For more details see how the [Order Notes for Magento 2](#) extension works.

# Guide for Order Notes for Magento 2

Create order notes and mark them with colored flags. Simplify your order management process in times by making important comments noticeable.

Keep in mind, that when you assign a flag to particular order status, flags will be added to the newly created orders only. Previously created orders will remain without the flag.

## Creation of order flags

Existing order flags can be seen in the **Sales → Order Flags**

### Order Flags

**FLAG INFORMATION**

General Information ✎

Automatic Apply

### Flag Information

**Name \***

**Icon Image**  61191-big.jpg   
JPG, PNG, GIF or SVG. 20x20 pixels strongly recommended. Images of different size will break design.

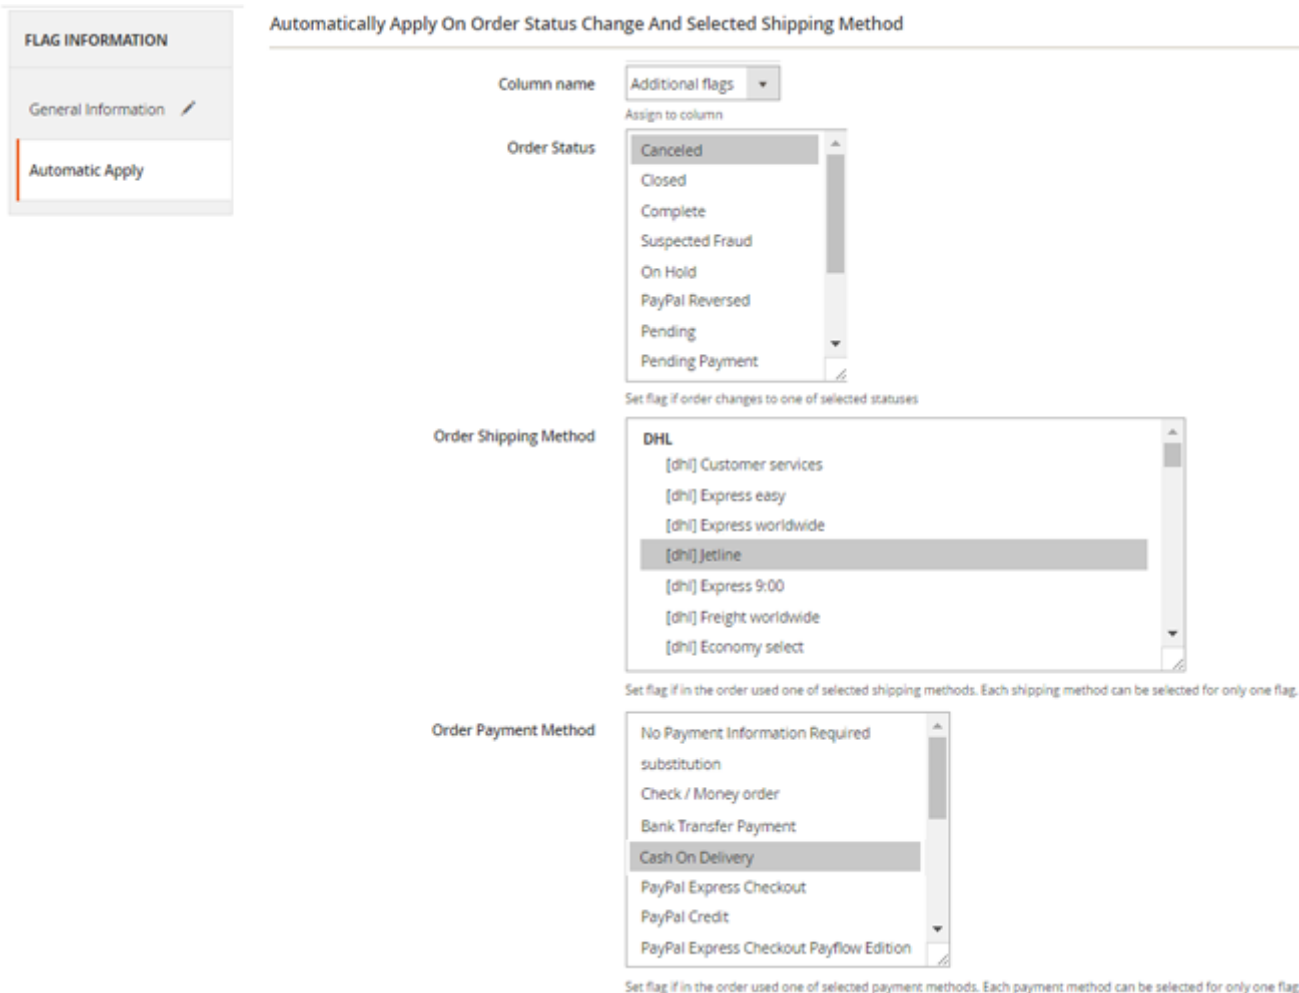

**Priority**   
Numeric value for internal use.

**Comments**

**Icon Image** - you can upload a new icon instead of a default flag.

**Priority** - set low value to define high priority. Priorities are used in flags auto assigning. In this case, the module chooses the most prioritizing flag in the column.

**Comments** - leave a comment to display it on the order grid. Hover over a flag to see it.

**'Column name'** - select the appropriate flag column. Learn how to create flag columns below.

**'Automatic Apply'** - you can select order parameters, to which the flag should apply automatically.

**Order status** - the flag will be applied automatically to the orders, which get a status(es) you choose. In this case, it's a 'Canceled' status.

**Order Shipping Method** and **Order Payment method** - specify additional parameters for automatic flag apply, such as shipping and payment methods.

## Creation of flag columns

You can add columns with additional labels to the order grid. To do this, please go to: **Sales → Order Flags → Columns**

## Order Flag Columns

admin

[Add New Column](#)

✓ The column has been saved.

