See the way [Shipping Suite for Magento 2](#) extension works.

Guide for Shipping Suite for Magento 2

Shipping suite is a combination of 3 best shipping managing extensions: shipping table rates, rules and restrictions. Get all the most beneficial features at once and make your shipping process even more profitable.

- Create and configure an unlimited number of shipping table rates, rules and restrictions
- Use various conditions and attributes to add more flexibility
- Get complex conditions and non-numeric postcodes support
- Target shipping to specific locations in a few clicks
- Create rates combinations to adjust them to any specific requirements
- Use dimensional or volumetric weight calculation
- Easily export or import shipping table rates

Shipping Methods and Table Rates

Create and customize an unlimited number of convenient shipping methods with individual rates. Configure combinations of the customer's address, order subtotal, cart weight and price for accurate shipping calculations.

Key settings:

- Create multiple shipping methods
- Customize rates for product groups or particular products
- Edit and import table rates in one click
- Show estimated delivery time for a particular shipping method
- Provide customers with important info via comments on product and checkout pages

To configure the extension and specify table rates settings, go to **Stores → Configuration → Sales → Shipping Methods**.

Configuration

	ID	Name	Is Active
Any			
<input type="checkbox"/>	4	US Ground	Active
<input type="checkbox"/>	3	US by weight	Active
<input type="checkbox"/>	2	Worldwide Shipping	Active
<input type="checkbox"/>	1	Australia post {day} days	Active

You can both create a new shipping method or correct the existing ones. To edit the already created shipping method, just click on it in the table. *Delete*, *Activate* or *Inactivate* methods in the **Actions** dropdown menu.

To create a new method, click the **Add New** button.

See how to configure a new shipping method [here](#).

More convenient choice of shipping methods for your customers with **Magento 2 Custom Checkout Fields**.

Shipping Rules

Create specific shipping rules according to shopping cart attributes and product conditions. Configure additional delivery options, discounts or override rates provided by carriers to improve your business.

Key settings:

- Create shipping rules depending on purchases history, cart or customer attributes
- Apply individual rules to particular shipping methods and shipping carriers
- Define a selection of shipping carriers, available to your customers, and manage their shipping

rates

- Change the rate for the whole cart both by fixed amount and by percent
- Choose specific days or periods of the validity of the rules

To manage shipping rules, go to **Sales → Shipping Rules**.

			Status	Name	Carriers	Methods	Customer Groups	Calculation	Store Views	Action
<input type="checkbox"/>	7	4	Inactive	10% discount per product for wholesales	Flat Rate [flatrate]	Any	Wholesale	Discount	All Store Views	Select ▾
<input type="checkbox"/>	5	3	Active	20% off for shipping if the subtotal is >\$50	Flat Rate [flatrate] Best Way [tablerate]	Any	All Customer Groups	Discount	All Store Views	Select ▾
<input type="checkbox"/>	6	3	Inactive	Air shipping surcharge to ship products to specific countries	United Parcel Service [ups] United States Postal Service [usps]	[ups] Next Day Air Early AM [ups] Next Day Air Early AM Letter [ups] Next Day Air [ups] Next Day Air Letter [ups] Next Day Air Intra (Puerto Rico) [ups] Next Day Air Saver [ups] Next Day Air Saver Letter [ups] 2nd Day Air AM [ups] 2nd Day Air AM Letter [ups] 2nd Day Air [ups] 2nd Day Air Letter	All Customer Groups	Replace	All Store Views	Select ▾ Edit Duplicate

You can see the **ID** of the rules, their **Status**, **Name**, shipping **Carriers** and **Methods**, **Customers Groups**, **Calculation** and **Store Views** on a handy grid.

Manage all the created shipping rules right on the grid. *Edit* them or *Duplicate* in the **Action** column.

To perform mass actions, select the rules and choose the action needed from the **Actions** dropdown menu. You can *Delete* the rules or *Change Status to Activate / Inactivate* in one click.

Click the **Add Rule** button to create a new rule.

See how to configure a new shipping rule [here](#).

Let your customers choose delivery dates and time with **Magento 2 Delivery Date Extension**.

Shipping Restrictions

Use numerous parameters (product, cart, customer attributes) as a base for shipping methods restrictions.

Key settings:

- Specify the area of each shipping method application
- Restrict shipping methods of particular carriers
- Offer to customers different sets of shipping methods according to their purchase history
- Choose the types of orders to which shipping restriction rules should be applied
- Define special shipping methods to specific stores and customer groups

To configure the restrictions, go to **Sales → Shipping Restrictions**.

