as below:

A color scheme customization for a hamburger, accordion and drill down menus have some peculiarities, e.g. *Submenu Background Color* is used for top tabs and *Menu Item Hover Color* is also used for a top tab with the default welcome message:

The image shows a hamburger menu on the left and its configuration settings on the right. The menu is dark blue with white text. The top bar has 'MENU' and 'ACCOUNT' tabs. The menu items are: WOMEN (with a 'NEW' badge), ALL WOMEN, TOPS, BOTTOMS, MEN, GEAR, TRAINING, ABOUT US, CUSTOMER SERVICE (with a 'SPECIAL' badge), and BESTSELLERS (with a 'HOT' badge). The configuration settings on the right include:

- Color Scheme Template** [store view]: Bright Blue. Note: If 'Blank' is selected, plugin will not a dynamically. In that case please defir LESS files.
- Menu Background Color** [store view]: linear-gradient(180deg, #232121)
- Active Menu Item Color** [store view]: #5200be. Note: Leave empty if no highlighting for ac required.
- Menu Text Color** [store view]: #EAE8F5
- Submenu Background Color** [store view]: #5C89E4
- Submenu Background Image** [store view]: Choose File (No file chosen), Delete Image
- Submenu Text Color** [store view]: #FFFFFF
- Menu Item Hover Color** [store view]: #74CBED
- Hamburger Button Color** [store view]: #757575

Background images are displayed on a desktop hamburger menu, but not on the mobile menu types.

## Menu Items Settings

To adjust the display of default menu items, please go to **Catalog → Categories** and click the category you need.