**'Add New Column'**- click to create a new flag column.

You can set for each column its own labels. For example, you can specify one column and labels there to display priority of the order, the second for status recognition and the third for other order notes.

**COLUMN INFORMATION**

General Information 

Apply Flags

## Column Information

Name \*

Position   
Numeric value for internal use.

Comments

**Position** - columns can be arranged on the order grid basing on the required priority.

**Comments** - here you can add a note to the whole column.

**Flags** - assign the appropriate flags to the column.

This comment is displayed on the order grid in case an order doesn't have a flag note. Hover over a flag to see it.

Set flags to column

## Order flags on order grid

Go to **Sales → Orders**

Hover over a label to see the comments. Click on the label field to set it for the order.

ID	Priority ↑	Applied status	Notes	Purchase Point
000000002				Main Website Main Website Store Default Store View
000000006				Main Website Main Website Store Default Store View
000000005				Main Website Main Website Store Default Store View
000000003				Main Website Main Website Store Default Store View

Edit the order

Press **'Set'** button next to the appropriate flag to assign it to the order. If it's necessary, you can edit the flag comment that will be saved only for this order.

To remove a flag from the order, choose **'NO FLAG'** option.

### Flag For Order #000000002 (Column: Priority)

Enter/modify note for the flag you want to assign, and click 'Set' button.

<b>NO FLAG</b>		<b>Set</b>
	<input type="text" value="Immediate action is required"/>	<b>Set</b>
	<input type="text" value="The order requires your attention"/>	<b>Set</b>
	<input type="text" value="The order has low priority"/>	<b>Set</b>
	<input type="text" value="-"/>	<b>Set</b>
	<input type="text" value="-"/>	<b>Set</b>
	<input type="text" value="The order has medium priority"/>	<b>Set</b>
	<input type="text" value="-"/>	<b>Set</b>

You can also apply flags to multiple orders by using the **'Assign flags'** actions on the order grid.