ID	Status	Name	Carriers	Methods	Customer Groups	Store Views	Action
1	Active	For Canada only	DHL [dhl] Federal Express [fedex] Flat Rate [flatrate] Best Way [tablerate] Free Shipping [freeshipping] United Parcel Service [ups] United States Postal Service [usps]	Any	NOT LOGGED IN General Wholesale Retailer	All Store Views	Select ▾
2	Active	UPS overnight and DHL restriction	DHL [dhl]	[fedex] First Overnight [fedex] Priority Overnight [fedex] Standard Overnight	Restricts For All	All Store Views	Select ▲ Edit Duplicate

On the grid, all the restriction rules are displayed. You can see the **ID** of the rules, their **Status**, **Name**, shipping **Carriers** and **Methods**, **Customers Groups** and **Store Views** in one place.

Manage all the created shipping restriction rules right on the grid. *Edit* them or *Duplicate* in the **Action** column.

To commit mass actions, select the rules and choose the action needed from the **Actions** dropdown menu. You can *Delete* the rules or *Change Status to Activate / Inactivate* in one click.

Click the **Add Rule** button to create a new restriction rule.

See how to configure a new restriction rule [here](#).

Shipping Areas

To manage all the rules and restrictions efficiently, arrange shipping destinations into areas and apply restriction rules to the whole area at once. Include or exclude from the area different countries, states, regions, cities, zip codes, etc. For example, you can easily block delivery for the distant regions by creating the appropriate shipping area that includes such destinations.

Go to **Sales → Shipping Areas**.

<input type="checkbox"/>	4	Canada East Coast	East Canada regions.	Active	Select ▴

- Edit
- Delete

Create and easily manage all shipping areas on a handy grid, where you can see the **Name**, **Description** and **Status** of each area.

Edit or Delete a rule via *Select* dropdown menu in the **Action** column.

To perform mass actions, tick the rules and choose the necessary variant from the **Actions** dropdown. *Delete*, *Duplicate* or *Change Status* in one click.

To create a new area, hit the **Add Shipping Area** button.

See how to configure a new shipping area [here](#).

Magento 2 Shipping Suite is compatible with **One Step Checkout**. Thus you can enable your customers to ship an order to multiple addresses during checkout, and determine the maximum number of addresses to which an order can be shipped.

Troubleshooting checklist

If the Shipping Table Rates method you've created is not displayed:

- Check if the shipping carrier is enabled. To do this, please go to **Stores → Configuration → Sales → Shipping Methods → Amasty Shipping Table Rates → Enabled for Checkout → Yes**. Also, please check if the method you're willing to see at the Frontend is *Active*: **Sales → Operations → Shipping Table Rates**.
- If the shipping carrier is enabled, but the method is still not visible, make sure that the shipping method contains all the rates related to the shipping types of products contained in the cart. To be displayed to customers, the shipping method should contain rates for all shipping types, that are found in the cart. Otherwise, the shipping method will not be visible. If the mentioned issue is a reason, the method will become available after adding a new rate with a *Shipping Type* "All" to the method.

If the **For products with different shipping types** field in the shipping methods settings is set to "Sum up rates", but the rates don't sum up:

1. Check if these rates belong to the same shipping method. If not, the rates will not be summed up as the setting, mentioned above, works only for the rates with different Shipping Types in the selfsame shipping method.

If the shipping rule you've created doesn't work, please, make sure, that:

1. *there are no other active rules, that should not be applied*: if two or more restrictions are in the active status, they will be applied contemporaneously;
2. *the conditions are set correctly*.

To avoid undesirable results, make sure there are no active rules that shouldn't be applied. Let's check the situation: you have several shipping rules and all of them are set as active. Rule 1 has the highest priority, Rule 2 has lower priority and Rule 3 has the lowest one. That's how it will work when the cart contents meet all active shipping rules conditions:

1. Rule 1 will be applied first. It is set to replace a shipping rate of any one item in the cart with \$0.50.
2. Rule 2 will be applied the second. It replaces the cost of shipping for the whole order at \$15.
3. Rule 3 will be applied to the last. This rule sets free shipping for all items in the cart. This means, that the shipping rate for the whole order will constitute \$0.

Use **Conditions** tab to restrict the cases of the rule application.