# Men (ID: 11)

## General Settings

## Mega Menu (For Desktop Only)

Submenu Width

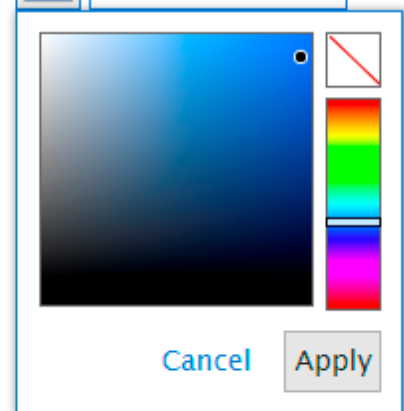

Full Width   
Full Width  
Auto  
Custom

Menu Label Text

Special

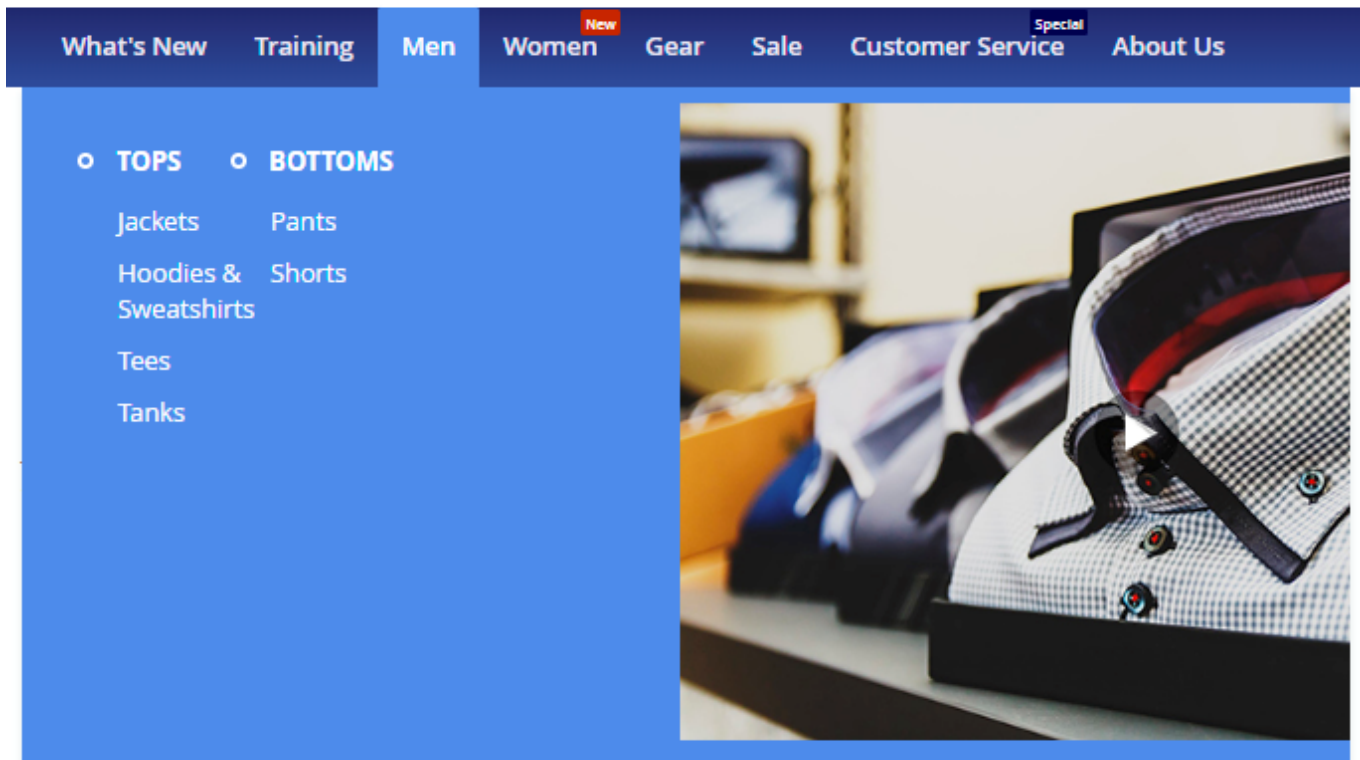

Text Color (hex)

Background Color (hex)

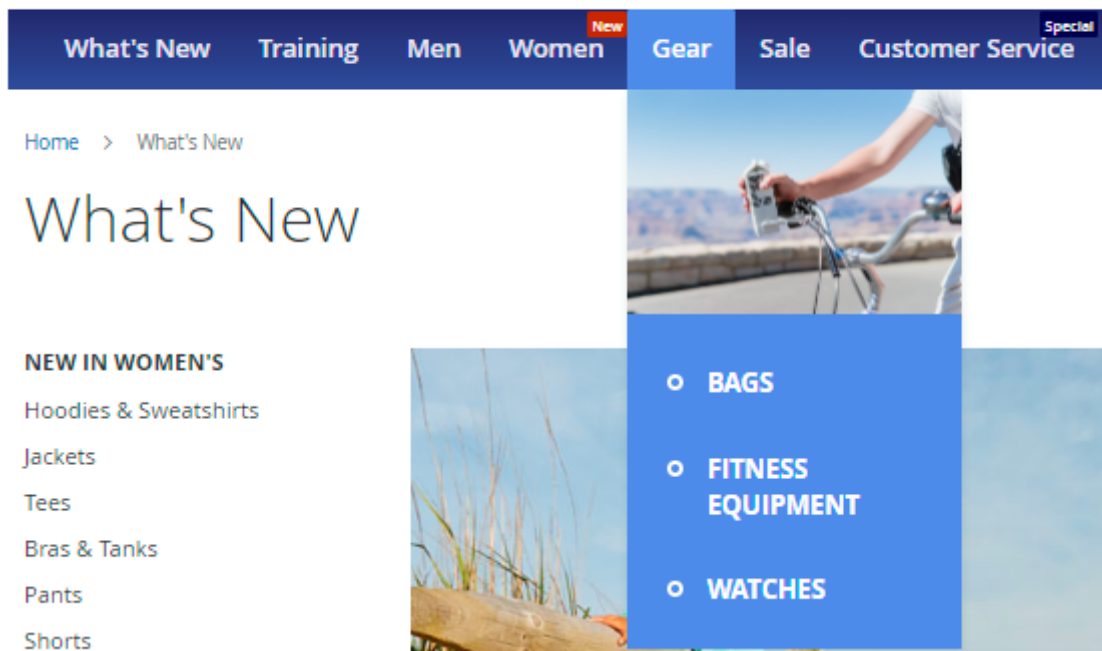

**Submenu Width** - set the width of the dropdown tab that will fit your website style.

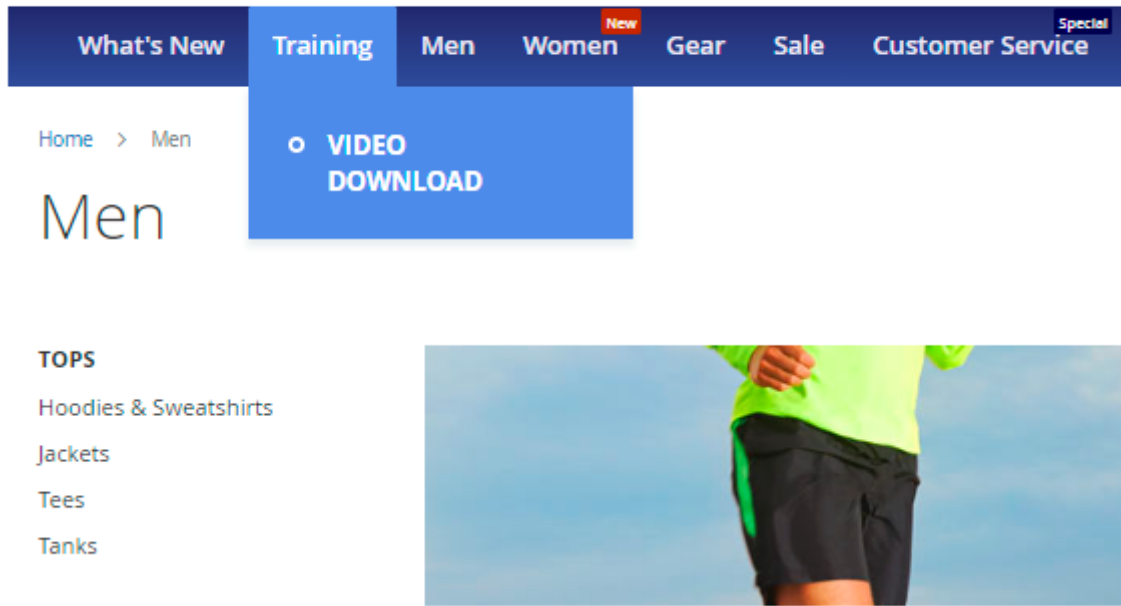

**Full Width** - submenu will have the same width as the general menu bar.

**Auto** - the width will be set automatically according to the content options.

**Custom** - this option allows to set the width manually (in pixels).

**Menu Label Text** - specify the text of the label to attract customers' attention to the necessary block of the menu.

**Text/Background color** - customize label's style using color picker tool.

Mega Menu Icon

Maximum file size: 2 MB. Allowed file types: JPG, PNG.  
For desktop and/or mobile view depending on General Configuration.

Women.png  
18x18, 584 Bytes

Submenu Type  ▼

Subcategories Position  ▼

**Mega Menu Icon** - upload or select from the gallery an icon if you want to visualize the menu item. It can be applied to desktop and/or mobile view depending on [General Configuration](#).

Only the JPG and PNG images **without the background** will be displayed correctly. This format is necessary for the correct hover work (icons copy the hover settings of the items they're assigned to). Also, the maximum file size is 2 MB.

**Note:** the package contains pre-made icons for the following business spheres:

- Clothes & Accessories
- Device
- Food
- Mechanic
- Medicine

To apply them, click the *Select from Gallery* and proceed to the *ammegamenu* folder.

The final result with and without the hover looks in the following way:

**Submenu Type** - two options are available: *With Content* or *Without Content*.

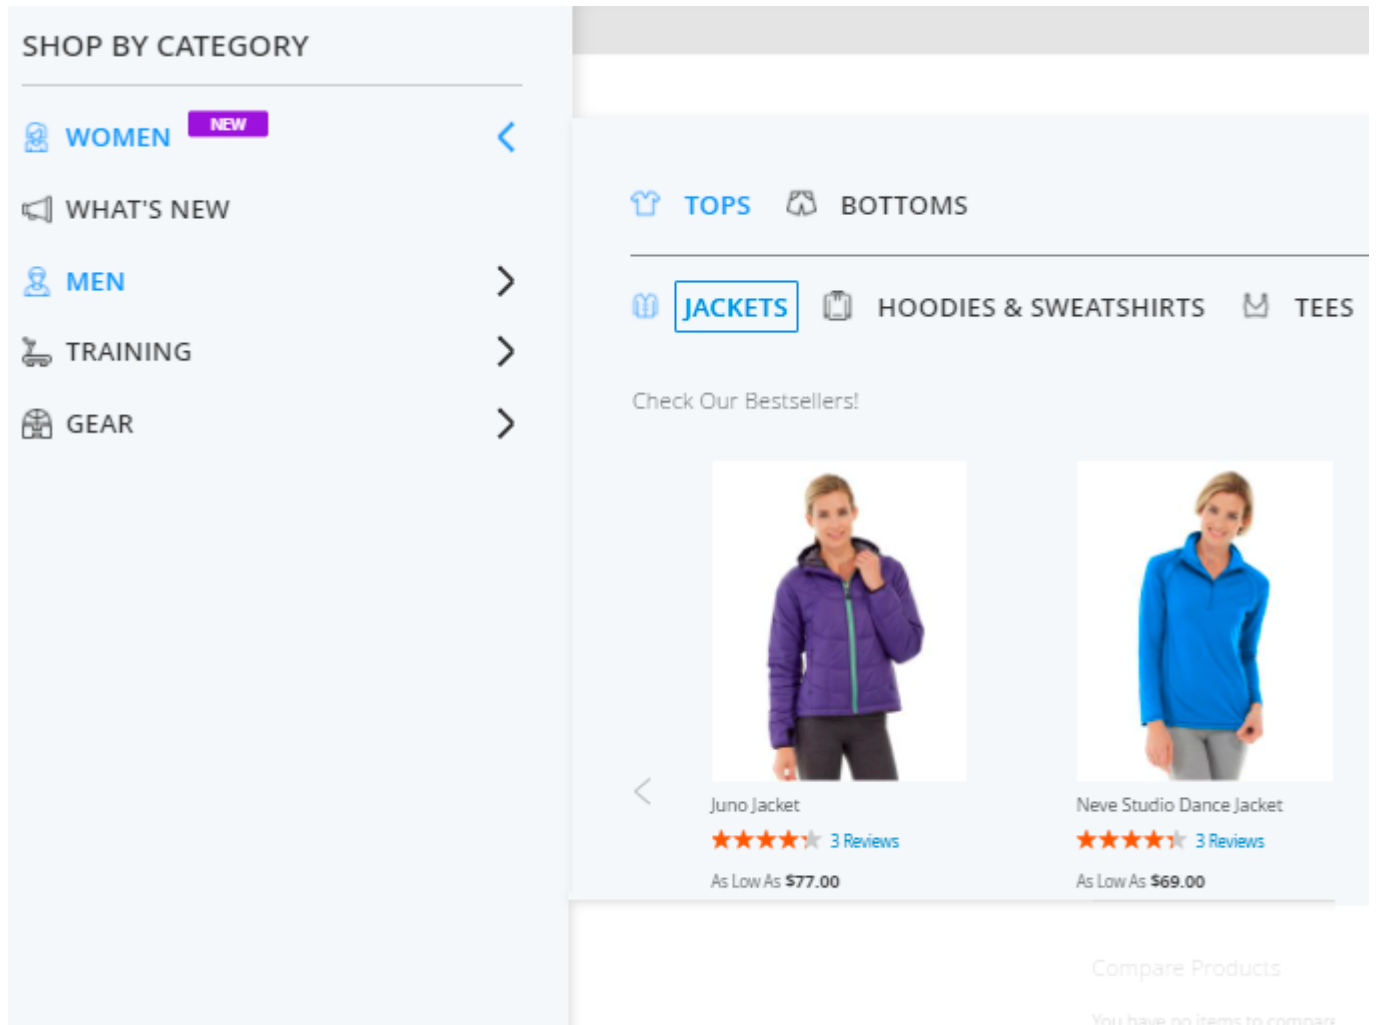

**With Content:** if you enable this setting, you will be able to configure the menu content for subcategories. In this case, child categories will be displayed anyway, but you can still add any content for the main one.

**Without Content:** in this case, subcategories content won't be displayed.

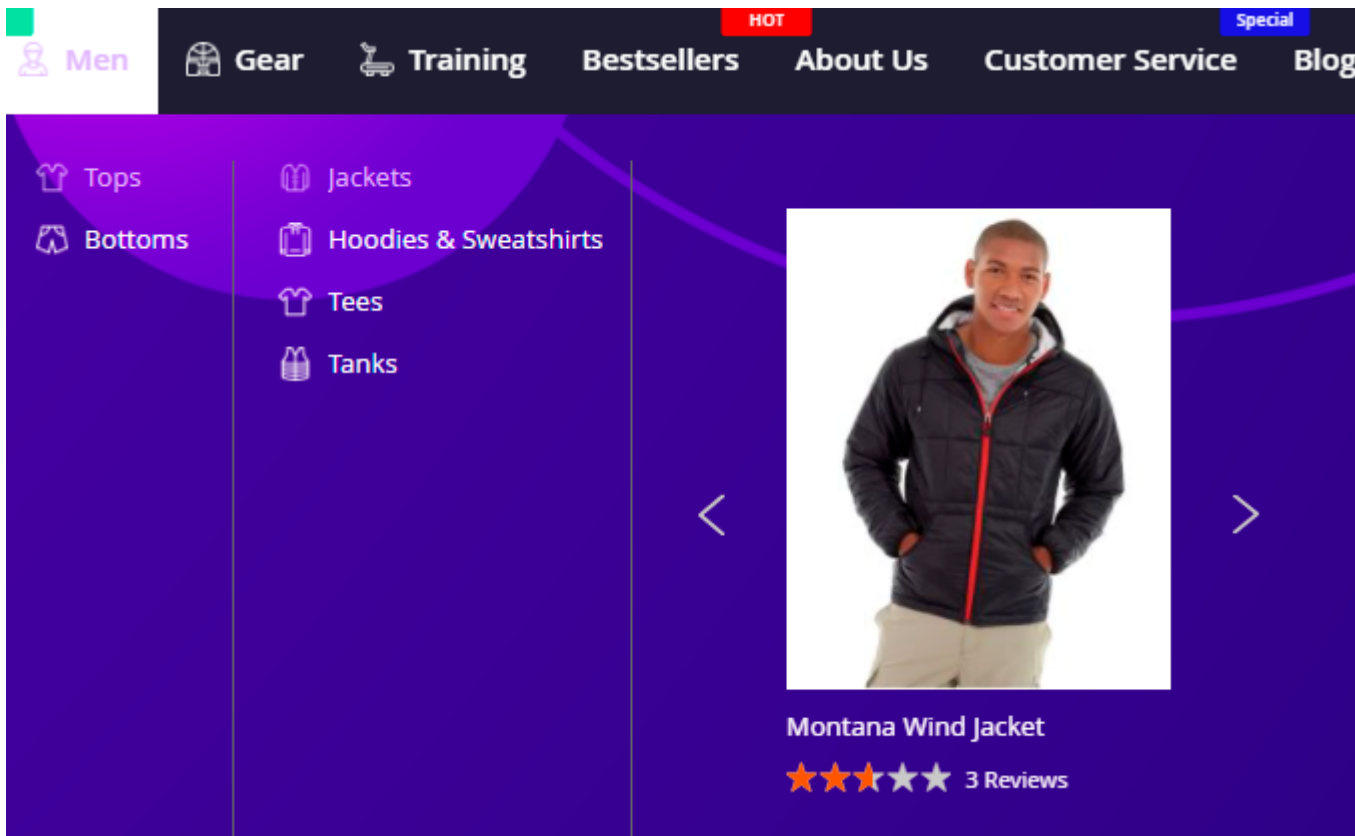

**Subcategories Position** - choose where to display the subcategories - left or top.

#### **How it works:**

In the hamburger menu we've enabled the 'With Content' option for the *Women* category, and it becomes possible to configure the content for subcategories of any level. Also, the 'Subcategories Position' setting is set to *Top*. In the case below, we've added the product widget to the subcategory of the 2nd level, and the categories of the higher level are displayed at the top of the window.

The example of the horizontal menu and the *Left* position:

Tip for **Magento Enterprise** users: try not to leave content field for subcategories empty, as the Page Builder can make the window wider than needed.

## Content

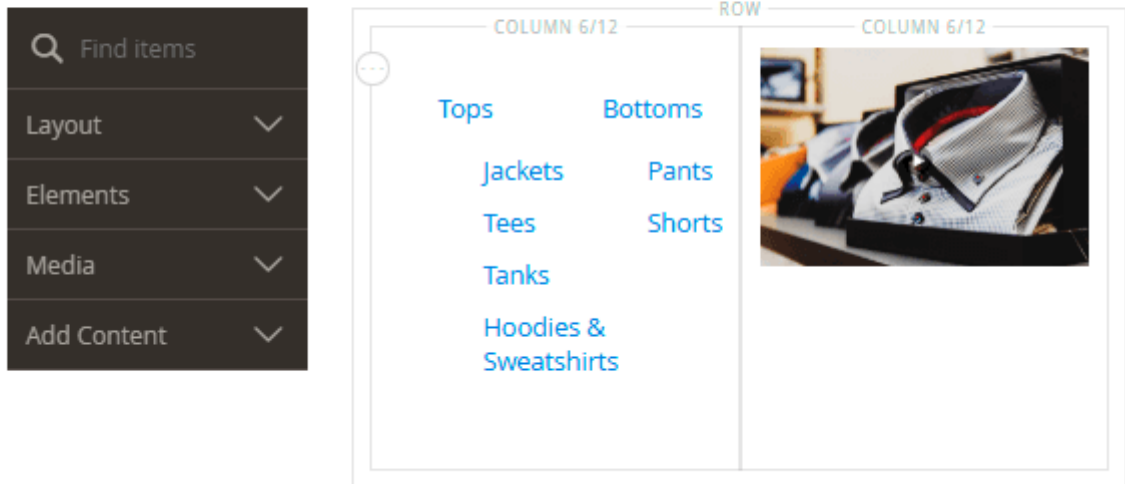

In this tab, you can adjust submenu content. The extension allows you to add images, videos, CMS blocks, banners, widgets and products. You can arrange elements the way you need using WYSIWYG editor. Also, the extension is fully compatible with the Page Builder for **Magento Enterprise**.

## Magento Page Builder Functionality

Page Builder allows creating rich in content pages just in few clicks via the handy drag-and-drop function.

## Content (For Desktop Only)

### Content

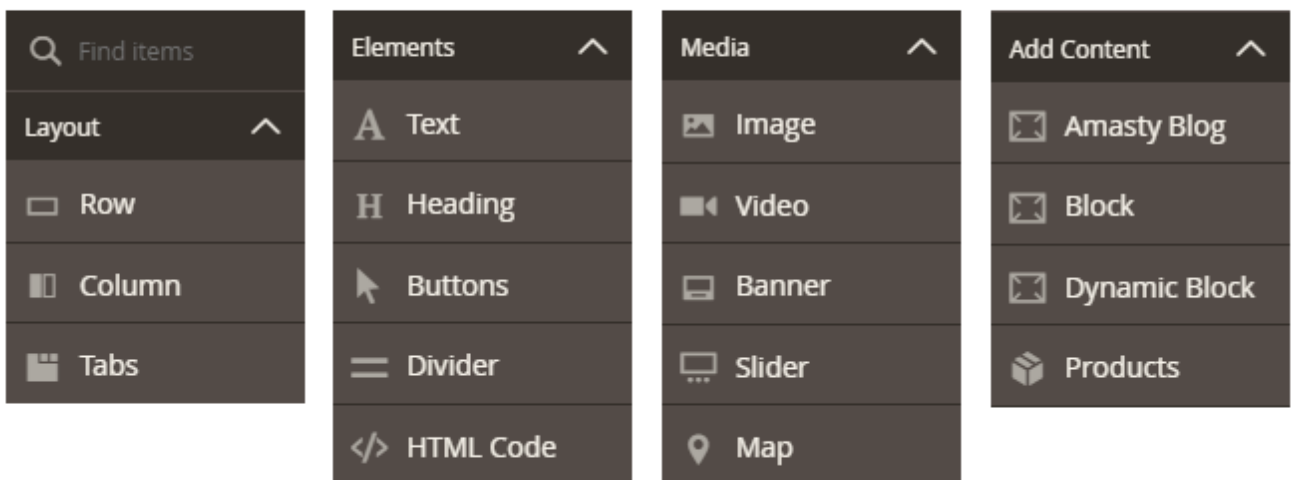

This tool includes various layouts, content and media elements. With the preview mode, you can check the result and make edits if needed. Each element has its own settings so that you can configure it according to your website style and business needs.

Here you can see all available elements:

## Content (For Desktop Only)

### Content

Check [Page Builder User Guide](#) to learn more about the elements and see the variants of Page Builder

usage.

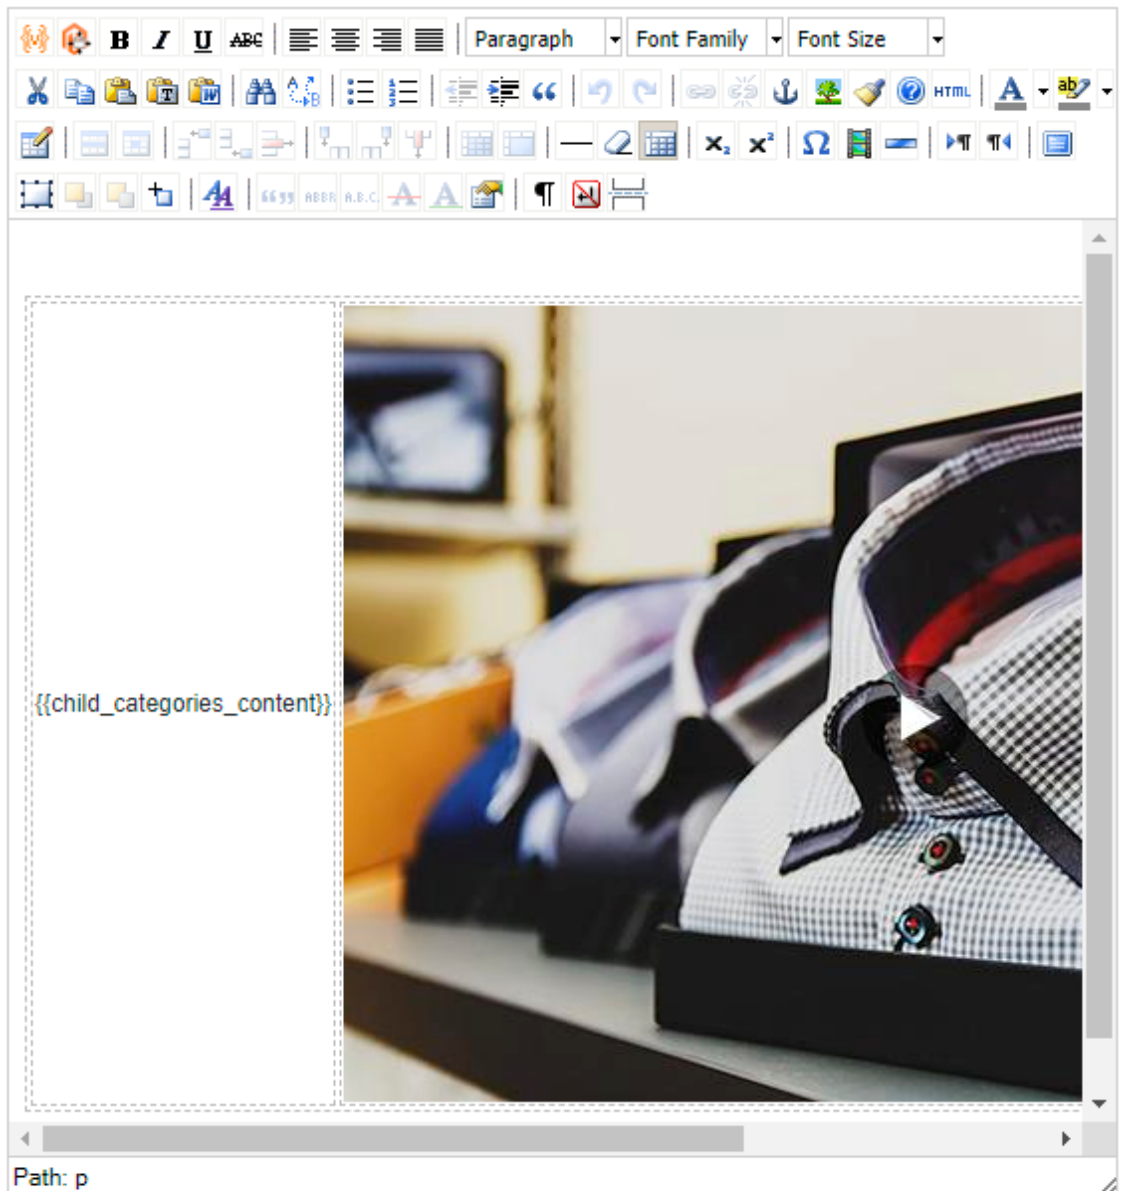

### WYSIWYG Editor

If Page Builder is not installed, it is possible to customize the menu bar via WYSIWYG editor.

#### Content (For Desktop Only)

Content

Show / Hide Editor

You can use the variable: `{{child_categories_content}}` for showing child categories.

For example, to make columns you need to insert the table and specify the necessary number of columns, rows and adjust additional settings. You may use the `{child_categories_content}` variable

for showing child categories and so on.

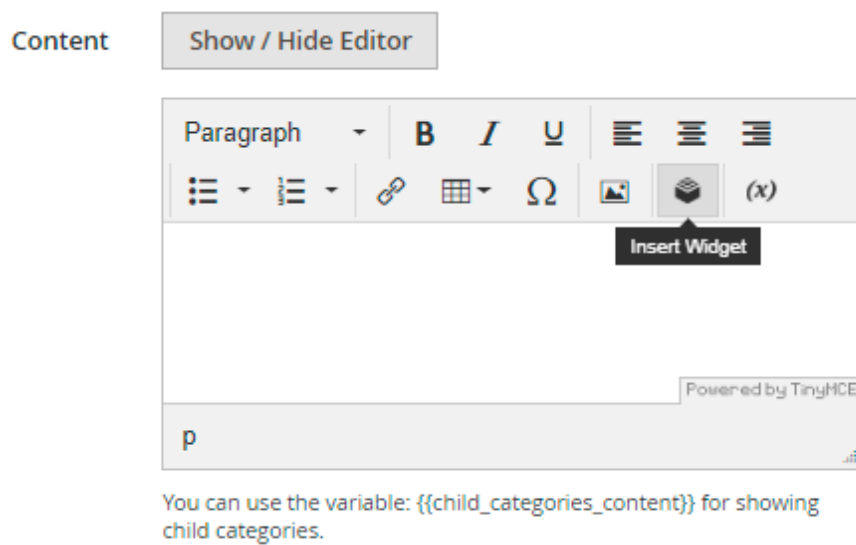

For more information, see this [WYSIWYG User Guide](#).

Employ **Magento 2 Advanced Product Reviews** extension to show product reviews right on the navigation menu and engage customers on their first step of the interaction with your store website.

### Amasty MegaMenu Products Widget

Add a special MegaMenu widget to the drop-downs to promote your new, featured or best-selling products right in the menu.

Click **Insert Widget** in the editor.

Adjust **Widget Options** according to your business needs.

## Insert Widget

Slider Autoplay Speed(ms)

Show Product Options & 'Add to Cart' Button

Number of Products to Display \*

Template \*

Conditions \* If ALL of these conditions are TRUE :

Category is one of 24, 15, 36

Cache Lifetime (Seconds)

**Widget Type** - choose Amasty MegaMenu Products widget type.

**Title** - specify the title of the block that will be displayed to customers.

**Block Layout** - select the layout for the block: *Grid* or *Slider*.

**Number of Visible Items** - if *Slider* layout is chosen, set the number of items that will be shown at once.

**Slider Width(px)** - adjust the width of the slider to match your Mega Menu configuration.

**Slider Autoplay** - if *Yes*, the products will be switched automatically. If *No*, customers will have to switch manually.

**Slider Autoplay Speed(ms)** - set the particular switching speed if needed.

**Show Product Options & 'Add to Cart' Button** - if *Yes*, the customers will see product options and will be able to add a product to cart right from the drop-down.

**Number of Products to Display** - specify the general number of products you want to be shown in a grid/slider.

**Template** - Amasty Products Grid Template is chosen by default.

**Conditions** - set flexible conditions to show the products you need.

To avoid common mistakes while setting the conditions, check [this post](#).

**Cache Lifetime (Seconds)** - specify the time between the widget updates in seconds. If not set, equals to 86400 seconds (24 hours). To update widget instantly, go to *Cache Management* and clear *Blocks HTML Output* cache. The widget will not show products that begin to match the specified conditions until the cache is refreshed.

You can add the widget to any category or custom menu item.
